# Saint Cloud APO

Transportation Improvement Program

FY 2018-2021

This Report was prepared by the St. Cloud Area Planning Organization (APO) in cooperation with state and local officials, local transit operators and other affected transportation planning and implementing agencies. It was financed in part by the U.S. Department of Transportation. It was financed in part by the U.S. Department of Transportation, Federal Highway Administration and Federal Transit Administration, and the Minnesota Department of Transportation.

The contents of this report reflect the views of the St. Cloud Area Planning Organization, which is responsible for the facts, and the accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of the U.S. Department of Transportation or MnDOT. This report does not constitute a standard, specification or regulation.

Updated 06/14/2018

# Table of Contents

| Executive Summary   | 2           |
|---|-------------|
| 1 Introduction  | 9           |
| 2 Planning Process, Self-Certification, & Performance Measures                                    | 12          |
| 3 Program Process   | 18          |
| 4 Previous TIP Project Update   | 20          |
| 5 FY 2018-2021 TIP Project List and Map   | 26          |
| 6 Financial Capacity Analysis   | 33          |

| D Appendix D: Central Minnesota ATP<br>Operations & Policy Manual                                 | 69          |
| E Appendix E: Non-Project Specific Local Maintenance / Opera<br>Expense Definitions               | ation<br>81 |
| F Appendix F: Detailed Financial Analysis   | 83          |
| G Appendix G: Common Acronyms and STIP Codes  | 107         |
| H Appendix H: St. Cloud Area Planning Organization<br>Self-Certification Resolution and Checklist | 110         |
| I Appendix I: St. Cloud APO Planning Organization<br>Lobbying - Certification                     | 118         |
| J Appendix J: Public Comments Received & APO Response   | 120         |
|   |             |

K Appendix K: Transportation Alternative Program (TAP) 122

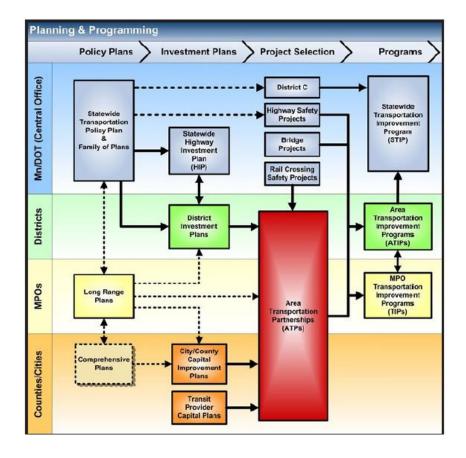

# Executive Summary

The Transportation Improvement Program (TIP) is a multi-year program of transportation improvements for the St. Cloud metropolitan area. The TIP must be updated and approved at least every four years by the Metropolitan Planning Organization (MPO) in cooperation with the Minnesota Department of Transportation (MnDOT) and St. Cloud Metro Bus. The St. Cloud Area Planning Organization (APO), the MPO for the area, updates the TIP annually. The MnDOT Commissioner approves the TIP and incorporates the St. Cloud metropolitan area projects into the State Transportation Improvement Program (STIP).

- The St. Cloud APO TIP document includes projects from the Minnesota Department of Transportation (MnDOT) District 3 in the APO planning area, St. Cloud Metro Bus projects, and local projects with federal funding. Local projects that are fully funded by a township, city, or county are not included in the APO TIP. All regionally significant projects, requiring action by the FHWA or FTA, regardless of funding source, are included in the TIP.
- Projects included in the TIP must be consistent with APO's Transportation Plan.

# What is a Transportation Improvement Program (TIP)?

- A local, state, and federally approved document of staged, multi-year transportation improvements for the St. Cloud APO.
- A four year document that is updated and approved by the APO, state and federal agencies, and public transit operators every year.
- Metropolitan Planning
   Organizations (MPOs), such as
   the APO, and transit providers
   are required to have a minimum
   of four years represented in
   their TIP documents. The APO
   TIP is on a rotating 5-year/4 year cycle because the APO
   programs two years of federal
   funds every other year.

# How are Projects Programmed into the TIP?

The TIP project solicitation and development process begins in November every other year. Projects originate from three main areas: 1) APO Transportation System Management report, 2) APO Transportation Plan, and 3) implementing agency project submittals.

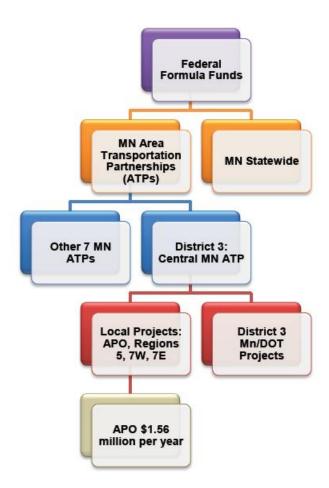

Projects meeting the minimum qualifying criteria are prioritized by the APO Technical Advisory Committee (TAC) into one intermodal project list. Prioritization considerations include the following:

Technical engineering criteria developed by the Central MN Area Transportation Partnership;

APO non-technical considerations including public involvement, project deliverability, regional benefit, funding equity and non-vehicular accommodations;

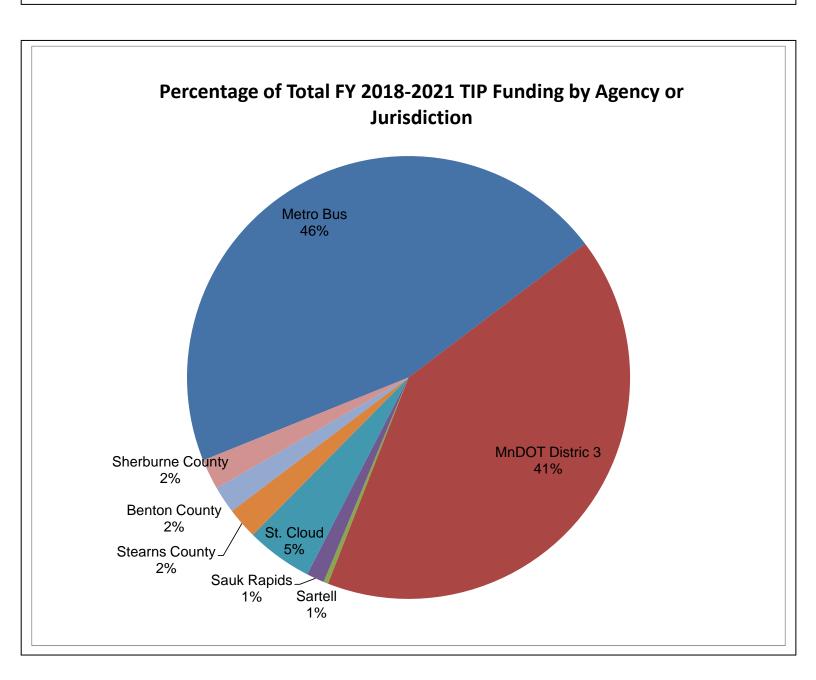

APO sub-targeted local federal funding available.

A prioritized list is then forwarded to the APO's Executive Board and APO Policy Board for approval or modification. The prioritized list is presented for public input at APO Policy Board meetings. Appendix C outlines the process and criteria for prioritizing APO TIP projects in greater detail.

| Percent of Total | 41.25%          | 45.79%       | 2.29%          | 2.22%            | 1.97%         | 4.84%       |

## **Summary Funding Distribution for Projects by Jurisdiction or Agency**

| Category      | Percent of Total Funding | Total Funding |
|---------------|--------------------------|---------------|
| Bike / Ped    | 1%                       | \$2,228,413   |
| Safety        | 5%                       | \$8,294,326   |
| Transit       | 46%                      | \$80,103,007  |
| Road / Bridge | 48%                      | \$84,310,177  |

Note #1: Funding totals include a combination of local, state, and/or federal dollars programmed in the TIP.

Note #2: Funding is indicated based on project lead agency and not on project location.

Note #3: Funding totals for local jurisdictions do not include unsolicited FY 2018-2019 Highway Safety Improvement Program (HSIP) funds.

Note #4: Advance Construction (AC) paybacks are included in funding totals, but local match funds are not double counted from original fiscal year totals.

A project is generally considered regionally significant if: it adds one or more travel lanes for over one mile, or it involves the addition of an interchange, or it involves the reconfiguration of an interchange such that a movement is added or eliminated. Local projects that are fully funded by a township, city, or county are not included in the APO TIP. Information on locally funded projects may be obtained from the individual jurisdiction's Capital Improvement Program.

Note #1: Eunding totals include a combination of local, state, and/or federal dollars programmed in the TIP.

Note #2: Advance Construction (AC) paybacks are included in funding totals, but local match funds are not double counted from original fiscal year totals. Category Definition Notes:

"Transit" includes Metro Bus funding totals.

"Road and Bridge" projects do not include MNDOT District Set Asides, which may also be road and bridge focused.

"Safety" includes projects funded by HSIP, railroad crossing, other safety focused projects, and MnDOT Safety Improvement set asides.

"Non-Motorized" includes Transportation Alternatives Program (TAP) funding for bicycle and pedestrian projects and ADA set asides.

"District Set Asides" are not included.

A project is generally considered regionally significant if: it adds one or more travel lanes for over one mile, or it involves the addition of an interchange, or it involves the reconfiguration of an interchange such that a movement is added or eliminated. Local projects that are fully funded by a township, city, or county are not included in the APO TIP. Information on locally funded projects may be obtained from the individual jurisdiction's Capital Improvement Program.

#### Surface Transportation Block Grant (STBG)

Provides flexible funding that may be used by States and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway, bridge and tunnel project, eligible public roadways, pedestrian and bicycle infrastructure, and transit capital projects. This is the federal funding directly available to the APO member agencies through the project solicitation process.

**Project Example:** FY 2018 Stearns County resurfacing of CSAH 75 from Old Collegeville Road to CSAH 81.

STBG Award: **\$1,260,000**, Total Programmed Project Cost: \$1,575,000

#### HSIP – Highway Safety Improvement Program

The Highway Safety Improvement Program (HSIP) is a core Federal-aid program with the purpose to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-Stateowned roads and roads on tribal land. The HSIP requires a datadriven, strategic approach to improving highway safety on all public roads with a focus on performance.

The HSIP is legislated under Section 148 of Title 23, United States Code (23 U.S.C. 148) and regulated under Part 924 of Title 23, Code of Federal Regulations (23 CFR Part 924). The HSIP consists of three main components, the Strategic Highway Safety Plan (SHSP), State HSIP or program of highway safety improvement projects and the Railway-Highway Crossing Program (RHCP), In addition, some states also have a High Risk Rural Roads (HRRR) program if they had increasing fatality rate on rural roads.

**Project Example**: US 10, From North Benton Drive to 0.2 Miles West of East St. Germain St. in St. Cloud, Install Cable Median Barrier

HSIP Award: \$1,450,000, Total Programmed Project Cost: \$1,450,000

#### TAP - Transportation Alternatives Program

The FAST Act eliminates the MAP-21 Transportation Alternatives Program (TAP) and replaces it with a set-aside of Surface Transportation Block Grant (STBG) program funding for transportation alternatives (TA). These set-aside funds include all projects and activities that were previously eligible under TAP, encompassing a variety of smaller-scale transportation projects such as pedestrian and bicycle facilities, recreational trails, safe routes to school projects, community improvements such as historic preservation and vegetation management, and environmental mitigation related to stormwater and habitat connectivity.

**Project Example:** Construct Missing Segments of Bike/Ped Trail Connecting Great Northern Trail to Mark Park in Princeton

TAP Award: \$509,691, Total Programmed Project Cost: \$811,393

#### BRRP - Bridge Replacement or Rehabilitation Program

The Highway Bridge Replacement and Rehabilitation Program (HBRRP) provides funds to assist the States in their programs to replace or rehabilitate deficient highway bridges and to seismic retrofit bridges located on any public road.

**Project Example:** CSAH 24 Bridge Replacement (New Bridge 70501), including trail grading and curb and gutter from Rolling Ridge Rd to Lobelia St. in Becker

BRRP Award: \$1,100,000, Total Programmed Project Cost: \$1,100,000

#### **NHPP National Highway Performance Program**

The FAST Act continues the National Highway Performance Program, which was established under MAP-21. The NHPP provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.

**Project Example:** Stearns County CSAH 75, From Old Collegeville Road to CSAH 81 in Stearns County, Resurfacing

NHPP Award: \$1,260,000, Total Programmed Project Cost: \$1,025,738

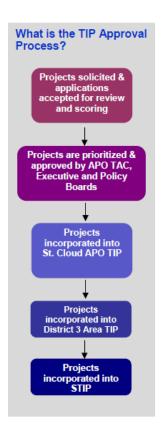

# 1 Introduction

The Transportation Improvement Program (TIP) is a multi-year program of transportation improvements for the St. Cloud metropolitan area. The TIP must be updated and approved at least every four years by the Metropolitan Planning Organization (MPO) in cooperation with the Minnesota Department of Transportation (MnDOT) and St. Cloud Metro Bus. The St. Cloud Area Planning Organization (APO), the MPO for the area, updates the TIP annually. The MnDOT Commissioner approves the TIP and incorporates the St. Cloud metropolitan area projects into the State Transportation Improvement Program (STIP).

## What is the TIP?

- A multi-year program of transportation improvements for the St. Cloud Metropolitan Area
- Updated at least every two years by Metropolitan Planning Organization (MPO)
- Is fiscally constraint
- Is approved by the APO and the governor; and
- Is incorporated directly, without change, into the Statewide Transportation Improvement Program (STIP).

The APO is responsible for development of the TIP and accomplishes this in cooperation with State agencies, local jurisdictions, St. Cloud Metro Bus, and other affected planning and implementing agencies. The responsibilities between the State and public transportation operators are clearly identified in written agreements (i.e. Memorandum of Understanding) with MnDOT and St. Cloud Metro Bus. The TIP development process begins within 90 days of the end of each program year.

All APO agencies are represented on the Technical Advisory Committee (TAC) of the APO. TAC membership consists of technical representatives from the three counties, six municipalities, one township, St. Cloud Metro Bus, MnDOT and APO staff. A listing of implementing agencies, TAC membership, and an APO Planning Area map are included in Appendix A.

The FHWA and FTA must jointly find that this TIP is based on a continuing, comprehensive transportation planning process carried out cooperatively with MnDOT and St. Cloud Metro Bus. This finding is based, in part, on the Self-Certification included in the TIP.

Federal transportation legislation requires states, MPOs and transit providers to have a minimum of four (4) years represented in their TIP/STIP documents. This four (4) year process is represented and exceeded in this TIP document (FY 2018 to FY 2021) for local federal projects, MnDOT District 3 projects, and St. Cloud Metro Bus projects in the APO planning area. The APO solicits project applications every other year for local federal funding.

Programming projects every other year allows for the consideration of programming larger projects. Project applications were submitted, prioritized, and approved in year 2016 for FY 2020 and FY 2021 funding. The four or five year programming period is consistent with the capital improvement programs of local implementing agencies and provides an adequate time-frame for programming projects from the St. Cloud Metropolitan Area 2040 Transportation Plan (Plan).

## The TIP Public Participation Process is Compliant with FAST Act Requirements:

- The process provided a reasonable opportunity for review and comment from all stakeholders including:
  - ◊ Citizens
  - Affected public agencies
  - ◊ Freight shippers
  - Providers of freight transportation services
  - ◊ Providers of transportation
  - ♦ Users of public transportation
  - Users of pedestrian & bicycle facilities
  - Representatives of the disabled
  - Indian tribal governments (to the extent practicable)
  - Federal land management agencies (to the extent practicable)
  - Other interested parties

The TIP includes a list of all federal transportation projects within the St. Cloud Metropolitan Area consistent with the Plan and proposed for funding under Title 23, USC, or Title 49, USC. The St. Cloud APO TIP document includes projects from the Minnesota Department of Transportation (MnDOT) District 3 in the APO planning area, St. Cloud Metro Bus projects, and local projects with federal funding. The TIP also includes regionally significant projects. A project is generally considered regionally significant if: it adds one or more travel lanes for over one mile, or it involves the addition of an interchange, or it involves the reconfiguration of an interchange such that a movement is added or eliminated.

Local projects that are fully funded by a township, city, or county are not included in the APO TIP due to not receiving federal funding.

As a management tool for monitoring the progress of implementing the Plan, the TIP identifies criteria and a process for prioritizing implementation of the transportation projects and any changes in priorities from previous TIPs. It includes a list of major projects from the previous TIP that were implemented and identifies any significant delays in the planned implementation of other projects. A list of the previous TIP projects and their status can be found in Chapter 4.

The APO affords reasonable opportunities for the public and other interested parties to comment on the proposed and approved TIP. Public meeting notices are published and the TIP document is made readily available for review and comment. Appendix B contains a copy of the Public Information Meeting notices published in the St. Cloud Times, as well as the Affidavit of Publication for the meeting. The Public Participation element of the Plan details current and proposed methods for facilitating public input. To aid in the public involvement process the Draft 2017-2021 TIP was made available on the St. Cloud APO website (www.stcloudapo.org).

The TIP public participation process was consistent with the APO's Public Participation Plan, updated in December 2012 for FAST Act compliance. The process provided stakeholders a reasonable opportunity to comment on the TIP. This TIP is financially constrained by year and includes a financial analysis that demonstrates which projects are to be implemented using existing and anticipated revenue sources, while the existing transportation system is being adequately maintained and operated. The financial analysis was developed by the APO in cooperation with MnDOT, St. Cloud Metro Bus, and local jurisdictions who provided the APO with historic transportation expenditures and forecasted transportation revenue. Only projects for which funds can reasonably be expected to be available are included in the TIP. In developing the financial plan, the APO took into account all projects and strategies funded under Title 23, USC, and the Federal Transit Act, other federal funds, local sources, State assistance, and private participation.

This TIP also includes an environmental justice evaluation to determine if programmed projects will have a disproportionate impact on minority or low-income populations, consistent with the 1994 Executive Order 12898.

# 2 Planning Process, Self-Certification,

# & Performance Measures

# **Planning Process**

The metropolitan transportation planning process includes both long-range and short-range strategies, facilitating the efficient movement of people and goods on an intermodal transportation system. Projects included in the TIP come from the Transportation System Management (TSM) Plan, the 2040 APO Transportation Plan, and from implementing agencies. This process involves two specific elements:

#### Long-Range:

Based on a time frame of twenty years or greater, these documents establish goals, examine past trends, and identify areas of future congestion based on forecasted land use. Projects originating from these documents may involve substantial costs and impacts.

#### Short-Range:

Based on a time frame of usually less than 5 years, these documents examine specific details of the transportation system. Emphasis is toward low-cost, low impact improvements to increase system efficiency and safety.

The policies and strategies developed at the long-range level (APO 2040 Transportation Plan: Chapter 4: Goals, Objectives and Performance Management) provide a framework for the development of strategies at the short-range level. Long-range plans may affect the types of short-range strategies pursued in the interim. A combination of short-range operational strategies could preclude the implementation (and need) of a capital-intensive project, or possibly alter its design. Projects originating from these elements are merged into the program based on the APO's continuing, comprehensive planning process carried on cooperatively by the State and local communities.

FAST Act requires the APO to consider ten general planning areas (to the right) when developing short and long-range transportation plan elements.

# What are the FAST Act Planning Areas & their Function?

• Metropolitan Vitality

Support economic vitality of the metro area through global competitiveness, productivity, and efficiency

Safety

Support increased safety of the transportation system for motorized & non-motorized users

Security

Support increased security of the transportation system for motorized & non-motorized users

Accessibility & Mobility

Support increased accessibility & mobility options to move people and freight

Energy & Environment

Protect & enhance the environment, promote energy consumption, improve quality of life & promote consistency between transportation improvements and State & local planned growth and economic patterns

System Connectivity

Support the integration and connectivity of the transportation system, across and between modes, for people and freight

• System Management

Promote efficient system management and operation

System Preservation

Support preservation of the existing transportation system

• Improve Resiliency and Reliability

Reduce or mitigate stormwater impacts of surface transportation system

Enhance Travel and Tourism

Encourage travel for pleasure and recreation

## **Public Participation**

Starting on the next page is a list of public participation activities including interagency coordination for this TIP. The APO's TAC is involved in the TIP development and review process. The TAC provides a forum for the deliberation of regional transportation issues among state, regional, and local staff.

The APO's Policy Board has also instituted a public participation process for implementing agencies. To identify potential projects for which public participation is necessary, the project proposer answers the questions below about the project. A "yes" answer to any of the six questions means that a public information meeting is recommended prior to submittal for federal funding. This affords abutting property owners and other stakeholders the opportunity for specific involvement in the full scope of proposed improvements. After the meeting has been held, it is encouraged that a resolution be passed by the governing agency providing confirmation of the meeting. A "no" answer to all six questions means that no specific public involvement activities are needed for the project in the TIP process. It is also encouraged that a resolution be passed by the governing agency noting this finding.

- 1. Will the proposed construction project expand the number of through traffic lanes?
- 2. Could the proposed construction project involve the purchase of right-of-way?
- 3. Could the adjacent property owners be assessed for a portion of the proposed construction project costs?
- 4. Could the proposed construction project expand the roadway curb-to-curb width by more than six feet?
- 5. Could the proposed construction project result in new parking restrictions?
- 6. Are there other reasons why the project may be controversial?

In addition, the District 3 Area Transportation Partnership (ATP) has adopted policies relative to the project development process for TIP projects and the public involvement process. These policies are as follows:

1. The project development process shall be initiated as soon as possible after final State Transportation Improvement Program (STIP) approval.

# **Public Participation for TIP**

The following includes the FY 2020 and 2021 APO solicitation for STP funds that occurred in 2015 to 2016 and the FY 2020 TAP Solicitation that occurred in 2016.

- 11/02/15: Project solicitation packets e-mailed & mailed.
- 11/11/15: FY 2020-2021 project solicitation notice in St. Cloud Times.
- 1/05/16: FY 2020-2021 project applications due at APO office.
- 1/07/16: Preliminary review of FY 2020-2021 project applications at St. Cloud APO Technical Advisory Committee (TAC) Meeting.
- 1/14/2016: Preliminary review of FY 2020-2021 project application submittals by Central MN ATP 3.
- 1/14/16: Preliminary review of FY 2020-2021 project applications at St. Cloud APO Executive Board meeting.
- 2/04/16: APO Technical Advisory Committee (TAC) prioritizes FY 2020-2021 project applications and makes funding recommendation to APO Executive Board.
- 2/11/16: APO Executive Board discusses FY 2020-2021 project applications and TAC recommendation.
   Approves TAC recommendation to APO Policy Board.
- 2/25/16: APO Policy Board approves programming of FY 2020-2021 projects.
- 329/16: D3 Area Transportation Improvement Program (ATIP) Development Committee merges APO and regional priorities and develops draft D3 ATIP
- 4/07/16: Central Minnesota ATP reviews, modifies, and approves draft ATIP
- 5/05/16: Public Information & Review meeting notice for Draft FY 2017-2021 TIP published with St. Cloud Times
- 5/12/16: APO Policy Board approves Draft FY 2020-2021 TIP for 30-Day Public Comment Period
- 5/13/16: Notice of Draft FY 2017-2021 TIP on APO website sent to MnDOT, and St. Cloud Metro Bus for review and comment
- 6/09/16: Public Information & Review meeting
- 6/13/16: End of 30-day public comment period for Draft FY 2017-2021 TIP
- 7/14/16: APO Executive Board approves final FY 2017-2021 TIP Document for inclusion in the STIP
- 6/23/16: MnDOT D3 ATP Meeting to approve Statewide Transportation and Improvement Program (STIP).
- 07/27/17: Public Information & Review meeting notice for Draft FY 2018-2021 TIP Update published with St. Cloud Times
- 05/18/17: APO Policy Board approves Draft FY 2018-2021 TIP Update for 30-Day Public Comment Period

- 05/27/18: Notice of Draft FY 2018-2021 TIP Update on APO website sent to MnDOT, and St. Cloud Metro Bus for review and comment
- 08/09/17: Public Information & Review meeting
- 08/27/17: End of 30-day public comment period for Draft FY 2018-2021 TIP Update
- 09/14/17: APO Executive Board approves final FY 2018-2021 TIP Update Document for inclusion in the STIP
- 2. Local jurisdictions are encouraged to provide an annual update to their respective ATP subregions and District 3 State-Aid Engineer regarding the project development status of their programmed projects.
- 3. Cost and project delivery updates on programmed projects should be provided to the ATP sub-regions and District 3 State-Aid Engineer during the annual project solicitation period.
- 4. Project cost overruns will be managed by each ATP sub-region and subtracted from a sub-region's Federal funding target, if approved.

#### **Self-Certification**

The State and the APO must annually certify to FHWA and FTA that the planning process is addressing the major issues facing the area and is being conducted in accordance with all applicable requirements of:

- 1. 23 U.S.C. 134 and 49 U.S.C. 5303, and this subpart;
- 2. In non-attainment and maintenance areas, Sections 174 and 176 (c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
- 3. Title VI of the Civil Rights Act of 1964, as amended (42 USC 2000d-1) and 49 CFR part 21;
- 4. 49 USC 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- Sections 1101(b) of the FAST Act (Pub. L. 109-59) and 49 CFR Part 26 regarding the involvement of disadvantaged business enterprises in the US DOT funded projects;
- 6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;

- 7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR Parts 27, 37, and 38;
- 8. The Older Americans Act, as amended (42 U.S.C 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- 9. Section 324 of title 23, U.S.C regarding the prohibition of discrimination based on gender; and
- 10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR 27 regarding discrimination against individuals with disabilities.

The FHWA and FTA must jointly find that the TIP is based on a continuing, comprehensive transportation planning process carried out cooperatively by MnDOT, APO, and St. Cloud Metro Bus. This finding shall be based on the self-certification statement submitted by MnDOT and the APO. Joint certification action will remain in effect for three years unless a new certification determination is made sooner.

## **Performance Measures**

Titles 23 and 49 of United States Code require that planning agencies such as the APO utilize performance measures and monitoring to help inform the transportation investment decision-making process.

According to 23 CFR 450.326(d):

The TIP shall include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan, linking investment priorities to those performance targets.

Performance measures are designed to serve as a benchmark to evaluate and quantify progress. This performance-based approach is meant to improve accountability of Federal transportation investments, assess risks related to different performance levels, and increase transparency.

APO staff are currently in the process of updating the MTP through 2045. During this process, staff have been incorporating Federally mandated performance measures into the metropolitan transportation plan. In addition, APO staff have been working to develop a variety of other performance measures to assist in future planning and project implementation.

It is the goal that these performance measures incorporated into the MTP will help further align current and future TIP-programmed projects with the overall goals and objectives established in the MTP.

Based on the <u>Transportation Performance Management</u> (<u>TPM</u>) (www.fhwa.dot.gov/tpm/) assessment tool, the APO is currently working towards a maturity level 2, the developing phase. Work is underway to strengthen transportation performance management in the APO. A transportation performance management framework is being defined to provide alignment across the organization and across different planning and programming functions. Modifications to data collection and management processes and analysis tools are being planned in order to better support the performance framework. Organizational roles are being defined, and a strategy for training and workforce development in support of transportation performance management is being developed.

- Strategic Direction: The APO is developing a collaborative process to set goals and objectives, with linkages between agency functions and broader societal concerns still being clarified.
- 2. **Target Setting:** The APO is collaboratively developing a methodology to understand baselines and set targets within agreed-upon performance areas.
- 3. **Performance-Based Planning:** The APO is defining a data-driven process for understanding current and future performance to identify and develop strategies.
- 4. **Performance-Based Programming:** The APO is developing a performance-based programming methodology and process that will enable project selection to reflect agency goals, priorities determined in planning documents, funding constraints, risk factors, and relative needs across performance areas.
- 5. **Monitoring and Adjustment:** The APO is developing a plan for system and program/project monitoring tied to the strategic direction, including definition of output and outcome measures, frequency, data sources, external influencing factors and users.
- 6. **Reporting and Communication:** The APO is defining requirements for internal reports to ensure consistency, alignment with strategic direction, and provision of actionable information.

### **Anticipated Effect**

The following are a list of Federally mandated performance measures that have been incorporated into the FY 2019—2023 TIP. Methods of calculation for each of these performance measures are based on the guidelines outlined by the <a href="TPM">TPM assessment tool</a> (https://www.fhwa.dot.gov/tpm/rule.cfm).

## **Roadway Safety Performance Measures**

- 1. Number of Fatalities.
- 2. Rate of Fatalities.
- 3. Number of Serious Injuries.
- 4. Rate of Serious Injuries.
- 5. Number of Non-Motorized Fatalities and Serious Injuries.

## Roadway Accessibility, Mobility, and Connectivity Performance Measures

- 1. Annual Percent of Person-Miles Traveled on the Interstate that are Reliable.
- 2. Annual Percent of Person-Miles Traveled on the Non-Interstate NHS that are Reliable.
- 3. Annual Vehicle Miles Traveled.

# Transit Management and Preservation Performance Measures

1. State of Good Repair for Equipment, Facilities, and Rolling Stock.

### Roadway Metropolitan Vitality and Economic Development Performance Measures

1. Truck Travel Time Reliability Index.

### Roadway Management and Preservation Performance Measures

- 1. Interstate System Pavement Conditions.
- 2. Non-Interstate NHS Pavement Conditions.
- 3. Pavement Maintenance.
- 4. Bridge Conditions.

Federal regulations require the APO to either 1.) Support MnDOT's performance targets for each performance measure, or 2.) set its own regional target(s). The APO has decided to set its own targets for each of the performance measures.

Overall, the targets established by MnDOT have been determined to be of limited value to the APO, especially when compared with the existing conditions and priorities of the APO. Therefore, by adopting differing targets from the state, the APO can focus on localized issues within its region and target funding that will work toward the goals of the APO as established within the MTP.

A closer look and explanation of the APO's performance targets are listed below.

### **Roadway Safety**

All of the safety targets the APO has adopted are lower than MnDOT's targets.

For example, MnDOT has adopted a yearly target of 375 fatalities, while the APO selected a yearly target of 7.8 fatalities. The APO's regional 2017 baseline measurement for fatalities was 8.2. It is unclear what supporting MnDOT's target would mean in this context or how it would help the APO to target investment funding. By electing to pursue targets more relevant to the regional baseline, the APO can better evaluate the effectiveness of its roadway safety and more efficiently monitor changes in this and other roadway safety numbers.

Examples of programmed projects in the 2018-2021 TIP that will help achieve the APO's roadway targets include the following: the installation of a reduced conflict intersection at Benton CSAH 8, East of Saint Cloud (project number 0503-90); construction of Phase 3 of the Rocori Trail along rail road corridor from Cold Spring to Rockville (project number 073-090-011); and CSAH 75 and 33rd Street S in Saint Cloud intersection improvements (project number 073-675-039). These TIP projects are anticipated to positively impact target achievement by providing safety improvements for motorists, bicyclists, and pedestrians.

It is important to note that while the APO can promote a transportation system that is safe for all users through appropriate safety infrastructure to help prevent crashes, the APO cannot control driver behaviors that may lead to crashes. The APO and its member jurisdictions can only encourage, educate, and inform citizens of safe driving, walking, and bicycling habits and in an attempt to mitigate crashes.

# Roadway Accessibility, Mobility, and Connectivity

Percent of person-miles traveled on the Interstate and non-Interstate NHS that are reliable in the APO region is currently at 100 percent and 97 percent, respectively. MnDOT has set targets of Interstate reliability at 80 percent and non-Interstate NHS at 75 percent. The APO has reviewed past data trends and have determined the Interstate reliability should remain at 100 percent, therefore making supporting the MnDOT targets not as relevant to the APO's planning area.

The non-Interstate NHS reliability has seen a flux of reliability from 2013. The APO has a goal to increase system accessibility, mobility, and connectivity. Similar to person-miles traveled on the Interstate, the APO's baseline measurement exceeds the targets established by MnDOT. Choosing to support the state targets would not allow the APO to gauge an accurate representation of the area's needs due to the fact they are lower than the current existing conditions for the APO's planning area.

There are currently no programmed projects that will increase reliability, so that is why APO staff have set a lower target for non-Interstate NHS reliability.

MnDOT has set a target of Interstate pavement in poor condition at 2 percent while the APO has set a target of 1 percent. Based on the current condition of the Interstate pavement in poor condition being 0 percent within the APO region, APO staff felt that supporting the state's target of 2 percent would not be as meaningful to the region or decision-makers.

MnDOT has set a target of non-Interstate NHS pavement in poor condition at 4 percent while the APO has set a target of 1 percent. The APO's target was set based on the current condition of non-Interstate NHS pavement in poor condition being reported at 0.2 percent within the region. Again, based on current conditions within the APO being better than what was identified as an achievable target by MnDOT, the APO has opted to impose stricter requirements and goals that would more closely manage roadway condition with the region.

An example of programmed projects in the 2018-2021 TIP that will help achieve the APO's targets include the MN 15 from MN 55 in Kimball to 66th Avenue in Saint Augusta, full depth reclamation (project number 7303-50) This TIP project is anticipated to positively impact target achievement by elevating these sections of the NHS pavement from a fair to good pavement rating.

### **Transit Management and Preservation**

Staff at Saint Cloud MTC and the APO worked together to establish both transit asset management State of Good Repair targets and the transit economic requirements model (TERM) scale targets for facilities.

Examples of programmed projects in the 2018-2021 TIP that will help achieve the APO's targets include: the purchase of <30 FT. replacement CNG DAR buses (project number TRS-0048-20T); the purchase of STD 35 FT. replacement CNG fixed route buses (project number TRS-0048-20TA); the purchase of two (2) replacement operations vehicles (project number TRF-0048-21B); and facility improvements (project number TRS-0048-21TB).

These TIP projects are anticipated to positively impact target achievement by replacing fixed route and Dial-a-Ride buses past their state of good repair with new buses and maintaining and improving existing facilities.

## **Roadway Management and Preservation**

Similar to roadway safety, the APO has opted to set stricter performance targets for roadway management and preservation than MnDOT. It is the belief of APO staff that by tailoring targets specifically to the region, the APO is better equipped to track, monitor, and potentially address changes – both positive and negative – in a more effective and efficient manner.

MnDOT has set a target of Interstate pavement in good condition at 55 percent while the APO has set a target of 85 percent. The APO's target is based on the current condition of the Interstate pavement in good condition sitting at 90.3 percent within the APO planning area.

MnDOT has set a target of non-Interstate NHS pavement in good condition at 50 percent while the APO has set a target of 60 percent. The APO's target is based on the current condition of non-Interstate NHS pavement in good condition sitting at 59 percent within the APO planning area.

The APO's currently has 64.2 percent of bridges classified in good condition with a target of 60 percent. MnDOT has a goal of 50 percent. The APO estimates our bridge conditions being relatively unchanged in the next four (4) years. The APO has set a target of 1 percent of our NHS bridges in poor condition compared to MnDOT's target of 4 percent.

The MTP states the APO will prioritize the maintenance and preservation of the existing transportation network. There are no current programmed projects in the TIP that will enhance bridge condition. This is why the APO has set targets slightly lower than existing conditions and are committed to keep our infrastructure in a state of good repair.

#### **MPO Investment Priorities**

Performance-based programming uses strategies and priorities to guide the allocation of resources to projects that are selected to achieve goals, objectives, and targets. Performance-based programming establishes clear linkages between investments made and expected performance outputs and outcomes.

The responsibility of reporting, gathering, and evaluating existing conditions of the roadway network falls under the purview of the APO's planning technician.

While the APO's project selection process and investment strategy – as identified in Chapter 1 of this document – is anticipated to remain the same, APO staff will conduct studies and use the tools necessary to project future transportation needs and investment priorities through the following techniques:

- The travel demand model will be updated and used to identify current or future deficiencies of the Federal-aid system of roadways throughout the urbanized area.
  - The model is a key component of increasing accessibility and mobility options for people and freight while exploring congestion mitigation measures.
- There will be a Saint Cloud CSAH 75 corridor study to consider design concepts and layouts to meet future travel demands.
- A pavement condition database update has been proposed which will assess the pavement conditions. Cost projections for system preservation maintenance has also been included.

The APO has also adopted additional performance measures which will help investment priorities such as crashes involving chemical impairment and distracted driving, volume/capacity ratios, and return on investment strategies to name a few.

Future TIP projects – both currently within this document and future subsequent TIP documents – and potential financial implications have been considered by APO staff when establishing performance targets for the region.

An example of this are three (3) programmed projects to be completed on MN 15, MN 23, and CSAH 75. These projects – comprising approximately 36.7 lane miles – involve pavement preservation treatments, which when factored together will improve fair pavement condition in the area to good. Accordingly, this will result in NHS pavement condition in the area to be at approximately 72 percent by 2021. Even with the added increase in pavement quality conditions – up 13 percent – APO staff understand that normal degradation of pavement within other areas of the planning area can and more likely will bring down the overall average.

It is anticipated that there will be enough available revenue to ensure performance targets within the APO's planning area will be met. As finalized performance targets become available for additional performance measures, anticipated programmed TIP projects will have to demonstrate how they will contribute to achieving those predetermined targets. APO staff plans to examine any additional performance targets that are set by MnDOT and evaluate the effectiveness of adopting those targets for the region or if developing its own targets would be more effective.

# **Funding Expenditures**

Investment target percentages are identified in the 2040 Long Range Transportation Plan in order to guide project identification. For example, the amount identified for the Road and Bridge Expansion category is used as a funding limit for the fiscally constrained project list in the 2040 Plan. Investment categories have historically included Road and Bridge Expansion, Road and Bridge Preservation, and Multi-modal. The 2035 Plan targets were 50 percent for Road and Bridge Expansion, 40 percent for Road and Bridge Preservation and Safety, and 10 percent for Multi-modal. The funding target percentages apply only to the federal formula funding received by the APO.

The 2040 Plan outlines investment target percentages of 35% for Road and Bridge Expansion and 65% for Road and Bridge Preservation. Multi-modal is no longer included as a specific investment category due to the development of TAP and multi-modal accommodations being incorporated as part of Road and Bridge Expansion and Preservation projects. Transit projects are eligible under the Preservation category. Discussion from the planning process centered on the need for large Preservation reconstruction projects throughout the region and balancing this need with the federal funding assistance the Expansion category funding provides to important regional projects.

These targets do not need to be met as part of a single solicitation (FY 2020 and 2021) but be implemented over all solicitations until the approval of the next long range plan.

With the FY 2020 and 2021 solicitation only preservation projects were determined to be eligible for funding and were eventually selected. Based solely on this solicitation the APO has funded 100% pavement preservation projects.

# 3 Program Process

MnDOT has established eight (8) Area Transportation Partnerships (ATPs) throughout the State to manage the programming of federal transportation projects. Each of these ATPs is responsible for developing a financially constrained Area Transportation Improvement Program (ATIP) that is submitted for funding approval and incorporation into a financially constrained State Transportation Improvement Program (STIP). As the designated Metropolitan Planning Organization (MPO) for the St. Cloud Area, the APO must develop its own Transportation Improvement Program (TIP) that is incorporated into the Central Minnesota ATIP and the STIP.

Projects originate from three main areas: 1) TSM, 2) current (valid) Transportation Plan, and 3) implementing agencies who submit projects. All projects identified and programmed in the TIP must be consistent with the current APO Transportation Plan. Submitting agencies are instructed to apply inflation adjustments of 4-5% per year to project cost submittals to calculate year of construction cost estimate. These projects are then presented to the APO Policy Board and the public for initial review and comment. Projects not meeting the minimum qualifying criteria are eliminated from consideration (i.e. projects not consistent with the APO Transportation Plan). The remaining projects are grouped into three categories, road and bridge expansion, roadway safety and preservation, and transit.

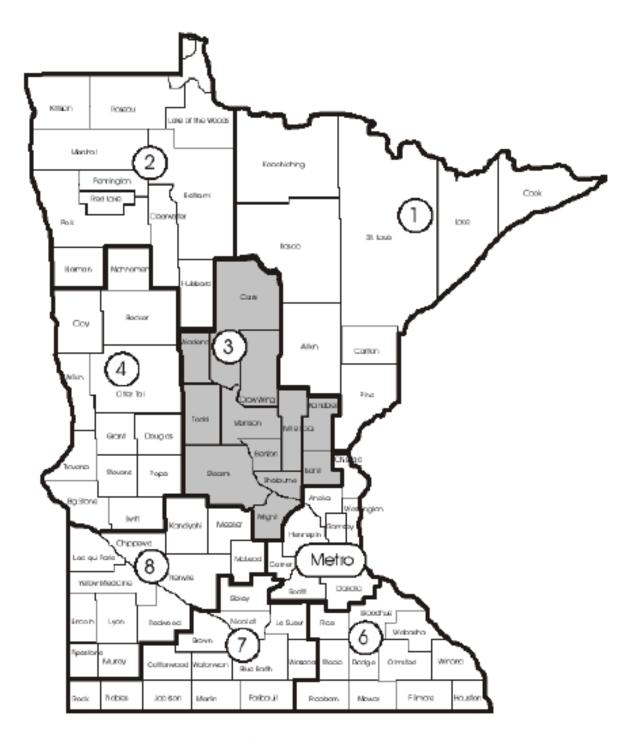

Projects meeting the minimum qualifying criteria are then prioritized by the APO Technical Advisory Committee (TAC) into one intermodal project list. Prioritization considerations include the following: 1) technical engineering criteria developed by the ATP; 2) APO non-technical considerations including public involvement, project deliverability, regional benefit,

funding equity and non-vehicular accommodations; 3) miscellaneous factors and 4) APO sub-targeted local federal funding availability. This prioritized list, of transportation projects, is then forwarded to the APO's Executive Board and APO Policy Board for approval or modification. Appendix C outlines the process and criteria for prioritizing APO TIP projects in greater detail.

In the Summer 2015, the APO was informed beginning in fiscal year 2019 all future transit bus purchases for Small Urban Transit Systems, such as Metro Bus, would be federally funded centrally by MnDOT's Office of Transit with consultation of the APO. The ATP and APO could choose to continue to fund bus purchases with local STP funds but MnDOT's Office of Transit would not reimburse the ATP or APO.

Projects identified within the APO's local federal subtarget, as well as State and other regionally significant projects, are incorporated in the APO TIP. Projects in the TIP are subject to U.S. Department of Transportation approval of the STIP. Appendix D illustrates details of the entire Central Minnesota ATP process.

Projects programmed from the Central Minnesota ATP process are identified under Chapter 6: 2017-2021 TIP Project Lists & Map. Chapter 5: Previous TIP Project Updates has been included as a management tool for monitoring the progress of programmed projects and contains a status report of projects from the previous 2016-2019 TIP.

Mn/DOT Area Transportation Partnerships (ATPs)

# 4 Previous TIP Project Update

The Central Minnesota Area Transportation Partnership (ATP) requires the St. Cloud Area Planning Organization (APO) to submit annual updates for projects programmed in the TIP. The annual project updates allow the District (3) State-Aid Engineer to assess project costs and project development status for federally funded projects. The project updates also allow the APO Technical Advisory Committee (TAC) to meet and discuss at the beginning of every year, the status of currently programmed federal projects within the APO Area.

These status reports (i.e. project updates) are intended to encourage early initiation of project development work, so unforeseen issues can be addressed without delaying project implementation. If unavoidable delays occur, project status reports provide a mechanism for the implementing agency to communicate project issues and associated delays directly to the APO, MnDOT, and any potentially affected local units of government.

The following pages include a 2017-2020 TIP project status table for federally programmed projects. This table lists projects as seen in the previous TIP that are still included in the current TIP and details project changes within the table. A 2017 Federally Obligated Project Summary is also included. This table indicates which projects received funding and how much funding each project received.

# 5 FY 2018-2021 TIP Project List and Map

This section includes the programmed projects for FY 2018-2021 in the St. Cloud Metropolitan Planning Area. The project table is organized by project year. Submitting agencies are instructed to apply inflation adjustments of 4-5% per year to project cost submittals to calculate the year of construction cost estimate, which appears in the table. New projects are included in the full table and also listed separately in an additional table. The map at the end of this section shows project locations and visually differentiates new project locations.

# 6 Financial Capacity Analysis

# General Legislative & Policy Background

The most recent surface transportation bill, FAST Act, and the Clean Air Act Amendments of 1990 (CAAA) have prescribed the following financial planning requirements for Metropolitan Planning Organizations (MPOs), state Departments of Transportation (DOTs), and public transit agencies.

- At the state level, FAST Act requires a Long Range Statewide Transportation Plan. FAST Act also requires at least a 4-year State Transportation Improvement Program (STIP). The STIP is to be financially constrained.
- At the metropolitan level, MPOs and transit operators are required to prepare a financial plan as part of the Long Range Plan and the Transportation Improvement Program (TIP).
- The financial plans must demonstrate how the Long Range Plan and TIP can be implemented, indicate public and private resources that are reasonably expected to be available (new funding sources such as tolls and congestion pricing, strategies to ensure funding availability must be identified), and recommend innovative financing techniques to finance projects and programs.
- ➤ Fiscal constraint is required by the federal metropolitan planning requirements specifically identified in 23 CFR 450.324(g)(11)(vii) and 23 CFR 450.326(k)
- ➤ In addition to federal metropolitan planning requirements (see above bullet), air quality regulations state metropolitan transportation plans and TIPs must be fiscally constrained consistent with DOT's metropolitan planning regulations in order to be found in conformity.

# FAST Act & CAAA TIP Financial Requirements

> Be financially constrained by year and include a

- financial plan that demonstrates through current and projected revenue streams, how implementing agencies requesting federal funds can provide the required local match, while adequately operating and maintaining their existing transportation system;
- ➤ Include only projects for which construction and operating funds are reasonably expected to be available. In the case of new funding sources, strategies for ensuring their availability shall be identified;
- ➤ The MPO must consider all projects and strategies funded under title 23 U.S.C. and the Federal Transit Act, other federal funds, local sources, state assistance, and private participation. The amount of funding assumed for future years from federal sources should not exceed currently authorized amounts;
- ➤ Show the amount of federal funds proposed to be obligated in each program year, the proposed sources of federal and non-federal funds, and the estimated cost for each project; and

Meet all criteria in the Metropolitan and Statewide Planning Regulations.

# Three (3) activities needed to be addressed in the TIP when preparing the Financial Analysis

- Current financial condition Looks at overall financial health of agency or jurisdiction
- Future financial condition Looks at an estimation of expense and revenue streams, while addressing future flows
- Financial capability finding looks at agency or jurisdiction ability to provide designated local match for federally funded projects while adequately maintaining & operating their existing transportation system.

### **Financial Analysis Preparation**

To illustrate the current financial condition of each of the APO member jurisdictions requesting Federal funds, local transportation dollars expended on maintenance and operation of the existing system and on expansion of the existing system are summarized from 1990 to 2016.

Summarized local maintenance and operation expenditures include traditional low-cost activities such as snow plowing, ditch mowing, pothole filling (see Appendix E), and non-traditional construction-oriented maintenance and operation activities, as defined by the investment definitions of preservation, management and operations, and replacement (see below).

To determine future financial condition, local transportation revenue available, local tax levies, special assessments, state, state-aid, bonding and any other miscellaneous local revenue streams were projected by each jurisdiction for the TIP program period. Projections include dollars to be spent on maintenance and operation and expansion of the system.

To determine if projected local funds are adequate to provide the necessary local match for Federal funds, without compromising maintenance and operation of the system, each jurisdiction's required local match must be estimated. A summary of federal funds and corresponding local match requirements are estimated for all projects, and all programmed federal projects are identified as either maintenance or expansion projects using the following investment category definitions.

# Expansion & Maintenance Investment Category Definitions

- ➤ Preservation: To maintain existing systems at a minimum level that will provide for the safe movement of people and freight. Focus is on activities that retain or restore the existing condition without necessarily extending the service life or increasing capacity. Preservation includes traditional program categories of road repair, resurfacing, reconditioning and bridge repair.
- ➤ Management and Operation: To safely and efficiently manage and operate existing systems,

effectively addressing critical safety and operations problems through minor and moderate cost improvements. Management and operations includes traditional program categories of cooperative agreements, enhancement, junkyard screening, planning, rest area beautification, safety capacity, safety high hazard, safety rail, and traffic management.

- ➤ Replacement: To enhance economic development by replacing eligible system pieces or elements; reduce barriers such as weight restrictions, bottlenecks and system disruptions. Replacement includes traditional program categories of bridge replacement and reconstruction. This category addresses system deficiencies and facilities that are identified as "end of useful life".
- ➤ Expansion: To attain a competitive advantage for the State by adding roadway capacity through construction of a new alignment roadway or adding additional travel lanes to an existing roadway. This category improves the safety and mobility of the transportation system.

The reason for preparing the financial capability finding is to determine if a jurisdiction that is programmed to receive federal funds can provide the local match requirement without compromising maintenance and operation of the existing system.

Local match amounts allocated to federal "Preservation", "Management and Operations" or "Replacement" projects are assumed to enhance maintenance and operation of the existing system. Local match amounts allocated to "Expansion" projects should not adversely impact a jurisdiction's historic local maintenance operation investment for a jurisdiction to be found in financial conformance.

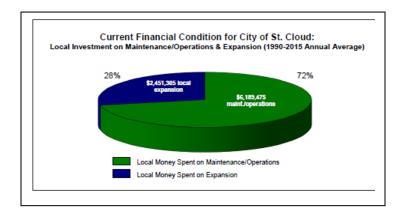

#### **Financial Capability Finding**

The pages that follow summarize the existing and forecasted financial condition of implementing agencies and the ability to provide adequate local funding to match federal dollars programmed in the 2017-2021 TIP.

The first (pie) chart illustrates historically how local transportation dollars have been spent on maintenance and operations and expansion projects. The second (bar) chart shows total projected local investments for maintenance and operations and expansion projects during the 2017-2021 TIP timeframe.

The final (bar) chart represents local money available, less the historical average spent on maintenance and operations, to match federal funds programmed in the 2017-2021 TIP.

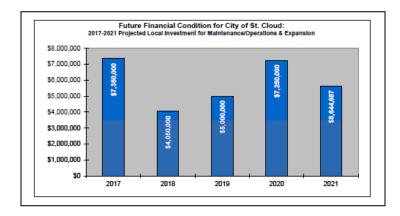

A brief financial capability summary narrative (i.e. finding) is included for each implementing agency. Detailed financial data used for the charts in this analysis is located in Appendix F.

### **City of Saint Cloud**

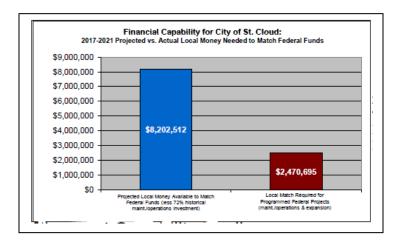

#### **Current Financial Condition:**

Local Investment on Maintenance/ Operations and Expansion (1990-2016) Annual Average

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Maintenance/ Operations & Expansion

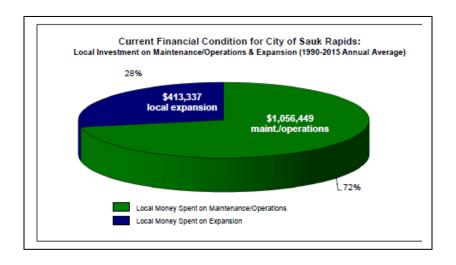

### Financial Capability:

2017-2021 Projected Local Money (minus 72% for maintenance/ operations) vs. Actual Local Money Needed to Match Federal Funds Programmed in the 2017-2021 TIP

# Financial Capability Finding:

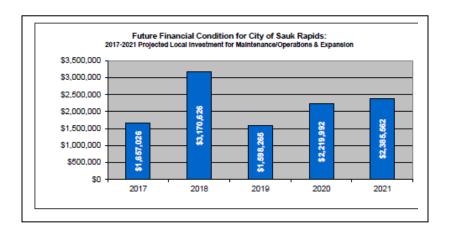

Based on historic overall local funding and maintenance investment levels, approximately \$8,202,512 will be available to match federal funds from FY 2017 to 2021 without compromising maintenance of the existing system. This figure compares to a total local match of \$2,470,695 for City of St. Cloud projects programmed in the FY 2017-2021 TIP. Accordingly, the City of St. Cloud will be able to provide this local match without compromising maintenance and operation of their existing system.

# **City of Sauk Rapids**

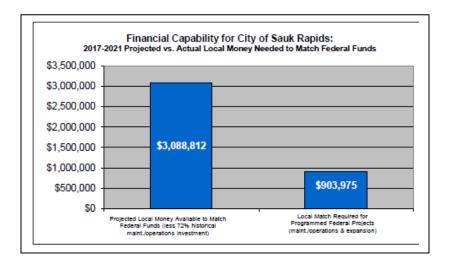

# Current Financial Condition:

Local Investment on Maintenance/ Operations and Expansion (1990-2015) Annual Average

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Maintenance/ Operations & Expansion

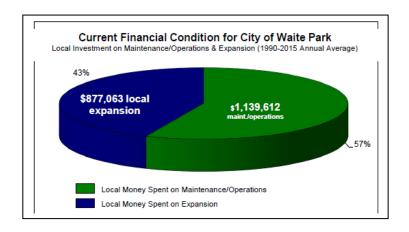

### Financial Capability:

2017-2021 Projected Local Money (minus 72% for maintenance/ operations) vs. Actual Local Money Needed to Match Federal Funds Programmed in the 2017-2021 TIP

## Financial Capability Finding:

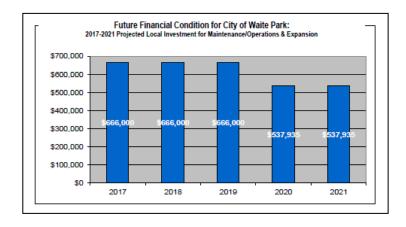

Based on historic funding and maintenance investment levels, approximately \$3,088,812 will be available to match federal funds from FY 2017 to 2021. This figure compares to a total local match of \$903,975 for City of Sauk Rapids projects programmed in the FY 2017-2021 TIP.

# **City of Waite Park**

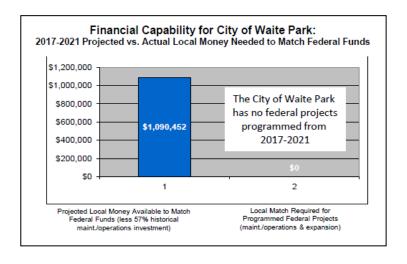

#### **Current Financial Condition:**

Local Investment on Maintenance/ Operations and Expansion (1990-2015) Annual Average

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Maintenance/ Operations & Expansion.

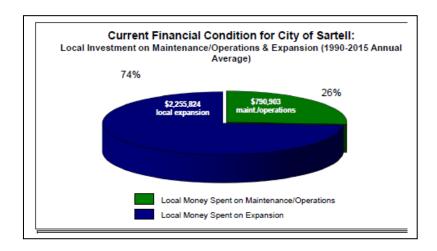

# Financial Capability:

2017-2021 Projected Local Money (minus 54% for maintenance/ operations) vs. Actual Local Money Needed to Match Federal Funds Programmed in the 2017-2021 TIP.

# Financial Capability Finding:

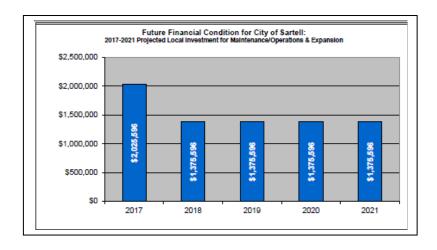

Based on historic overall local funding and maintenance investment levels, approximately \$1.1 million will be available to match federal funds from 2017 to 2021 without compromising maintenance of the existing system. However, the City of Waite Park has no projects requiring local match in the 2017-2021 TIP.

### **City of Sartell**

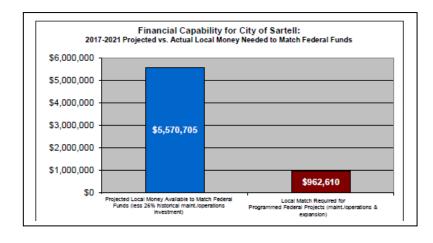

#### **Current Financial Condition:**

Local Investment on Maintenance/ Operations and Expansion (1990-2015) Annual Average

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Maintenance/ Operations & Expansion

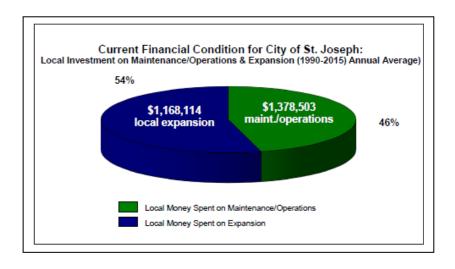

### Financial Capability:

2017-2021 Projected Local Money (minus 26% for maintenance/ operations) vs. Actual Local Money Needed to Match Federal Funds Programmed in the 2017-2021 TIP

### Financial Capability Finding:

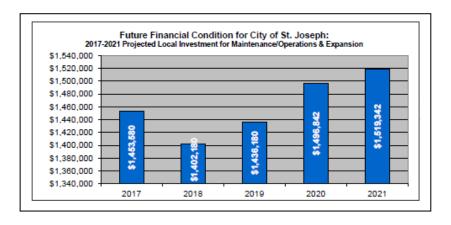

Based on historic funding and maintenance investment levels, approximately \$5,570,705 will be available to match federal funds from FY 2017 to 2021. This figure compares to a total local match of \$962,610 for City of Sartell projects programmed in the FY 2017-2021 TIP. Accordingly, the City will be able to provide this local match without compromising maintenance and operation of their existing system.

### **City of Saint Joseph**

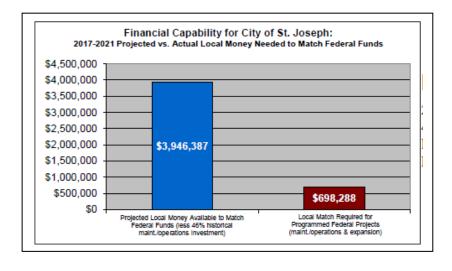

# Current Financial Condition:

Local Investment on Maintenance/ Operations and Expansion (1990-2015) Annual Average

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Maintenance/ Operations & Expansion

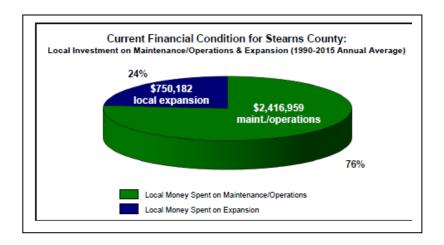

### Financial Capability:

2017-2021 Projected Local Money (minus 46% for maintenance/ operations) vs. Actual Local Money Needed to Match Federal Funds Programmed in the 2017-2021 TIP

### Financial Capability Finding:

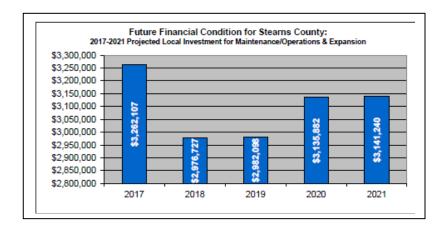

Based on historic funding and maintenance investment levels, approximately \$4 million will be available to match federal funds from FY 2017 to 2021. This amount is greater than the \$698,288 local match required for federal projects in the FY 2017-2021 TIP. Accordingly, the City of St. Joseph will be able to provide this local match without compromising maintenance/operation of their existing system.

### **Stearns County**

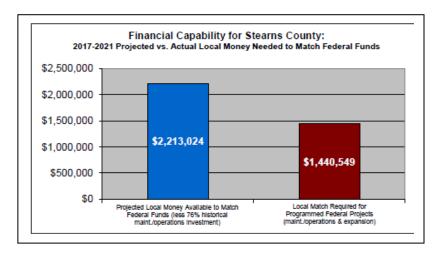

#### **Current Financial Condition:**

Local Investment on Maintenance/ Operations and Expansion (1990-2015) Annual Average

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Maintenance/ Operations & Expansion

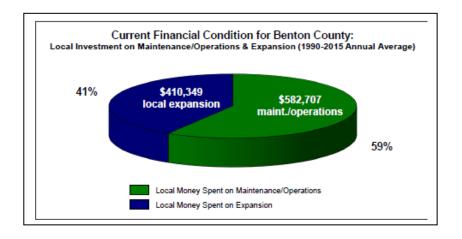

### Financial Capability:

2017-2021 Projected Local Money (minus 76% for maintenance/ operations) vs. Actual Local Money Needed to Match Federal Funds
Programmed in the 2017-2021 TIP

# Financial Capability Finding:

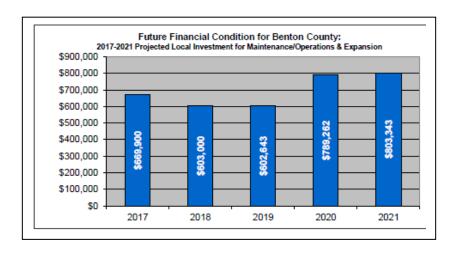

Based on historic funding and maintenance investment levels, approximately \$2.2 million will be available to match federal funds from FY 2017 to 2021. This amount is greater than the \$1,440,549 local match required for federal projects. Additionally, all federal projects being matched are maintenance/operation projects that will improve overall maintenance/operation of the existing system. Accordingly, Stearns County will be able to provide this local match without compromising maintenance/operation of their existing system.

### **Benton County**

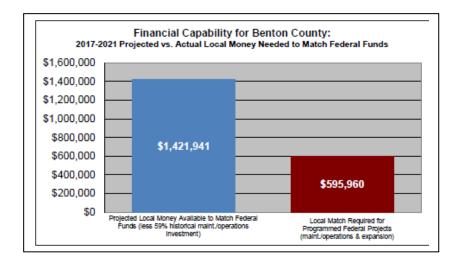

### **Current Financial Condition:**

Local Investment on Maintenance/ Operations and Expansion (1990-2015) Annual Average This is the historical total for 12% of the County's expenditures. This is based on the percentage of County lane miles in the APO Planning Area.

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Maintenance/ Operations & Expansion. This is the total for 12% of the County. This is based on the percentage of County lane miles in the APO Planning Area.

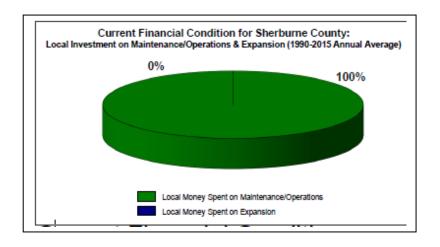

### Financial Capability:

2017-2021 Projected Local Money (minus 59% for maintenance/ operations) vs. Actual Local Money Needed to Match Federal Funds Programmed in the 2017-2021 TIP

# Financial Capability Finding:

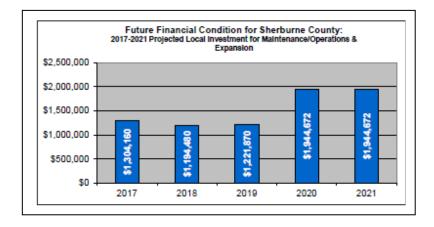

Based on historic funding and maintenance investment levels, approximately \$1.4 million will be available to match federal funds from FY 2017 to 2021. This amount is greater than the \$595,960 local match required for federal projects. Additionally, all federal projects being matched are maintenance/operation projects that will improve overall maintenance/operation of the existing system. Accordingly, Benton County will be able to provide this local match without compromising maintenance/operation of their existing system.

### **Sherburne County**

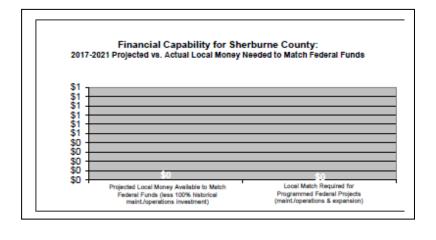

#### **Current Financial Condition:**

Local Investment on Maintenance/ Operations and Expansion (1990-2015) Annual Average

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Maintenance/ Operations & Expansion

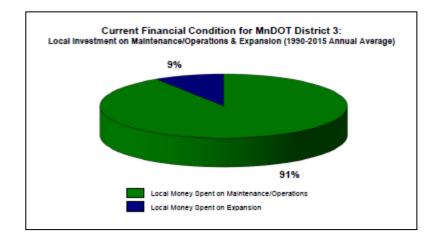

### Financial Capability:

2017-2021 Projected Local Money (minus 100% for maintenance/ operations) vs. Actual Local Money Needed to Match Federal Funds Programmed in the 2017-2021 TIP

### Financial Capability Finding:

Based on historic funding and maintenance investment levels (for Haven Township), \$0 are available to match federal funds from 2017 to 2021 without compromising maintenance and operation of the existing system. However, Sherburne County has no projects requiring local match in the 2017-2021 TIP.

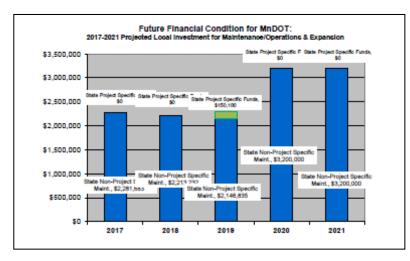

In addition, Sherburne County does not have an extensive history of expansion projects (in Haven Township), which dilutes the percentage of funds typically used on these types of projects (see Appendix Page F). Due to this historical analysis, the average per year local maintenance cost amount was used to project the future local maintenance and operation cost estimates. This process is an estimate to illustrate local funding projections versus local spending on maintenance and operation expenses. Without previous expansion projects to project an historical average, the projected amount was zero.

### **MnDOT District 3**

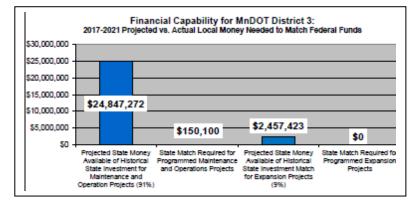

### **Current Financial Condition:**

Local Investment on Maintenance/ Operations and Expansion (1990-2015) Annual Average

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Maintenance/ Operations & Expansion

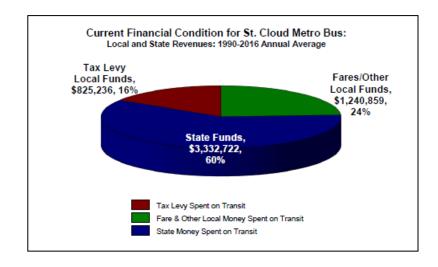

# Financial Capability:

2017-2021 Projected Local Money (minus 90% for maintenance/ operations) vs. Actual Local Money Needed to Match Federal Funds Programmed in the 2017-2021 TIP. One-time projects are included in the State Match Requirement. All of the projects requiring match are maintenance projects. See Appendix for more information.

# Financial Capability Finding:

Based on historic funding and maintenance investment levels, approximately \$2.4 million will be available to match federal funds for preservation projects from 2017 to 2020. There are no expansion projects programmed requiring State matching funds. All programmed projects are maintenance, safety or operations related projects that will improve maintenance and operation of the existing system. The projected State funding available for maintenance and operations projects is about \$24.8 million. The programmed projects require a State amount of \$150,100. Thus, MnDOT District 3 will be able to provide the local match without compromising the maintenance and operation of the existing system.

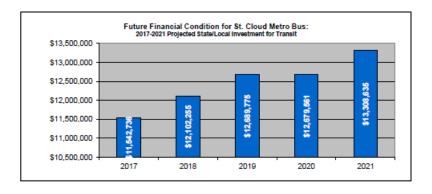

The MnDOT District 3 project programming method focuses on risk management of the system. The program is dynamic and responds to needs throughout the District. Following the risk management model, one-time projects are often included in the APO area. Some years there are more projects within the APO than others. This is why a historical average is used when looking at the overall amount of funding available to MnDOT District 3. See Appendix for further detail.

#### **Saint Cloud Metro Bus**

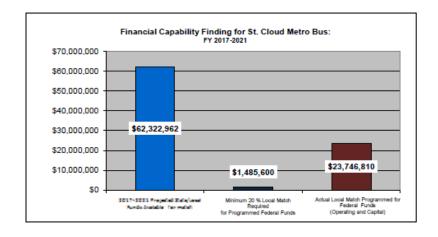

#### **Current Financial Condition:**

Local Transit Investment 1990-2016 Annual Average

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Transit

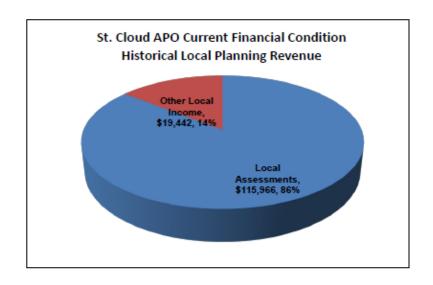

# Financial Capability:

2017-2021 Projected Local Money vs. Actual Local Money Needed to Match Federal Transit Funds Programmed in the TIP

# Financial Capability Finding:

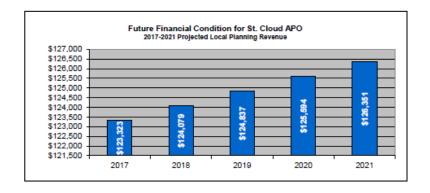

St. Cloud Metro Bus has \$10,728,00 in federal funds programmed in the FY 2017-2021 TIP that will require a minimum (20%) match of \$2,088,320. Metro Bus will be able to provide their required local match for federal funds programmed. Metro Bus has \$30,951,100 of local and state match programmed to match federal funds in the FY 2017-2021 TIP, with a projected capacity of \$62 million. Metro Bus funding projection is sufficient to provide the programmed amount. Projects without federal funds, such as Dial-A-Ride services were not included in the TIP or in this financial analysis. Additional projects receiving federal funds will be added via TIP amendments. See Appendix for project level details.

### Saint Cloud APO

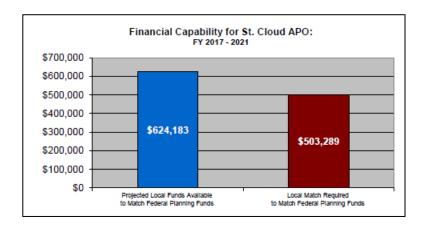

#### **Current Financial Condition:**

Local Investment for Planning (1990-2015 Annual Average)

# Future Financial Condition (FFC):

2017-2021 Projected Local Investment for Planning

### Financial Capability:

2017-2021 Projected Local Money vs. Actual Local Money Needed to Match Federal Planning Funds from 2017-2021

### Financial Capability Finding:

The APO is anticipating approximately \$2.5 million of federal planning funds from FY 2017 to 2021. These federal funds will require a total local match of \$503,289. When comparing this amount to projected local planning revenue, it is slightly under the amount required to match the maximum federal funds with local funds. However, if the maximum amount of federal funds are programmed for local planning studies, APO will require the local agency to provide a 20% match. This will increase the local income to match the federal funding. None of the 2017-2021 studies are currently programmed. In addition, APO receives \$62,815 per year in State funding assist in providing the local match.

# 7 Environmental Justice Analysis

# **Background**

In 1994, President Clinton signed Executive Order 12898: "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations." The Executive Order required that each Federal agency, to the greatest extent allowed by law, administer and implement its programs, policies, and activities that affect human health or the environment so as to identify and avoid "disproportionately high and adverse" effects on minority and low-income populations.

In order to clarify and expand upon Executive Order 12898 for purposes of federally funded transportation activities, the United States Department of Transportation (USDOT) issued an Order to Address Environmental Justice in Minority Populations and Low-Income Populations. The USDOT addressed persons belonging to any of the following groups: Black, Hispanic, Asian American, American Indian and Alaskan Native, Native Hawaiian or other Pacific Islander, and Low-Income.

According to the USDOT, there are three core principles of Environmental Justice:

To avoid, minimize, or mitigate disproportionately high and adverse human health or environmental effects, including social and economic effects, on minority populations and low-income populations.

To ensure the full and fair participation by all potentially affected communities in the transportation decision-making process, and

To prevent the denial of, reduction in or significant delay in the receipt of benefits by minority populations and low-income populations.

As the primary forum for the cooperative development of regional transportation plans, Metropolitan Planning Organizations (MPO) are required to be in compliance with Title VI and incorporate EJ concerns.

MPO responsibilities include:

Identify low-income and minority populations so needs can be identified and addressed, and the benefits as well as the burdens of transportation investments can be fairly distributed throughout the planning area.

Enhance existing analyses processes to ensure that the Long Range Plan and TIP comply with Title VI requirements.

Evaluate the existing public involvement processes and improve if necessary to include minority and low-income populations in the decision making process.

The methodology utilized to meet these responsibilities and requirements entailed mapping census block group areas where low-income (poverty) and minority population concentrations exceeded the population averages for the APO planning area. The 2017-2020 TIP projects were overlaid on the population map and the potential impacts were visually analyzed. This chapter explains how the guidance of the USDOT 1997 Final Order (revised in 2012) was followed.

# Methodology

In order to identify concentrations of low-income and minority populations, data on race/ethnicity, median household income, and poverty were examined for census block groups within the study area. This 2010 data was compared with data on race/ethnicity, median household income, and poverty for the entire study area. For purposes of this analysis, the study area was defined as the aggregate of the census blocks identified within or partially within the study area. Following the USDOT 2000 clarifications, minority and low-income populations were assessed separately.

The first step to determine areas of potential impact involved creating thresholds equal to the percentages of each variable for the whole planning area. The planning area is equal to the sum of the block groups identified within, or partially within the study area.

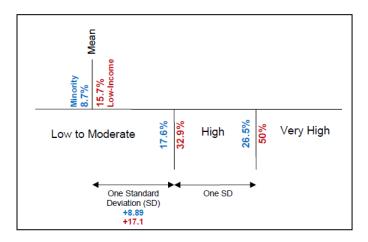

The thresholds would then equal the total number exhibiting the characteristic of concern divided by the total.

Population within or partially within the planning area who are a race/ ethnicity other than "white non- Hispanic" (11,329) divided by the total population of the planning area (130,225) equals 8.7 percent.

Population within the planning area living below poverty (20,450) divided by the total population (130,225) equals 15.7 percent.

The next and final steps involved in creating categories for very high impact, high impact, and low to moderate impact. The process included:

1. Calculating the standard deviation for each variable to create a low to moderate category equal to one

deviations from the means for minority (values to the left of bars) and low-income (values to the right of bars) populations are:

- 2. Querying for census block groups that experienced percentages less than or equal to the upper bound of the moderate range (17.6 percent for minority and 32.9 percent for low-income) and categorized them as low to moderate impact.
- 3. Repeat Step 2 for high and very high impacts regarding minority and low-income populations.
- 4. Created maps illustrating very high minority and low-income population areas. Overlaid the map with 2011-2020 TIP projects.

| identifi | identification of Minority & Low Income Populations: |  |                       |  |  |  |  |  |  |  |  |  |
|----------|--|--|-----------------------|--|--|--|--|--|--|--|--|--|
|          | Very Low to<br>Moderate                              | High                                       | Very High             |  |  |  |  |  |  |  |  |  |
| Minorit  | Less than or equal to                                | equal to 26.5%                             | Greater than<br>26.5% |  |  |  |  |  |  |  |  |  |
| Low-     | Less than or equal to                                | Greater than 32.9%<br>and less or equal to | Greater than 50%      |  |  |  |  |  |  |  |  |  |

50%

The following pages include project maps illustrating the process.

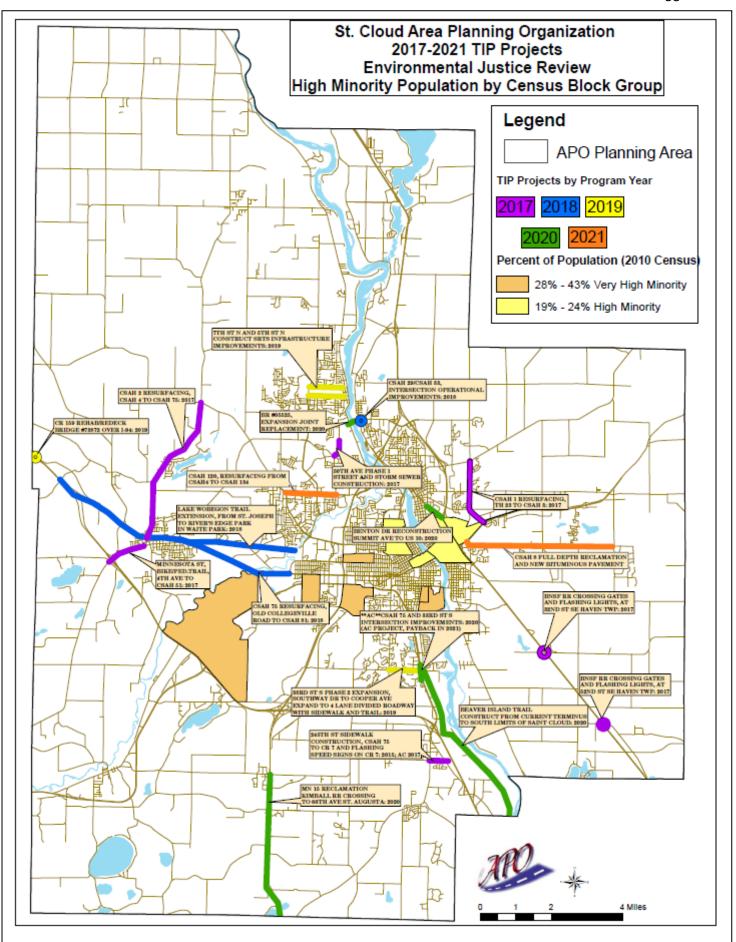

# **Environmental Justice Analysis**

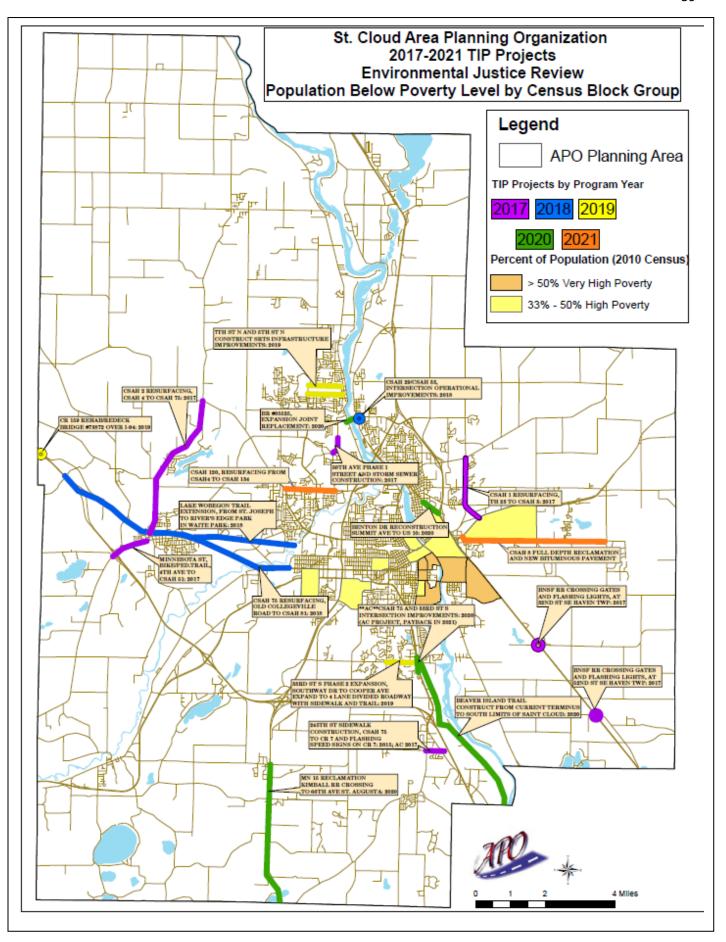

32.9%

Income

A project was defined as having the potential to have an adverse effect on the environmental justice of an area if any portion of a project intersected with the defined boundaries of a Census block group with a high percentage of minority population or a block group with a high percentage of population below poverty level. Four (4) projects numbers representing four projects intersect with block groups with a high percentage of minority population, and three (3) project number intersects with a block group with a high percentage of population below poverty level. The projects identified in the table on the following page include three resurfacing projects. Overall, projects in Environmental Justice areas focus on preservation of the roadway system. These projects are not expected to have adverse impacts on the block group population areas identified. Projects in the TIP using federal funding with an adverse impact on an Environmental Justice area will need to identify and mitigate any adverse impacts from these projects. Mitigation of impacts will take place through the project development and implementation phases of the projects. During the construction phase, adverse impacts may occur due to delays, detours, noise, or dust. Once complete, however, projects in the TIP result in positive benefits such as increased capacity, lower commute times, increased safety, and the addition of bicycle and pedestrian facilities to neighborhoods.

| Route<br>System | Project#    | Fiscal Year | Agency            | Project Description   | City        | County<br>Name | Program | Project Total | High % of Minority Population Affected | High % of Poplation<br>Below Poverty Leve<br>Affected |

# 8 Metropolitan Transit Overview

Projects programmed in the TIP are identified in the Metropolitan Transit Commission (Metro Bus) Long Range Transit Plan, updated in 2010, in conjunction with the APO's 2035 St. Cloud Metropolitan Area Transportation Plan along with the annual Capital Improvement Program (CIP). The updated plan reflects programmed transit service and capital improvements with associated revenue and expense projections through the year 2035.

# **Facilities and Equipment**

Metro Bus identifies facility and equipment replacement needs and will be continuing to upgrade office computers and replacing maintenance tools and equipment for increasing productivity and keeping up with changes in technology. Metro Bus utilizes FTA Section 5339, 5307, STP, MnDOT and local capital funding programs for its capital program. Replacement of 23 fixed route buses was completed in 2014 with purchase of Compressed Natural Gas (CNG) fueled buses. All of the buses were manufactured by New Flyer located in St. Cloud. Metro Bus received a US DOT Clean Fuels grant in 2012 to construct a CNG fueling station and storage facility renovations for monitoring and safety improvements. Projected replacement of Dial-a-Ride buses will be completed periodically as programmed and will also be CNG fueled.

Metro Bus completed a remodeling construction project in 2014 of the downtown Mobility Training Center that houses the Community Outreach, Travel Training and employee training programs with the aid of STP funds authorized through MnDOT Office of Transit. As of June 2015, the Center has hosted nearly 900 visitors and conducted over 4,300 travel training

# What Facilities & Equipment Needs has Metro Bus Identified for Replacement?

Expansion of Fixed Route transit routes Growth in ADA Dial-a-Ride services Vehicle storage facility expansion and roof replacement

Replacement of Dial-a-Ride buses Expansion of Transit Amenity shelter and bench program

Upgrade of fare collection systems to allow smart cards

Two-way radio communications upgrade Continued investment in ITS and customer real time schedule technologies Replacement of office equipment, maintenance tools & equipment

# Northstar Commuter Services

Northstar Link commuter bus service ridership continues to grow

Northstar Commuter Rail Phase II, extension from

#### trips.

An Operations Center Facility Master Plan originally adopted in 2004, and updated annually, has served as a guide for future use and expansion of the facility.

The master plan identified a vehicle storage addition extension to the existing Dial-a-Ride storage area, funded through the 2014 Minnesota Legislature's capital bonding program. On-going replacement, improvement and expansion of the bus shelter and courtesy bench transit amenity program is completed annually.

# **Dial-a-Ride System**

Metro Bus Dial-a-Ride (DAR) services will expand due to growth in aging and disabled population bases. The Community Outreach and Travel Training programs are helping traditional ADA riders to adapt to using fixed route services. For those that cannot utilize the Fixed Route system, ADA Specialized Services will continue to be the backbone of the DAR program. To aid Metro Bus with the DAR program and the small bus fleet replacement, STP funded small buses have been approved in 2016.

### **Fixed Route Transit**

The 2035 Long Range Plan identified Fixed Route system restructuring needs through restructuring and additional service hours. The Fixed Route operational plan identified improvements and expansion of services into St. Joseph, west and south St. Cloud, Waite Park, Sartell, Sauk Rapids, the SCSU area, including longer span of service, weeknights and weekends. Some service change recommendations delayed due to the economic recession are being reconsidered. Expansion of service was completed in 2014 to southwest Waite Park along with a restructuring of multiple routes to improve connections in the growing eastern side of Sartell. An update to that plan was completed in 2015 with the aid of planning dollars through the APO and MnDOT.

# **Technologies**

Continued ITS-related investments, including improved fixed route AVL applications, voice and visual stop annunciation, automated passenger counting, real-time web-based schedule information, and continued upgrading of the fixed route and Diala-Ride dispatch communications systems have also been programmed. The Transit Signal Priority system which became fully operational in 2003 will also receive improvements as part of the cooperative relationship with City of St. Cloud and MnDOT.

# Compressed Natural Gas (CNG)

Metro Bus began using Natural Gas as its primary vehicle fuel in 2014

New Flyer was been chosen as the supplier of the first CNG buses in the Metro Bus fleet – first in the state of Minnesota

All future Dial-a-Ride bus purchases will be CNG fueled

2015 reports show nearly a \$38,000 per month savings over using diesel vehicles for the agency

Additional investments have been identified for upgrading fare collection systems to adopt smart cards and to the two-way radio communications system.

# Northstar Commuter Services

Metro Bus operates the Northstar Link commuter bus service between St. Cloud and Big Lake with seven-day and special event service. Operating financial assistance was obtained from MnDOT for the first time in 2013 to assist member counties provide operating financing. Ridership continues to grow annually on the Link routes while extension of Northstar rail service remains an important transportation priority for the St. Cloud Metro Area.

# Financial Capacity Analysis

The FTA issued Circular 7008.1 entitled Urban Mass Transportation Financial Capacity Policy. The Circular requires recipients of grants under Sections 3 (5309) and 9 (5307) to assess their financial capacity to undertake the programmed projects and successfully meet future operating and capital financial requirements. Metro Bus is in full compliance with this Circular completed on an annual basis. The APO has reviewed this report and has determined that Metro Bus has established their financial capacity to undertake projects programmed in the TIP.

# **Technical Advisory Committee Membership:**

### **Voting Members**

Eligible voting membership shall be as listed below. In the absence of the voting member listed, a substitute (proxy) can serve. All representing agencies and jurisdictions listed as Voting Members are allowed one vote with the exception of St. Cloud, which is allowed two votes.

- 1. St. Cloud Area Planning Organization (APO):
  - a. Sr. Transportation Planner
  - b. Executive Director (proxy in absence of Sr. Transportation Planner)
  - c. Any APO staff (proxy in absence of Sr. Transportation Planner & Executive Director)
- 2. Metropolitan Transit Commission Metro Bus:
  - a. Planning and Marketing Director
  - b. Any Appointed Metro Bus Staff (proxy in absence of Planning and Marketing Director)
- 3. Mn/DOT District 3:
  - a. District Planning Director
  - b. District State Aid Engineer (proxy in absence of District Planning Director)

- c. Any member of the District planning staff (proxy in absence of District Planning Director & District State Aid Engineer)
- 4. City of Sartell:
  - a. Planning and Community Development Director
  - b. City Engineer (proxy in absence of Planning & Community Development Director)
  - c. City Administrator (proxy in absence of Planning & Community Development Director & City Engineer)
  - d. Any City staff (proxy in absence of Planning & Community Development Director, City Engineer & City Administrator)
- 5. City of Sauk Rapids:
  - a. City Administrator
  - b. Public Works Technician (proxy in absence of City Administrator)
  - c. City Engineer or Planner (proxy in absence of City Administrator & Public Works Technician)
  - d. Any City staff (proxy in absence of City Administrator, Public Works Technician & City Engineer or Planner)
- 6. City of St. Augusta:
  - a. City Administrator
  - b. City Engineer (proxy in absence of City Administrator)
  - c. Any City staff (proxy in absence of City Administrator & City Engineer)
- 7. City of St. Cloud (1 of 2):
  - a. Public Services Director
  - b. City Engineer (proxy in absence of Public Services Director)
  - c. Any City staff (proxy in absence of Public Services Director & City Engineer)

#### 8. City of St. Cloud (2 of 2):

- a. Planning & Community Development Director
   City Planner (proxy in absence of Planning & Community Development Director)
- Any City staff (proxy in absence of Planning & Community Development Director & City Planner)

#### 9.City of St. Joseph:

- a. City Administrator
- b. Street Superintendent (proxy in absence of City Administrator)
- c. City Engineer (proxy in absence of City Administrator & Street Superintendent)
- d. Any City staff (proxy in absence of City Administrator, Street Superintendent or City Engineer)

#### 10. Benton County:

- a. County Engineer
- b. Assistant County Engineer (proxy in absence of County Engineer)
- c. Any County staff (proxy in absence of County Engineer & Assistant County Engineer)

#### 11. Sherburne County:

- a. County Engineer
- b. Assistant County Engineer (proxy in absence of County Engineer)
- c. Any County staff (proxy in absence of County Engineer & Assistant County Engineer)

#### 12. Stearns County:

- a. County Engineer
- b. Assistant County Engineer (proxy in absence of County Engineer)
- c. Any County staff (proxy in absence of County Engineer & Assistant County Engineer)

#### 13. City of Waite Park:

- a. Public Works Director
- b. City Administrator (proxy in absence of Public Works Director)
- c. City Engineer (proxy in absence of Public Works Director & City Administrator)
- d. Any City staff (proxy in absence of Public Works Director, City Administrator or City Engineer)

#### 14. Each Township: Township Engineer or Planner

### **Ex-Officio Members:**

Ex-officio members may attend and participate in any Technical Advisory Committee meeting, but may not vote unless indicated above under appointment by proxy. They shall receive the Committee meeting agendas and minutes:

- 1. APO Executive and/or Policy Board Members
- 2. Environmental Protection Agency (EPA): Regional Office
- 3. Federal Highway Administration (FHWA): District Office
- 4. Federal Transit Administration (FTA): Regional Office
- 5. Minnesota Pollution Control Agency: Air Quality Division
- 6. Mn/DOT: District State Aid Engineer
- 7. Mn/DOT: Office of Transit and/or District Transit Project Manager
- 8. Mn/DOT: Office of Investment Management
- 9. St. Cloud APO Bike/Pedestrian Advisory Committee Representative

NOTIFICATION OF AVAILABILITY PUBLIC INPUT
OPPORTUNITY: ST.
CLOUD AREA PLANNING
ORGANIZATION (APO)
TRANSPORTATION IMPROVEMENT PROGRAM
(TIP) FYS 2018-2021
The APO in coordination
with the Federal Highway The APO in coordination with the Federal Highway Administration, Minnesota Department of Transportation, Minnesota Pollution Control Agency, St. Cloud Metro Bus, and local jurisdictions has proposed a Tierror dictions has prepared a TIP for FYs 2018-2021. The pri-mary purpose of the TIP document is to program transportation projects including roadway, bridge, bicycle, pedestrian, safety, and transit projects receivand transit projects receiv-ing state and/or federal funds in the St. Cloud Metro-politan Planning Area in the upcoming fiscal years. The TIP document is being up-dated to reflect new projects and changes to previously and changes to previously programed projects. The amended TIP will be available for review from Friday, July 28, 2017 to Monday August 28, 2017 at the following locations: APO Office: 1040 County Rd. 4, St. Cloud; APO website: www.steloudapp.org. Cloud; APO website:
www.stcloudapo.org.
An Open Public Meeting will
be held on Wednesday, August 9, 2017 at 4:00 pm at the
St. Cloud APO Office,
1040 County Road 4, St.
Cloud, MN. A brief presentation on the TIP document
will take place, and there will take place, and there will be an opportunity for public input. Please contact the APO Office at 320-252-7568 to request special ac-commodations to participate in this meeting. The public is invited to re-view the TIP document and amendment and submit any comments by Monday, Au-gust 28, 2017 to Joseph Muel-ler at 5t. Cloud APO, 1040 County Rd. 4, St. Cloud, MN 56303, FAX: 320-252-6557, EMAIL: Mueller@stcloudapo

# C Appendix C: Process and Criteria for

# Prioritizing APO TIP Projects

The following documents are process and programming worksheets used during project solicitation years (every other year). This year's TIP cycle (2016) was a project solicitation year. Key select pages from the solicitation packet for the 2015-2016 TIP project solicitation process is included as a reference.

#### FY 2020 & 2021 Transportation Improvement Program (TIP) Selection Process Schedule

| DATE               | ACTION   |
|--------------------|--|
| November 2, 2015   | Federal-aid project solicitation packets e-mailed to agencies/jurisdictions within APO<br>Planning Area.   |
|                    | Deadline for submittal of FY 2020-2021 project applications to APO Office.   |
| January 5, 2016    | Deadline to submit resolution of local match support for applicant projects.   |
| 54H4417 5, 2010    | Failure to submit local match resolution by 4:30 pm on January 5, 2016 will result in project ineligibility and project will not be considered for APO project list.           |
| January 7, 2016    | APO TAC Meeting held to discuss status of FY 2017-2019 programmed projects and preliminary review of FY 2020-2021 project applications.  |
| January 14, 2016   | Preliminary review of project applications by APO Executive Board.   |
| January 14, 2016   | Preliminary review of project application submittals by Central MN ATP.  |
| February 4, 2016   | APO TAC Meeting: Recommend draft APO project prioritization to APO Executive Board, including review and comment on proposed MnDOT projects.                                   |
| February 11, 2016  | APO Executive Board Meeting: Recommend draft APO prioritized project list to APO Policy Board, including review and comment on proposed MnDOT projects.                        |
| Mid-February, 2016 | Public meeting notice published for draft APO project prioritization and MnDOT proposed projects.  |
| February 25, 2016  | APO Policy Board holds public meeting on draft APO project prioritization and MnDOT proposed projects to all interested stakeholders and approves programming of new projects. |
| March 2016         | ATIP Development Committee merges regional priorities and develops draft ATIP.   |
| April 7, 2016      | Central Minnesota ATP reviews, modifies, and approves draft ATIP.  |
| Mid-April, 2016    | Draft St. Cloud Metropolitan Area TIP document distributed to MnDOT and MPCA for review and comment.   |
| Mid-May, 2016      | Notice of TIP document public information meeting and 30-day comment period.   |
| May 26, 2016       | APO Policy Board holds public meeting on draft TIP document. TIP document is approved, subject to minor technical corrections.   |
| August 11, 2016    | APO Executive Board approves final TIP document.   |
| Mid-August, 2016   | Final review of TIP with MnDOT via Self-Certification Checklist.   |
| Late-August, 2016  | APO distributes final TIP document to MnDOT for inclusion in STIP.   |
| September, 2016    | MnDOT approves draft STIP and submits to FHWA.   |

Completed project nomination applications are to be submitted no later than **Tuesday**, **January 5**, **2016**. Applications received after this deadline will not be considered for funding. Please contact Jarrett Hubbard at 320-252-7568 or <a href="https://hubbard@stcloudapo.org">hubbard@stcloudapo.org</a> if you have any questions regarding this solicitation or the enclosed forms.

|---|--------------------|
| FY 2020-2021 APO & District 3 ATP Federal Road/Bridge Funding Eligibilit  | y Criteria.        |
| Projects must completely address all qualifying criteria prior to the January 5, 2016 deadline to be consi  | dered for funding. |
| Minimum ADT Project meets minimum ADT requirements. (2,000 existing urban, 3,000 non-existing urban) (200 existing rural, 400 non-existing rural)   |                    |
| Minimum Functional Classification Project is identified on the Mn/DOT Functional Classification Map and has the minimum functional classification. (Inside or along Urbanized Boundary: Minor Collector or above) (Outside of Urbanized Boundary: Major Collector or above) |                    |
| Permanent Improvement Project is a permanent improvement.   |                    |
| Minimum Federal Funds Requested The minimum \$200,000 federal funding amount is being requested. (Minimum \$50,000 for right-of-way or project development studies)   |                    |
| Capital Improvement Program  The project is included in an adopted City or County Capital Improvement Program.  |                    |
| Consistency with APO Transportation Plan & submitting jurisdiction  |                    |
| Comprehensive/Transportation Plan The project is consistent with the APO 2040 financially constrained Transportation Plan & local Comprehensive or Transportation Plan.   |                    |
| Assured Coordination with all Jurisdictions  A letter or resolution of support for the project has been obtained from other roadway jurisdictions directly impacted by the project (sample resolution attached).  |                    |
| Assured Local Match by Applicant  A resolution from the implementing agency has been approved assuring that the necessary local matching funds will be provided for the project (sample resolution attached).   |                    |
| Movement of People and Goods  The project provides for or improves the movement of people and goods.  |                    |
| 20-Year ADT St. Cloud APO 20 year forecasted ADT has been used in the ATP funding application.  |                    |
| <u>Project Cost Breakdown</u> Federal, local and total construction costs are itemized in the project description text.   |                    |
| Project Location Map A project location map has been prepared.  |                    |
| Public Involvement A resolution has been adopted by the implementing agency documenting that a specific public meeting has been held for the project or plan that includes the project (optional – sample resolution attached)  |                    |
|   |                    |

## Appendix D: Central Minnesota ATP

### **Operations & Policy Manual**

The following document is the Policy and Operations Manual for the Central Minnesota Area Transportation Partnership (ATP 3). The ATP is public programing board for federal transportation funds in the 12 counties of Central Minnesota or correspond with MnDOT District 3.

MnDOT created Area Transportation Partnerships (ATPs) to emphasize greater public involvement in the preparation of transportation plans and programs. The Central Minnesota ATP is one of eight ATPs in Minnesota.

Every year, the ATPs develop an Annual Transportation Improvement Program (ATIP). ATIPs cover a minimum fouryear period. ATIPs include all projects seeking federal aid highway, state trunk highway, and federal transit sources of funding.

The Central Minnesota Area Transportation Partnership (Partnership) was formed in 1993 following The Certain Mannesota Area Tenaporation Featuresing (earnicerup) was named in 1992 solution passage of landmark federal surface transportation legislation in 1991 requiring states to emphasize greater planning, multi-model decision making, and local and sublic involvement in the development of temporation plans and programs. The Minnesota Department of Tenaporation (IMPOT) established Area Tenaporation Partnerships (ATP) in response to titls new legislation as a way of providing a sub-state peogramic to bus on heraporation decisions that involve the programming of federal highway funding included in the Minnesota State Transportation improvement Program (STIP).

This Operations and Folicy Manual provides policies and guidance to assist the Partnership in its overall governance and operations. One of the primary roles of the Partnership is to annually develop a dwift Area Transportation Improvement Program (ATIP). The ATIP is an integrated list of state and local priorities seeking federal transportation funding covering a minimum four-year period recommended for inclusion in the GTIP. The Partnership is also responsible for assisting MinDOT District 3 in managing the ATIP after STIP has been approved by relateral temporation authorities. Program management involves the establishment and effectivent of policies and procedures to ensure the orderly delivering and development. of the projects in the program.

- Provide information regarding Minnesota Department of Transportation's (MinDOT) statewide transportation investment process.
- tensportation investment process.

  2. Identify Perferentific membership, poles, and responsibilities.

  3. Establish consistent policies and procedures for soliciting, ranking, and selecting projects seeking
- essession consistent posities and processes for solutioning, manning, and securing projects seeining federal transportation funds.

  Set a framework for the equilable distribution of federal funds for local projects.

  Identify policies and procedures to managing projects in the Partnership's ATIP after they have been programmed in the STIP.

While this manual elternipts to standardize many recurring ectivities by establishing specific policies and procedures, there may be instances where the Partnership is required to act independently from the guidance prescribed herein. In these cases, the Partnership should conduct its affairs, make decisions, and act in a manner consistent with the purpose and intent of these policies as well as any other state and federal guidance or requirements governing the programming of federal transportation projects.

### BACKGROUND

### State Transportation Improvement Program and Federal Surface Transportation Bill

The current federal surface transportation bill coupled with previous bills has created a new and dynamic focus for transportation planning and programming for the Nation. As legislatively required, each state must produce a State Transportation Improvement Program (STP) document. The STIP is a comprehensive four-year schedule of planned transportation projects eligible for federal transportation funding. It is fiscally constrained based on the funding that each State can reasonably expect to be for the life of the document.

The STIP must include capital and most non-capital transportation projects proposed for funding under Title 23 (Highway) and Title 49 (Trensit) of the U.S. Code. It must also contain all regionally significant transportation projects that require action by the Federal Highway Administration (FHWA) and the Federal Trensit Administration (FTA). For informational purposes, the STIP should include all regionally significant projects proposed to be funded with other federal and/or non-federal funds.

Surface transportation legislation requires states and metropolitan areas to emphasize public involvement in developing transportation plans and programs. Since many investment decisions included in the STIP have potentially far-reaching effects, surface transportation legislation requires planning processes to consider such factors as land-use and the overall social, economic, energy, and environmental effects of transportation decisions. Additionally, these planning advices provide input into the programming process, so there must also be reasonable opportunities for a high comment in the dealerment of the STIP.

### public comment in the development of the STIP. Area Transportation Partnerships

Minnesota has established a decentralized investment namesota has established a decemberation investment process relying upon the input and recommendations of eight Area Transportation Partnerships (ATPs) throughout the state. ATPs bring together the transportation recommendations of MnDOT and other transportation perfines into an integrated list of transportation investments called the Dreft ATP. ATIPs are prepared annually by each ATP and cover a minimum four-year time frame.

ATPs consider the transportation priorities of the RIP's consider the test-postation protects of RDC), Regional Development Commissions (RDC), Metropolitan Planning Organizations (MPO) and MhOOT Districts in preparing their Dreft ATIP's. Once developed, the Dreft ATIP's are recommended by the ATIP's to their respective MhOOT Transportation District Engineer for inclusion in the Dreft STIP.

Figure 1 - ATP Bounds

ATPs may establish criteria to help in project selection and may develop separate policies and procedures to manage their individual programs and activities. Creation of this manual serves as this Partnership's official document governing its operations.

### ATP. RDC. and MPO Boundaries

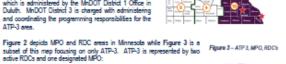

ATP boundaries generally follow MnDOT State Aid District Figure 2 - Minnesota MPO's & RDC's boundaries. Figure 1 is a map illustrating the eight ATP boundaries. The geographic area represented by this Pertnership is identified as '3" on the map and is sometimes referred to as ATP-3. ATP-3 encompasses a 12-county area of Central Minnesota including the following counties:

- Benton
- Morrison
- Crow Wing
- Sherburne Steams
- Todd Wright

Mile Lacs

Ailkin County, which is part of the MnDOT District 3 State

Aid area, was asked if it wished to join ATP-3 but it chose instead to align itself with its respective RDC area. Therefore, Aition County is considered part of ATP-1, which is administered by the MnDOT District 1 Office in Duluth. MnDOT District 3 is charged with administering and coordinating the programming responsibilities for the ATD-3 area.

- Region 5 Region 5 Development Commission
   Region 7E East Central Regional Development Commission
- St. Cloud metropolitan area St. Cloud Area Planning Organization

AIH-3 includes the four-county area making up Region 7W. Region 7W, like the Regions 5 and 7E above, is an economic region of the state. However, the RDC originally serving this region was inactivated in 1982. In 2000, a separate transportation policy board, called the Region 7W Transportation Policy Board, was established by Joint Powers Agreement duty executed by Benton, Sherburne, Steams, and Whight Counties to conduct transportation planning and programming responsibilities to support the activities of ATP-3 in Region 7W. ATP-3 includes the four-county area making up Region 7W. Region 7W, like

### CENTRAL MINNESOTA AREA TRANSPORTATION PARTNERSHIP

Sound planning and public involvement provide the basis for good transportation decisions. Planning processes must appropriately involve special inherests, citizens, non-headtional partners, professionals, and regional and local governments. The products derived from these processes become the foundation for project selection. A group that respects these processes can best accomplish priority setting, involving tradeoffs between competing needs

Table 1 - ATP-3 Membership

within an ATP's programming area.

### Membership

Jurisdictional perspectives

Members should be familiar with and/or Rued Transit involved in planning processes, such as Involved in planning processes, such as those referenced above. They should also be representative of the area served. Membership should include representation from MinDOT, RDCs, MPOs, cities, countles, MeDOT Chiefel 3 Staff - ATP Facilitator and tribal governments. Other transportation stakeholders may also be represented as RDC 5 Blaff determined by the individual ATPs.

MiDOTDield 3 2 Region 5 Development Commission (Region 5) East Central Regional Development Commission (Region 7E) 2 Region 7W Transportation Policy Board (Region 7W) St. Cloud Area Planning Organization County Engineer - northern half of District 3 County Engineer - southern half of District 3 The success of the ATP rests with its membership. Persons serving on the ATP should have broad, multi-model, and multiregarding Leech Lake Band 3 RDC 7E Stuff

The Partnership in ATP-3 consists of 18 Tribal Nation Advisor voting and six non-voting members. Table 1 Illustrates a breakout of this membership by functional group and number of members appointed to serve in each of the groupings. Functional groups represented are responsible for managing their individual

### Terms and Appointments

There are no prescribed terms or limits on service length for Partnership members. Functi represented on the Partnership must review their membership at least every two years from the time of appointment or reappointment on the Partnership. Functional groups may appoint an alternate member to serve as a proxy on the Partmership in the event the primary member is unable to attend one of the scheduled Partnership meetings. Alternatively, they may establish a process for assigning an alternate member (or proxy) to represent the appointed member when the primary member is not able to attend a

Once appointed, members continue to serve on the Partnership until such time that the functional group appointing the member selects a new appointment. In instances where a member is required to tenther them members are not appointment. In instances where a member is required to tenther membership on the Partnership before their term would otherwise expire, they should contain respective functional group as early as possible to notify them of their decision so a new appointment.

Listed below are membership considerations that selected functional groups should take into account as they appoint members to the Partnership:

- The Region 5 Development Commission, East Central Regional Development Commission, Region 7W Trensportation Policy Board, and St. Cloud Area Planning Organization are responsible. for appointing two voting members to serve on the Partnership. At least one of the appointed members must be an elected official.
- The two RDCs and the St. Cloud Area Planning Organization is authorized one member from their staff to serve as a non-voting member on the Partnership unless another staff person has already been appointed to serve as a voting member on the Partnership to represent the region.
- Region 7W Trensportation Policy Board is authorized one non-vertigeness are regions.

  A MinDOT District 3 staff person shall perform these duties since the District serves as "Staff" to the Region 7W Trensportation Policy Board in the execution of its duties and responsibilities. The District 3 County Engineers' Group is responsible for appointing two county engineers to serve
- on the Partnership: one to represent the north half and the other to represent the south half of the Partnership's programming area.

  The MnDOT District 3 City Engineers' Group is responsible for appointing two city engineers to
- serve on the Partnership to represent State Aid cities over 5,000 population; one to represent the north half and the other to represent the south half of the Partnership's programming area.

   MinDOT District 3 voting members should include one person appointed to represent the state trunk highway construction program and the other person appointed to represent local road and

Functional groups should submit their appointments in writing to the ATP-3 Staff Facilitator following

bridge projects.

The Partnership shall appoint a Chair from its membership to preside over meetings and represent the body at various functions. A simple majority vote of the voting members present shall decide appointment of the Chair. The Partnership shall determine selection of the Chair at the final meeting of

annual ATIP development process cycle, usually occurring in June. The Chair's term shall be a period of two years and shall commence at the next scheduled meeting of the Partnership to

The Partnership shall appoint a Vice Chair from its membership to preside over meetings and represent the body at various functions in the Chair's absence. Appointment of the Vice Chair shall be determined in the same manner and during the same time frame as the Chair unless otherwise directed herein. The Vice Chair's term shall be a period of two years and shall commence at the next scheduled meeting of the

In the event the Partnership's Chair must vacate their office prior to the expiration of their term, the Vice Chair shall automatically be appointed as the Interim Chair to serve out the remainder of the vacating . The Partnership shall then take action to appoint an Interim Vice Chair by a simple majorl ofting members present to serve out the remainder of the vacating Vice Chair's term.

In a similar way, if the Partnership's Vice Chair must vacate their office prior to the expiration of their term, the Partnership shall appoint an interim Vice Chair from its membership by simple majority vote of the voting members present. The appointed interim Vice Chair will perform the duties of this position for the remainder of the vacating Vice Chair's term.

If both the Partnership's Chair and its Vice Chair must vacate their office at the same time before their in both the Participant of the Chair the Chair who where the Chair Appointment for these positions will be by a simple majority vote of the voting members present.

### Roles and Responsibilities

The primary role of the Partnership is focused on the development of the Draft ATIP within the ATIP-3 area. This involves establishing and mehitaining a process for soliciting and selecting condidate projects to include in the Draft ATIP. An important aspect in soliciting and selecting projects for the Draft ATIP involves developing relevant criteria and application materials and processes to add the Partnership in the screening, evaluation, and ranking of projects.

Another role of the Partnership is to manage the implementation of the ATIP following approval of the STIP. The Partnership manages the program by developing and enacting various policies and procedures to govern such things as changes in project scope or cost estimates that may result in modifications or amendments to the STIP. Policies are also adopted to manage increases or reductions in federal or state funding that have been rgeted to ATP-3.

The voting members on the Partnership play a very direct role in establishing and approving policies and procedures for the development and management of the ATIP. They stand regular and special members of the Partnership and serve on various committees of the Partnership. Non-voting members also play a critical role in advising the voting membership on transportation planning and programming related matters. Non-voting members are allowed to attend all of the Partnership's regular and special meetings and can

Central Minnesota Area Transportation Partnership: Operations and Policy Manual

serve on various committees as directed by the Partnership. No n-voting members carry-out many of the key program development functions of the Partnership between its meetings.

### Attendance

The Partnership encourages maximum attendance and participation by members at its meetings. The Chair shall take roll call at the beginning of each meeting. The Chair shall alert the Partnership of members who have two or more absences within a one-year period. The Partnership may take appropriate action to encourage attendance that may include verbal or written notices to the functional group appointing the

When a voting member is unable to attend a meeting for any reason, it is their respo ATP-3 Staff Facilitator prior to the meeting of this fact. Voting members unable to attend a meeting may send an alternate member to represent them in their absence as provided in the Terms and Appointments

section above. Alternate members, when needed, shall have all of the rights and privileges of the voting member they are substituting.

Non-voting members are encouraged to attend regular meetings of the Partnership. Non-voting members shall be identified during roll call and their name plates shall be distinct from the voting membership to reflect their status.

Voting members shall be entitled to one vote as to any matter

submitted to the Partnership for decision. Voting shall be by voice and/or show of hands, except that any member, including the Chair, may orally request a roll call vote. As to all votes, the names of members abstaining and numerical results of roll call votes, if taken, shall be recorded in the minutes of the meeting. Voting by proxy is permitted. Alternate members shall be shall be recorded in the minutes of the meeting. Voting by proxy is permitted. Alternate members shall be entitled to vote. If both the primary voting member and the alternate member are absent from the meeting, the other delegate representative for that functional group, if more than one, shall not be entitled to cast a vote for the absent member. Non-voting members shall not be entitled to vote unless they have been designated to serve as proxy for an absent voting member.

### Committees

The Partnership may establish committees to advise and provide support to the Partnership in the execution of its duties and responsibilities. Committees typically serve in an advisory capacity unless directed otherwise by the Partnership. Committees may be formed on a permanent basis as "standing tees" or on temporary basis as "ad hoc con

Clearly defining the purpose, roles, responsibilities, and expected deliverables are important in establishing committees. Committee activities may include conducting investment program reviews, aiding the Partnership in its project solicitation and selection role, or studying particular issues and concerns of

Committee membership may vary depending upon the committee's purpose or function. The Partnership should select committee members from its voting and non-voting membership when it is practical to do so.

Central Minnesote Area Transportation Partnership: Operations and Policy Manual

The Partnership may also appoint external persons to serve on committees. In selecting appointments, the Partnership should determine the appropriate size and make-up of the com-

The Partnership should ensure prospective appointees possess expertise in the subject area, contribute to healthy and diverse viewpoints, and reflect the interests of the groups they are representing. Membership decisions should contribute toward successful dialogue and outcomes necessary toward achieving the committee's charge

- 1) ATIP Development Committee
- Trensportation Alternatives Program Committee
   District 3 Public Trensit Providers Committee

### ATIP Development Committee

The ATIP Development Committee is established to develop and recommend the Draft ATIP document to the Partnership for its approval on an annual basts. This Committee is responsible for merging the local and state temporation priorities of the RDCs, APO, and MnDOT Dibtict 3 into an integrated list of projects, called the Dreft ATIP; and then, presenting its recommendation to the Partnership for review and approved. This Committee may also be requested to study and advice the Partnership on other matters relating to the development and management of the ATIP. In this capacity, the Committee shall not serve as a policy making body unless otherwise granted this authority by the Partnership. This Committee will work to ensure all of its products are prepared in a consistent, fair, and technical manner.

ship on the ATIP Develop ment Committee shall consist of the folk

- MnDOT District 3 State Aid Engineer.
- One engineer representative from each of the four regions to be selected from the ATP's voting
  - o If an engineer representative from the Partnership's voting membership is not available, a representative may be appointed by the region from its regional transportation advisory committee.
- One person representing transit to be selected from the Partnership's voting membership
- One representative from MnDOT's District 3 Planning & Programming Unit to serve as committee
- . One person representing the area's tribal nations to be selected from the Partnership's voting
- One planner from each region to be selected from the Partnership's voting or non-voting membership, as applicable.

### Transportation Alternatives Program (TAP) Committee

The Partnership's TAP Committee is established to assist the Partnership in the annual solicitation and selection of projects eligible for federal TAP funding. Among its responsibilities, the TAP Committee develops and updates project selection criteria and application materials to ensure consistency with the Partnership's policies and applicable statewide program objectives. This Committee is responsible for conducting a formalized review and evaluation of TAP candidate projects sufficient to recommend a

prioritized list to the Partnership's ATIP Development Committee for inclusion in the Draft ATIP. The Committee shall consider the regional prioritization of TAP candidate projects in its review and evaluation.

Membership on the TAP Committee shall consist of the following members

- MnDOT District 3 State Aid Engineer
- . One engineer representative from each of the four regions to be selected from the Partnership's
  - If an engineer representative from the Partnership's voting membership is not available, a tative may be appointed by the region from its regional transportation adv
- One representative from MnDOT's District 3 Planning & Programming Unit to serve as committee chainfacilitator.
- One person representing the area's tribal nations selected from the Partnership's voting
- . One planner from each region to be selected from the Partnership's voting or non-voting membership, as applicable.
- One person representing Safe Routes to School (Statewide).
   One person representing Scenic Byways (Statewide).
- One person representing School Boards (Local).
- One person representing Parks and Recreation (Local).
- Other representation deemed necessary by the Partnership
- Additional MnDOT District 3 staff may be assigned, as needed, to facilitate the activities of the TAP Subcommittee but will not be considered part of the official membership.

### District 3 Public Transit Providers Committee

identify and evaluate transit vehicle capital requests to be recommended for consideration in the Partnership's Draft ATIP, as required by MnDOT. This committee works with the MnDOT Office of Trensit to identify a list of candidate projects seeking federal transportation funding. Capital projects and operating assistance to be funded by the Federal Transit Administration are not required to be reviewed by the Committee.

After identifying a list of candidate projects, the Committee reviews each request on the basis of need using After dentitying as so consisted projects, the Committee elevieus each equest on the basis of need using a file cycle enalysis methodology to develop a rent-ordered listing of projects to submit to the ROCs, the 81 Cloud APO, and Region 7W. In turn, these organizations are responsible for considering the Committee's recommendations in developing a prioritized list of local transportation projects seeking federal funds for each region.

Membership on the Committee consists of one representative from each rural and small urban brandli system provider within the Partnership's programming area. The MnDOT Office of Transit's Program Manager representing ATP-3 is assigned to this committee and is responsible for facilitating and presiding over the meetings. Each person assigned to serve on the Committee is a voting member. Planning staff from the area's regional planning organizations may also attend, as needed.

### TRANSPORTATION INVESTMENT PROCESS

### General

The Partnership employs a decentralized approach in implementing its transportation investment process by enlisting the assistance of the Region 5 Development Commission, East Central Regional Development Commission, St. Cloud APO, and the Region 7W Transportation Policy Board. The Partnership's decentralized investment process encourages effective use of existing regional planning structures. These regional planning bodies are logical forums for discussing significant transportation matters and are well soned to evaluate how certain transportation issues impact the development and quality of life respective regions. Regions are also valuable toward

ensuring that the projects considered for federal transportation funds reflect regional priorities. Since each region has its own designated policy board consisting of locally elected officials, there is a greater sense of political accountability for proposed projects.

### Transportation Funding and Programs

Minnesotals transportation investment process responds to new

federal transportation regulations requiring states to maintain a performance-based transportation planning process and demonstrate progress toward meeting established performance targets through their transportation investments.

MnDOT's commitment to performance-based is emphasized throughout the organization and is firmly established in its planning processes. The planning documents highlighted below demonstrate this commitment and illustrate how MnDOT's visions, transportation policies, and capital investment decisions are interrelated and interfailmed through its planning and programming processes.

- Minnesota GO that articulates a 50-year statewide vision for transportation.
   Minnesota Statewide Multimodal Transportation Plan, a policy plan containing objectives and stretegies to inform the development of other MHODT plans.
- Minnesota 20-Year State Highway Investment Plan that represents MnDOT's capital investment priorities for the state highway system over the next 20-years.
- MnDOT's 10-Year Capital Highway Work Plan that provides a summary of the department's committed projects for years 1-4 and planned investments for years 5-10.

MnDOT's goal of meeting its statewide transportation objectives, as documented in these plans, serves as the foundation for the department's stretegy in distributing funds to the MinDOT District Offices and ATPs. Accordingly, MinDOT has structured its present funding distribution methodology around five primary investment categories, which are detailed below. These investment categories have been established to ensure attainment of federal and state transportation goals, while ensuring sufficient investment in other

### STATEWIDE PERFORMANCE PROGRAM (SPP)

SPP consists of federal funding provided under the National Highway Performance Program (NHPP) intended for use on the National Highway System (NHS) including the required statelocal matching funds. Funding under the NHPP may be used on any route designated on the NHS. The

Central Minnesote Area Transportation Partnership: Operations and Policy Manual

NHS includes interstates, most U.S. highways, and other routes functionally classified as a principal arterial. MnDOT has over 97 percent of the statewide mileage included on the NHS. The remaining 3 percent of the NHS is on the local system. MinDOT has established the SPF to ensure remaining 3 percent of the NHS is on the local system. MinDOT has established the SPF to ensure progress in meeting federal performance requirements for pavement, bridge, safety, and congestion on the NHS system. Selection of projects for the SPF involves collaboration between the MinDOT district offices, specialty offices, and the central office. Typical projects include rehabilitation and replacement fixes for existing pavement, bridges, and roadside infrastructure.

### DISTRICT RISK MANAGEMENT PROGRAM (DRMP)

DRMP consists of federal funding from the Surface Transportation Program — Statewide funding and additional State trunk highway funds targeted to the districts. DRMP funding distribution is based on a formula that takes into account each districts share of non-principal arterial bridge needs (30 percent) and pavement needs (30 percent), number of miles of non-principal arterials. (24 percent), and population (16 percent). Project selections are evaluated statewide through a corative process to ensure each district is balancing district-level risks while making progress toward achieving statewide investment goals. The DRMP focuses on powerent, bridge, roadside infrastructure on lower-volume roads; and is responsible for funding the majority of s and mobility projects proposed by the districts.

### AREA TRANSPORTATION PARTNERSHIP (ATP) MANAGED PROGRAM

The ATP Managed Program consists of federal funding provided under the STP Urban, STP Small Urban, and STP Rural population programs. As the name implies, it includes funding from these STP program sources that can be used by the ATPs to address local bransportation needs qualifying for federal reimbursement in the areas served by the different programs comprising the ATP Managed Program. Distribution of funds to the ATPs is accomplished based on the following

- . 50% Distributed by ATP population consistent with the most recent census, distributed by the definitions for rural, small urban, and urban as defined by federal planning regulation
- 50% Distributed by the average of the ATPs' county and municipal state aid needs as calculated by MnDOT's State Aid for Local Transportation process.

ATPs are responsible for project solicitation and selection of projects to be funded under the ATP

### TRANSPORTATION ALTERNATIVES PROGRAM (TAP)

The TAP is a new federal program that streamlines and restructures several previous programs. Previous federal programs such as such as Transportation Enhancements, 8afe Routes to School (SRTS), National Scenic Byways, and several other discretionary programs now fall under the new

TAP is administered jointly between the MnDOT Central Office and the ATPs as part of a competitive application process. Applicants interested in applying to the TAP must first complete a Letter of Intent (LOI) to determine their eligibility and preparedness. ATPs send out full applications to applicants who have completed the LOI, meet the basic eligibility equivments, and successfully demonstrate potential to receive federal TAP funding. ATPs are responsible for

Central Minnesota Area Transportation Partnership: Operations and Policy Manual

evaluating each of the applications they receive, and select from those the ones that they wish to nd for funding. Most ATPs have established special com-

TAP funding is distributed to the ATPs by population through the following categories:

- TAP-Statewide
- TAP-Small Urban

Since ATP-3 does not have an MPO area with 200,000 or greater population, it does not receive an allocation of TAP-Urban funds under the formula.

### HIGHWAY SAFETY IMPROVEMENT PROGRAM (HSIP)

The HBIP is a federally funded safety program. The object of this program is to identify, implement and evaluate cost effective construction safety projects. This program is administered centrally by the MinDOT Office of Theffic Safety and Technology (OTBT). OTBT solicits MinDOT districts and local jurisdictions (e.g., cities and counties) for qualifying safety projects eligible under HBIP. Typically these include projects that have been identified and recommended in the safety plans prepared by the local agencies and MinDOT and are consistent with the critical emphasis seas and shadted and accordance with the critical emphasis are said shadted and shadted in Minnesola's Strategic Highway Safety Plan. Activities selected for HSIP funding are generally lower cost, high return on investment strategies designed to reduce the most serious types of crashes. Funding to each ATP is determined by its share of serious and fatal

### Regional Federal Funding Targets and Sub-Targets

Regional federal funding largets provided by MinDOT are an important planning tool to assist ATP's in developing their fiscally-constrained Dreft ATPs. Targets are the maximum amount of funding a District or ATP can receive for a given year. It is important to note that targets may vary throughout the time frame of the BTIP and beyond. MinDOT uses different methodological approaches in distributing funding to the ATPs and the MinDOT Districts. The five previously identified primary investment categories are each calculated using a different formula and set of criteria.

Each year, MnDOT's Office of Transportation System Management (OTSM and sometimes mentioned in Both year, Minutur's United of Interophenous opposes management, you are and accurate to immension on this manual as "Central Office", updates the STIP funding guidance. This guidance contains the estimated federal highway aid and state trunk highway funding evaluate for developing the Droft STIP. The funding guidance is broken out by each major investment category with the amounts targeted to each ATP.

ATPs and the MnDOT Districts apply the targeted federal and state funds in the STIP guidance to help them identify the transportation investments to recommend in their fiscally-constrained Draft ATIPs. Projects funded with State-Aid funds distributed to counties and municipalities over 5,000 populations are not required to be included in the STIP unless those funds are needed to match federal transportation funds being requested for projects programmed in the

| Table 2 - Targe    | t Formula              |        |
|--------------------|------------------------|--------|
| Measure            | Fectors                | Weight |
|                    | Bridge                 | 13%    |
| 50%<br>System size | Federal Aid Lane Miles | 31%    |
| 0,111111111        | Buses                  | 6%     |

12

In June 1999 starting with the fiscal year 2003 local icitation, the Partnership established a methodology sub-targeting the local federal funds targeted to ATP-3 to the four regions. While these are not actual allocations, the sub-targets provide a place to start in

| 50%<br>Usage | Present<br>Vehicle Miles Traveled<br>Heavy Commercial<br>Vehicle Miles Traveled<br>Future | 21%<br>4% |
|--------------|---|-----------|
|              | 2025 Population   | 25%       |

setting regional priorities necessary for developing each regional priorities necessary for developing each regional TIP. Table 2 reports the measures, factors and weights that are injust into the Farthership's sub-target formula. The formula is based on 50 percent system size (bridge area, federal aid lane miles, and buses) and 50 percent system use (vehicle mile traveled, heavy commercial vehicle miles traveled, and future population).

### Table 3 - Regional Federal

| Funding Sub-Targets |          |
|---------------------|----------|
| Region              | Target 1 |
| Ragion 5            | 32.69    |
| Ragion 7E           | 13825    |
| Ragion 7W           | 33.009   |
| St. Cloud Metro     | 20.5%    |
| Total               | 1005     |

Table 3 reports the sub-target percentages reporting each region's share of the local federal funds targeted to the Partmership under the ATP Menaged Program. Originally the sub-targets could only be determined for Region 5 (32.65 percent), Region 7E (13.82 percent), \*\* and Region 7W (53.53 percent) since some of the data used in the formula was not available below the county level. This made it difficult for splitting out a separate target percent for the St. Cloud metro area from the larger Region TW total. Thus, the St. Cloud APO and Region TW held meetings to negotiate an acceptable split of the combined target total. The percentages shown in this table reflect the results of their negotiations and agreement on the split

The Perthership has agreed to continue using this formula for distributing the local federal funds to the regions despite MnDOT's recent change in its statewide process for distributing funds to the ATPs. The Perthership reserves the right to make changes to this formula so it determines necessary. Any stutue change to the formula should not impact projects or funding levels already programmed in an approximation of the Draft ATIP or beyond as set forth by

### Transportation Investment Goals

The state's transportation investment process starts with its 50-year vision for transportation contained in Minnesoia GO. The vision is supported by eight principles that are used to guide future policy and investment decisions within MinDOT. MinDOT's 20-year Statewide Multimodal Transportation Plan applied Minnesoia GO's guiding principles to develop objectives and strategies to inform the development of MnDOT's Statewide Highway Investment Plan (MnSHIP) and other statewide plans and studies.

MnDOT districts apply the investment direction set forth in MnGHIP, plus any additional guidance provided by the MnDOT Central Office, in annually updating the draft STIP and their individual district ten-year capital injuriesy work plans. Development of the district ten-year capital injuriesy work plans to important the identification and programming of future STP and DRMIP projects to be intend in the STIP by the MnDOT districts. Similarly locally and regionally-prepared transportation plans and capital improvement programs are useful in programming funds under the ATP Managed Program for locally-sponsored

The Partnership may elect to develop its own investment goals that more closely reflect the transports needs of the area. If the ATP elects to do so, it should derive these goals from a comprehensive planning process that considers the use of federal and state performance measures and is characterized by substantial public involvement.

### MnDOT District 3 Involvement

MnDOT District 3 staff provides support to the Partnership to assist it in its day-to-day operations. Some of the specific duties performed by District staff in support of the Partnership include (illustrative only):

- · Preparing agendas, mailings, and minutes pertaining to Partnership meetings
- Producing and presenting necessary information and materials to assist the Partnership in conducting its operations.
- Working with the RDCs, APO, Region 7W, and the Partnership to help in candidate project solicitation and selection associated with ATIP development.
- Participating in and facilitating meetings to assist the Partnership and its committees in performing their duties.
- Managing revisions to cost estimates; increases, surpluses, and reductions in state or federal funding.
- · Processing modifications and amendments to the STIP for both local and state projects.

The Partnership has enacted various policies and procedures contained in this manual to assist MnDOT District 3 with those activities.

### Regional Planning Partners Involvement

Regional planning partners (a.k.a. regions) supporting the Partnership include the Region 5 Development Commission, East Centrel Development Commission, Region 7W Trensportation Policy Board, and the St. Cloud Area Planning Organization. These entities play an Integral role in the Partnership's annual ATIP development process. They provide insight to the Partnership concerning the social, economic, and environmental issues facing their regions that contributes to enhanced transportation decisions. They also serve as a clearinghouse for determining regional brensportation priorities by Involving counties, cities, transit, and other Parsportation interests in their decision-making processes.

### REGIONAL DEVELOPMENT COMMISSIONS

The two RDCs receive planning grents from MeDDT to develop and implement an annual transportation planning work program. RDCs include staff time in their work programs to support the activities of the Partnership. The beliance of their work programs to dedicated toward conducting other regions transportation planning and studies and providing technical assistance to the local governmental units they serve. Products from implementing their work programs, such as regional long-range bensportation piens, provide the basis for setting transportation priorities in the regions. Each RDC is supported by a transportation advisory committee that advises and makes recommendations to the policy makers on the Commission on a variety of transportation matters.

### ST. CLOUD AREA PLANNING ORGANIZATION

The St. Cloud APO is the only designated MPO in the ATP-3 programming area. The APO is responsible for maintaining a continuous, comprehensive, and coordinated (3-C) transportation planning process for the St. Cloud metropolitan area. As the designated MPO, it must prepare a Transportation improvement Program (TIP) at least every two years for the metropolitan area. Projects in the APO's metropolitan TIP must program (TIP) at least every two years for the metropolitan area.

Projects in the APO's metopoliten TIP must be consistent with the products derived from its planning process, including its long-range metopolitan transportation plan. The APO must ensure that the TIP is competible with the development of the Partnership's ATIP and ultimately the STIP. Since the Partnership's ATIP and ultimately the STIP, Since the Partnership's ATIP, it is essential that the Partnership and APO coordinate that the Partnership and APO coordinate that artifacts.

The APO's transportation planning processes are well established and are useful for determining the transportation priorities for the 8t. Cloud methopolitian area. The candidate projects identified through the APO's TIP development process provide input into the Partnership's ATIP development process. Similar to the two RDCs in the ARD Planning the area, the APO is complemented with a Organization.

transportation advisory committee. This committee assists the agency in preparing transportation plans and studies and in reviewing various alternatives to address existing and future transportation needs. Recommendations from this committee are then forwarded to the APO Policy Board where official action is taken.

### REGION 7W TRANSPORTATION POLICY BOARD

The area of Region 7W outside of the 8t. Cloud APO's 20-year metropolitan planning area is represented by the Region 7W Transportation Policy Board. The authority for this organization was made possible through a Joint Powers Agreement mutually executed by Benton, Sherburne, Steams, and Whight Counties in Jenuary 2000. The Region 7W Transportation Policy Board was established to address regionally-significant bransportation issues, conduct regional transportation plans and studies, and provide assistance to the Partnership in the solicitation and selection of projects seeking federal funding in the STIP.

MnDOT District 3 staff provides support to the Region 7W Transportation Policy Board in a manner similar to the roles performed by the transportation planning staffs of the RDOS. A special transportation advisory committee has been established to execute the region's transportation work program and to advise and make recommendations to the Region 7W Transportation Policy Board on transportation matters. This includes the annual review and evaluation of candidate projects to be recommended to the Reviolan 7W Transportation Policy Board for flourison in the prest ATIP.

Central Minnesote Area Transportation Partnership: Operations and Policy Manual

Central Minnesota Area Transportation Partnership: Operations and Policy Manual

.

### METROPOLITAN COUNCIL

In March 2012, the U.S. Census Bureau identified portions of Albertville, Henover, Otsego, and St. Michael in Wright Courty and portions of Bit. River and Big Lake Township in Sherburne County as part of the Minneapolit-Sit. Post Urbanized Area. With this announcement came the news that for the first time the Metropolitan Council's planning area was extended beyond the legislatively defined seven-county boundary area. Local jurisdictions within the extended area now must be included in the Metropolitan Council's feddrell thrapportation planning and propergraming process.

A Memorendum of Understanding (MOU) was duly executed between the Region 7W Transportation Policy Board, the Metopolitan Council, and the cities and counties in the extended area in January 2014. The MoU establishes a communication and coordination framework for addressing the Metopolitan Council's federal metropolitan transportation planning and programming requirements within the extended sizes.

In terms of the Impact of this MOU on the Partnership's ATIP development process, the Region TW Transportation Policy Board will continue to represent he local jurisdictions within the extended area in the development of the Region TW portion of the Partnership's Detfi ATIP. Projects to be programmed with federal imoney in the extended will continue to be selected and funded through the existing ATP-3 Partnership process. Projects within the extended selected for funding and inclusion in the Partnership's Dreft ATIP will be transmitted to the Metopolitan Council for inclusion in its metropolitan area TIP.

If an amendment to the Metropolitan Council's TIP is needed prior to the normal annual TIP update cycle, MnDOT District 3 and the Region 7W Transportation Policy Board will submit the amendment request to the Metropolitan Council for consideration and processing.

### Public Participation

Federal Surface Transportation Legislation emphasizes strong public participation in the development of transportation plans and programs. The Partnership's decembralized process for developing its Draft ATIP helps fulfill the split and intent of the legislation. The decision to involve the regional planning partners in the development of the Draft ATIP strengthens the Partnership's public involvement goals. Collectively, these agencies perform a wide array of programs and services that integrate well and contribute to the Partnership's programming activities.

The regional planning partners involved in the Partnership's ATIP development process are responsible for making their products, processes, and services accessible to the public. The organizational shuctures of these bodies provide a fail to various constituencies within the regions they serve. The meetings that are held by these bodies in delivery their programs and services are open and accessible to the public.

MnDOT District 3 utilizes the processes established by these bodies in executing its public participation activities. In addition, MnDOT District 3 staff requisity meets and receives input from the public, local governments, and other special interests in the development and execution of its thruit highway construction program. MnDOT also maintains a robust public involvement process in the development of various agency theraporation plans and studies that are used to help infrom future investments.

in addition to these public involvement activities, the Partnership holds its own set of meetings, meeting on average four times per year. The Partnership posts its annual meeting schedule at both the MADOT District 3 Offices in Baxter and St. Cloud and on the District 3's website. This schedule is approved at the final meeting of the annual ATIP development process and is used to establish the dates, times, and locations for the meetings to be held for the next ATIP update cycle. The present meeting schedule can be found at the following link: <a href="http://mxx.doi.state.mn.usd/3.atabatemeetings.htm">http://mxx.doi.state.mn.usd/3.atabatemeetings.htm</a>.

### AREA TRANSPORTATION IMPROVEMENT PROGRAM DEVELOPMENT

### Genera

The Partnership values the role that the regional planning partners play in identifying transportation needs and priorities. Regions are responsible for participating in the regional solicitation and selection of local projects seeking federal transportation funding and for recommending a prioritized list of transportation needs to the Partnership in the preparation of the Draft ATIP. Eligible projects include all projects requesting funding under Title 23 of the United States Code (USC) (highway) and Title 49 USC (transit). MINDOT District 3 is responsible for overseeing the ATIP development process and ensuring its completion (via the use of the Partnership) in the ATIP-3 programming area.

Federal Highway Administration requires a non-federal match of at least 20 percent of project costs. Regions reserve the right to limit the amount of federal funds being recommended on any local project. Applicants may be requested to exceed the minimum 20 percent matching requirements to maximize and leverage available federal funds targeted to the region. MinDOT permits overmatching of federal funds but mints this type of matching option to only locally-sponsored projects. In these instances, federal participation should not be less than 30 percent as a rule unless approved first by MinDOT and the Federal Highway Administration. State projects seeking federal funds generally are funded at the maximum federal level allowed pursuant to the percicular federal program being pursued and programmed.

Federal Surface Transportation Program (8TP) funds provided to local agencies under the ATP Managed Program provide a flexible source of funding that may be used by cities and counties for projects on any Federal-aid eligible highway or street. They may also be used for bridge projects on any public road and for transit capital requests. Federal and state brunk highway funds provided under the SPP and DRMP are targeted to the MinDOT Districts to ensure attainment toward federal and state performance requirements and district counties.

### ATP Managed Program Development

The project solicitation process generally begins following the publication and release of the STP Guidance, but may commence sooner at the discretion of the Partnership. The STP Guidance provides the Partnership with the STIP development timeline and regional federal funding targets that is necessary for developing the ATP. Regions follow the below steps in developing their list of priorities to recommend to the Partnership for funding under the ATP Managed Programs.

- Sending out federal Partnership application materials and guidance to potential applicants.
- Receiving completed applications from jurisdictions by the solicitation deadline.
- Verifying all candidate projects meet the minimum federal and Partnership eligibility requirements.
- Evaluating eligible candidate projects using region's project assessment criteria and process.
   Recommending a rank-ordered list of projects to the Partnership for programming consideration.

MnDOT District 3 staff and the regions commence the local solicitation activities by distributing complete project solicitation packets to all counties, cities over 5,000 populations, the Mile Lacs Band and Leech Lake Band. Organizations receiving the complete packets are furnished with application guidance and forms to assist them in nominating transportation projects to their respective regions for consideration in the

Regions are responsible for recommending a prioritized list of transportation projects to the Partnership based on their targeted funding levels. While each region has flexibility in setting their investment priorities, they all folious a unified process and schedule set forth by the Penthership in soliciting and selecting projects for consideration in the ATIP. Region 5 and Region TW annually solicit projects for the fourth year of the ATIP, while the ECRDC and the St. Cloud APO solicit every other year to develop a five-year program.

Primary project type categories eligible to receive funding through the ATP process include

- New alignment roadway construction.
- Roadway expansion defined as adding capacity by constructing a new travel lane. Roadway reconstruction.
- Roadway reclamation, reconditioning, and resurfacing.
- Bridge replacement or rehabilitation
- Safety and/or operational improvements.

Applicants are advised that some regions have taken official action to make exceptions on what types of projects may be eligible for federal funding within their region. These regions made these exceptions to emphasize and focus federal funding on those transportation needs important to their areas. The following

- Eligible cities and counties in Region 7W (outside of the St. Cloud APO 20-year planning area) may
- Eligible cities and counties in Region TW (publisher of the St. Cloud APD 20-year planning area) may nominate explicits in any of the primary project type categories listed above. However, they may only nominate Roadway Reclamation projects under the "Roadway Reclamation, Reconditioning and Resunfacing" category. The other these regions are not subject to this restriction.
   Eligible: cities and counties within the St. Cloud APD 20-year planning area may apply for federal funding for Planning. Planning includes those activities occurring before the selection of a preferred alternative. Federal funds may be used for comition studies/planning activities where aspectific construction projects are the intended outcome.
   Eligible: cities and counties within the St. Cloud APD 20-year planning area may apply for federal funding to Steich at Mays (CRUM Exmedition). Equation the SRM is initiated to exchange the theory.
- funding for Right of Way (ROW) Acquisition. Funding for ROW is limited to reimbursement for the costs that were paid for the acquired property (to be based on the Fair Market Value), not the value of the property at the time for which reimbursement is requested. Applicants receiving funding for ROW must initiate construction within ten years from the date of acquisition.

Applicants seeking federal funding under MnDOT's ATP Managed Program must meet certain minimum federal and Partnership eligibility requirements, which are designed to assist the applicant in determining whether their proposed project is appropriate to receive federal funding. These seven eligibility criteria shown in Table 4 should be used by the regional planning partners in screening and evaluating candidate

|   | CRITERIA                                       | DEFINITION   |
|---|--|--|
| 1 | Existing ADT                                   | This is the everage daily traffic (ADT) computed for the most recent count for the roadway.<br>Twenty year ADT is used for non-existing roadways and expansion projects.   |
| 2 | Minimum Functional<br>Classification           | This is the minimum functional classification for a roadway in order for it to receive federal funds   |
| 3 | Minimum Federal Fund<br>Request                | This is the minimum emount of federal funds that may be requested for the project. Project<br>provides federal funding require extensive amounts of documentation and investigation do<br>project development. Projects should be of a certain responde to effectively optimize the use of<br>federal funds. Otherwise, the administration and development costs may exceed the benefit of<br>the federal funds that are being requested for the project.  |
| 4 | Project in Existing Plan<br>or Program         | Project must be consistent with state, regional, and local long-range plans, including plans and studies prepared by the RDC or MPO or a locally adopted capital improvement plan.   |
| 5 | Assured Coordination<br>with All Jurisdictions | Proinch that cross multiple local coverment units must be accommend to a letter and/or official action indicating all affected local units of government as in agreement with the concept of the proposed project. This is to make sum that projects have the support of the local units of government, which potentially have a velo power over that project.   |
| 6 | Assured Local Metch                            | Applicant must provide assurance that they have secured the recessary local match for their project. The local match is minimum of 20 percent of the total project cost for which federal hunds are being requested and any additional costs not covered by federal funds recessary to complete the project as proposed in the application.  |
| 7 | Movement of People<br>and Freight              | Project must demonstrate that it improves the movement of people and freight. Regions will utilize information from Section 7 (Project Qualifications) of the application to make this information to the special project of the spec |

In addition to the Table 4 requirements, Table 6 establishes the minimum project requirements by project investment category (roadway, bridge, and safety) that must be met by local agencies to qualify for STP federal funds. Project proposers must meet all requirements associated with the investment category for which funding is being sought.

Central Minnesote Area Transportation Partnership: Operations and Policy Manual

Applicants seeking federal funding under the ATP Managed Program will need to complete a separate \*Local Burface Transportation Program Funding Application\* for each road or bridge project they with to submit. Transit capital requests seeking ATP Managed Program funding, though eligible, will not use this application but will instead be referred to the District 3 Transit Providers Committee to determine project eligibility and need.

Regions are responsible for reviewing and evaluating the applications they receive from local agencies for funding under the ATP Managed Program. Regions are required to evaluate each project according to the seven project qualification factors included in the application, which are as follows:

- Access and Mobility
- System Connectivity Multimodal
- System Condition
- Safety
- Economic Vitality

Regions have discretion in what methodology they wish to use in their application review and evaluation process, such as whether to use a quantitative or qualitative approach or a combination thereof. Regions may incorporate additional factors (beyond the seven noted above) to include in their evaluation process if they feel doing so will help determine the merits of each proposed project. If they elect to do, they should ensure the tools and/or methodology used is coordinated with their application practices and procedures. Regions are required to rank their local project submittals after completing their evaluation of the applications. Transit capital requests, if any, must be considered in the region's renking. The rank-ordered list should be fiscally-contreled according to the federal funds targeted to the region by the Partnership. The rank-ordered list may show local project requests exceeding the region's targeted amount if the region withes to establish an overall ranking for all of the projects that were submitted.

Local agencies must submit a local resolution of commitment for each project being recommended for location for both ATIP. The local resolution must be specific to the project being programmed. Language in the resolution must include the local agency's commitment to the project scope and description and the local matching funds needed to leverage the federal funds. Resolutions must include language whereby the local agency agrees to cover any additional costs beyond the programmed amounts that may be necessary to complete the project as submitted in the application. Resolutions must be until tied we receive the commended by the region to the finalization of the Dreft ATTPESTIP to ensure local commitment toward the project. Local agencies may submit their resolutions at the time of application or after the project is recommended by the region to the Partnership for inclusion in the Draft ATTP.

### Transportation Alternatives Program Development

Transportation Alternatives Program (TAP) projects are selected under a different application process and selection criteria than that used for the ATP Managed Program. The TAP is administered jointly between the MINDTO Central Office and the ATPs as part of competitive application process. Applicants interested in applying to the TAP must first complete a Letter of Intent (LOI) to determine their eligibility and preparedness. Regions send out full applications to applicants in their area who have completed the LOI. meet the basic eliability requirements, and successfully demonstrate potential to receive funding from the

The Partnership through its TAP Committee has developed a TAP Application, entitled the "Full Application" for use in ATP-3 to supplement the LOI administered centrally by MinDOT. The application requires applicants to provide information about their proposed project's description, budget, schedule, and eligibility. Applicants must also furnish nametive responses to provide additional project details and to respond to several criteria that will be used later by the TAP Committee in technically evaluating and

Regions are responsible for establishing a process for reviewing and ranking the TAP applications they receive. In reviewing each application, regions should consider information and responses to the criteria in the application in determining each projects eligibility and renking. The region's scoring of the applications provides a basis for each region to establish their individual regional TAP printform.

Each region is granted floorus? points that they may use to help advance their top two regionally-significant projects in the Partnership's process. Regions are allowed to add ten floorus? points to their most regionally-significant project and five "bonus" points to their second most regionally-significant project. Awarded bonus points are applied to the project score when the TAP Committee meets to conduct its evaluation of the applications submitted for the entire ATP-3 area.

Following review by the region, the TAP Committee meets to evaluate and score the TAP applications. Members on this committee are asked to review and score each application based on scoring criteria and

methodology previously established by the Committee. Regional planning staff represented on the TAP Committee is responsible for bringing mer list of priority projects to this meeting with knowledge of each project requesting funds. Member scores for each application are installed together to determine an everage technical score for each project. Any bonus points recommended by the region are then added to establish a final application score.

Final application scores provide the basis for determining the ranking of TAP applications by the TAP Committee. The rank-ordered list should be fiscally-constrained according to the federal TAP funds that are expected to be available for the gluen fiscal year being programmed. The list should include the ranking of projects exceeding the available funding to establish an overall ranking for all of the TAP projects that were submitted and reviewed. The TAP Committee forwards its rank-ordered list of projects to the Partnership's ATIP Committee for consideration in the Dreft ATIP.

### Transit Vehicle Capital Funding Requests

The Partnership's Trensit Committee reviews the trensit capital requests requesting federal highway funding. This committee has established a Public Trensit Management System (PTMS) to forecast future trensit version needs. PTMS monitors the useful life of all trensit vehicles within the ATP's programming area. Useful life is evaluated according to each vehicle's classification, age, mileage, and condition. The committee uses the information from the PTMS in recommending the bransit vehicle capital requests that they propose for inclusion in the Dreft ATIF. The committee's recommendations are then forwarded to the regions where they are considered for federal funding under MinDCT's ATP Managed Program. Large bus capital vehicle requests for Small Urban systems are funded controlly by the MINDCT Office of Transit.

### MnDOT District 3's Program Development

MinDOT District 3 receives federed and state funding for developing its four-year construction program to be included in the Dreft ATP through MinDOT's Statewide Performance Program (DRPP) and the District Risk Management Program (DRMP). The SPP funds are eliocated to the districts based on the investments necessary to achieve MinSHIP performance targets established for pevement and bridges on the designated National Highway System (NHB). The NHR Includes Interstates, most U.S. highways, and other noutes functionally classified as a principal enterial. Selection of projects for the SPP Involves collaboration between the MinDOT district offices, specialty offices, and the central office.

DRMP funds provided to MnDOT District 3 for improvements primarily on non-NHS roadways (e.g., routes functionally classified as minor arterials and below) though improvements to NHS routes with these funds may be allowed. Project selections are evaluated attendate through a collaborative process to ensure each district to balancing district-level risks while making progress toward statewide goals. The DRMP focuses on povement, bridge, and roadside infrastructure on lower-volume roads; and is responsible for funding the majority of safety and mobility projects proposed by the district.

MnDOT District 3 begins its process for identifying new projects to be added into the fourth year of the ATEP by reviewing the planned investments included in its ten-year capital highway work pian, which includes the first bour years of the STEP and years five thru ten which constitute the remainder of the work pian. MnDOT views projects in the STEP as commitments while projects in years five thru ten have more uncertainty but are planned to be delivered.

Central Minnesote Area Transportation Partnership: Operations and Policy Manual

22

The district's ten-year capital work plan is updated annually and contains a listing of the district's transportation investments by year that have been identified to help MinDOT meet its required national and statewide performance baryets as well as other transportation goals. The planned investments identified in the work plan have received prior concurrence from MinDOT Central Office and the appropriate Specialty Offices as part of the annual update cycle.

Functional group leaders with responsibility for pavements, bridges, traffic and safety, and maintenance in the dishict are responsible for reviewing the projects in the work plan and recommending any changes or adjustments to the program that may be necessary. After verifying the projects and activities to be recommended for both SPP and DRMP funding, dishict planning staff organize a meeting with key leaders to discuss changes to the program and seek agreement on the projects to recommend for advancement into the ATIE.

Proposed projects recommended for further programming consideration are assigned a project manager. Project managers are responsible for conducting a pre-program scoping of the projects they are assigned to determine a more definitive scope and cost for the project. Individuals from other functional groups within the district are given the opportunity to provide input into scoping decision for the proposed project. Project managers consider this input in finalizing the scope and cost for the projects. District planning staff ensures the proposed program is properly vetted internally and that the program remains fiscally-constrained.

Programming of funds for several set-aside categories is also determined as part of the development of MinDOT District 3's four-year construction program. Setasides are necessary for delivery and support of the district's overall construction program. Setaside categories generally include the following: right of way, supplemental agreements and cost overaries, cooperably construction agreements for participation in local projects, landscape partnerships, road and bridge repair and rehabilitation, and miscellaneous activities associated with construction (i.e., detours, utilities, etc.) These activities are generally funded with state trunk highway funds provided to MinDOT District 3 through the DRMP.

MinDOT District 3 staff performs the renkling of trunk highway projects. Functional group leaders, responsible for recommending the projects to be programmed, rank the projects they have identified. Each group leader uses a different set of criteria to rank projects within their area of responsibility. They use these criteria to develop a rank-ordered listing of projects that will be used later for integrating MinDOT's program and the local program in development the Dreft ATIP.

Following the development of its proposed program, MnDOT District 3 provides its listing of recommended projects for the fourth year of the program along with changes to existing programmed projects that will be included in the district four-year construction program and the Denti ATIP.

### Merging Regional Transportation Priorities

The Partnership has agreed to respect the priorities established by each region as long as the recommended projects meet federal, state, and ATP-3 eligibility requirements for inclusion in the Draft ATIP. The Partnership's ATIP Development Committee is responsible for reviewing the transportation priorities of the regions and MnDOT District 3 and integrating these priorities into a Draft ATIP to recommend to the full Partnership.

Central Minnesota Area Transportation Partnership: Operations and Policy Manual

23

The ATIP Development Committee initiates this process by reviewing the rank-ordered lists seeking federal funds under the ATP Managed Program submitted by the regions. After reviewing the lists, the Committee establishes a process for merging the locality-prosnored projects, ensuring the process does not violate regional priorities. Upon deciding on an acceptable process, the Committee proceeds to merge the projects. It continues to merge the regional lists until the federal funding targeted for locally-sponsored transportation projects to financially-constrained to the levels allowable in the STIP Guidance.

The Committee continues to prioritize the list of local projects exceeding the target level in the STIP Guidance. This is done so that projects are identified for possible advancement in the event additional redeems funds become available to the Partnership that must be programmed prior to the next ATIP update cycle. It should be noted that these projects will need to be amended into the STIP if they are allowed to be advanced because of the announcement of additional funding. If funding is not forthcoming for these projects, project proposers are reminided that they will be required to re-submit their applications for these projects if they with to be considered for federal funding in future ATIP development processes.

After local projects have been merged, the ATIP Development Committee establishes a process for Integrating MinDOT Dishkid 39 proposed brush highway program with the rank-ordered list of local projects. Since the state projects receiving funding under the SPP are determined certainly, these projects are not integrated with the local projects in the program. Only the projects seeking federal funding under the DRIAP are integrated. Integration of the state and local program is accommistived using the quartile method of merging projects to ensure an equitable and fair dishibution of federal funding by jurisdiction throughout

The Partnership completes the ATIP development process by holding a meeting to review and approve the Draft ATIP recommended to it by the ATIP Development Committee. The Draft ATIP is then recommended to the MinDOT District 3 Transportation District Engineer, who reviews the document and forwards it, along with any changes or comments, to MinDOT Central Office for inclusion in the Draft STIP. The Partnership is provided an opportunity to review and comment on its element of the Draft STIP before the document is approved by the MinDOT Commissioner and forwarded to the Federal Highway Administration and Federal Transit Administration for review and approval.

### MINNESOTA TRANSPORTATION REVOLVING LOAN FUND

Minnesota established a Transportation Revolving Loan Fund (TRLF) in 1997 in response to federal legislation calling for the creation of State Infrastructure Banks. The purpose of the TRLF is to attract new funding into temporation, to encourage innovative approaches to francing temporation projects, and to help build needed transportation infrastructure by providing low-cost financing to eligible borrowers for transportation anglets.

Eligible applicants include the state, counties, cities, and other governmental units with projects eligible for federal-aid funding as set forth under Title 23 of the United States Code and Minnesota Statutes 446A.085, subdivision 2 (1998). Eligible projects include (but are not limited to) need and bridge maintenance, repair, improvement, or construction; acquisition of right of way; rail and air safety projects; enhancement items; transit capital projects; and pre design studies.

MnDOT Central Office is responsible for soliciting new TRLF project proposals. The application period is contingent upon the belance in the TRLF account. All proposals for TRLF projects must go through MnDOT's ATP process. The Pratmenship is required to evaluate, approve, and prioritize the applications that are submitted in the ATP-3 area. If the TRLF project is located within the APO's 20-year planning area, the APO must approve the application and place it in its TIP if the request is approved by the Partmenship and MnDOT for Inclusion in the STIP.

Federal funds may be used for TRLF loan repayment. If federal funds are used in this manner, they may only be requested and programmed in the year following the program year that TRLF funds are being requested or any successive year thereafter. For example, if a TRLF loan its being oscipt for the third year of the four-year ATIF, applicants can only request federal funds through the region for the fourth year of the program. Applicants should not assume federal funding as a paybeck source for their TRLF proposal until funding has been committed and included in the STIF.

Applicants seeking federal funding should make their request for the early years of the loan repayment to avoid long-term obligations of these funds by the Federathip. Regions must agree to commit future federal allocations if the TRLF application is approved for funding. Any federal funds that are committed for ioan repayment will count against each region's local federal funding sub-target. If a region declines to commit future federal funds toward the financing of the oppicst, the applicant will be existed if they with to confinue to pursue the project without federal funds and will be given an opportunity to resubmit their application.

The Partnership is required to review and rank the TRLF applications they receive regardless of the proposed loan repayment funding sources. The ranked proposals are then included in the STIP by amendment or as part of the normal breft ATIP update cycle. This action authorizes MnDOT District 3 Planning and Programming but staff to submit the individual TRLF applications, along with any other supporting documentation, to MnDOT Central Office for further consideration.

MinDOT Central Office applies certification evaluation criteria provided in administrative nules and the handbook accompanying the application. Central Office submits its recommendations to MinDOT's Transportation Programming Investment Committee (TPIC) for certification and final approval by the Minnesota Public Facilities Authority (FFA). A project does not receive final funding approval until it has been certified by MinDOT and a loan has been approved by the FFA.

### AREA TRANSPORTATION IMPROVEMENT PROGRAM MANAGEMENT

### Overview

MnDOT District 3 staff is primarily involved in the day-to-day management of the ATIP. Management activities include ensuring the implementation of MnDOT District 3's trunk highway program and the the locally-sponsored federal projects in the ATIP. The MnDOT District 3 illenning and Programming Unit is responsible for managing the trunk highway program and the MnDOT District 3 state Aid Engineer, with input from regions and affected local agencies, is responsible for managing the local projects in the ATIP.

While the overall responsibility for managing the ATIP rests with MnDOT District 3, the Partnership has approved guidance and policies to assist in managing changes affecting projects that have been selected

for implementation in the ATIP. Possible changes to the ATIP include: dealing with revisions to project cost, estimates; manging changes in project scope; and managing increases or reductions in federal funding. The level of direct Partnership involvement may very depending on the change that is being requested.

The Partnership has adopted the following general policies to ensure the orderly delivery of projects and management of the ATIP.

- The project development process shall be initiated as soon as possible after final STIP approval.
- Local jurisdictions should provide an annual update to their respective region and the District 3.
   State Aid Engineer regarding the project development status for their programmed projects.
- Local jurisdictions should provide cost and project delivery updates on programmed projects to their respective region and the District 3 State Aid Engineer during the annual project solicitation
- A local project may be granted a maximum of two deferrals from its original program year.
  - The District 3 State Aid Engineer may grant the request, provided the deferred does not adversely affect other projects in the ATIP.
  - If granting the request does adversely affect other projects in the ATIP, the Partnership shall consider the request.
- A local project requiring a third defense from its original program year shall be removed from the
  ATIP. The lead agency for the project will be directed by the Partnership to utilize an alternative
  funding source, or re-compete for funding.
   Regions with a local project that has been removed from the ATIP because of project delivery
- Regions with a local project that has been removed from the ATIP because of project delivery failures or eligibility shall be grented the first right of refusal for programming new projects with the unexpended funding.

### Managing Revisions to Project Cost Estimates

A revision to a project cost estimate can occur at any time during the course of project and plan development. If it important for cost estimates to be kept accurate and up-to-date in the ATIF to avoid project delays, unanticipated costs, and amendments that could delay project implementation. In most cases, changes to cost estimates should be captured and documented as part of the Partnership's annual Dmit ATIF undert propers.

The Partnership considers federal funds for local projects to be "capped" once they have been programmed in the ATIP. Local agencies must submit a local resolution of commitment for each project it has programmed in the ATIP whereby it must agree to the project scope and to cover any other additional costs beyond the programmed amounts that may be necessary to complete the project as submitted in the readingation.

The Partnership has developed guidance that provides a process for considering local requests to increase the federal funding amount for a programmed project when the overall cost of the project is expected to increase. For MinOOT sponcode projects, the Partnership has geneted MinOOT Diskst 3 the authority to approve increases such as these for its projects as long as such action does not adversely affect locally-sponsored projects in the STIP. This is not to preclude other MinDOT projects from adversely being affected by the action.

Central Minnesote Area Transportation Partnership: Operations and Policy Manual

25

28

For local projects, the Partnership has granted regions the discretion and authority to commit their future federal largeted funding to cover increases. The local agency seeking additional federal funding would initiate its request as part of the Partnership's annual Dreft ATIF development cycle. If a region agrees to the increase, the local project sponsor would agree to upfront any costs for the overnun and be reimbursed in the year specified by the region. Regions may not exceed their targeted funding level in approving such requests and there can be no guarantee or reimbursement. Further, granting such a request shall not adversely affect funding to any state or local project in the ATIP.

### Managing Changes in Project Scope

Changes in project scope are discouraged by the Partnership as changes in project scope can result in project cost increases. They also indicate premeture submittal of the project for programming in the STIP by the project proposer. This can interfere with priority setting by the regions and MinDOT in recommending the best projects to include in the Dreft ATIP for federard funding. He recommended scoping changes are significant enough to change the project description, an amendment to the STIP may be also be required in order to authorist the project. If the change in project scope does not significantly after the programming category of the project for which it was included in the STIP, an amendment would not be required but a modification may be necessary.

The Partnership provides a process for considering scoping changes to projects programmed in the STIP. Changes in scope for a locally-

sportsored project will require approval by the region. Without this approval, the project may be removed from the STIP or the local agency will be held to the original scope or, if approved, may be required to assume all increases in the project costs resulting from the scoping change. For MinDOT projects, MinDOT District 3 will maintain a process for considering scoping changes to the projects in its four-year highway constitution program.

### Managing Increases and Decreases in Federal Funding

The STIP is prepared based on estimates of available federal and state transportation funding. These estimates can vary from year-to-year based on MinDOT's financial forecasting assumptions, which, in turn, can affect the funding targetest to MinDOT District 3 and the Partimetrally. The Partimetrally has adopted policies to manage changes in federal funding to ensure that projects in the approved ATIP can be immelmented.

To manage increases in federal funding, the ATP has adopted a policy to advance projects included in that ATIP by year and then by priority. Before advancing a project, the District 3 Sittle ALB Engineer should notify the project sponsor for appropriate authorization as the advancement could likely affect the local agency's project development schedule. If projects in the approved ATIP cannot be advanced in sufficient numbers to menage the federal funding increase, the Pretreathph shall maintain a list of projects that represent projects that were ranked beyond the federal levels authorized in the STIP for the last year of the ATIP. All consider them to advancement in the ATIP. Since these projects were not in an approved STIP, an amendment to the STIP would be required before advancement could be authorized.

Central Minnesota Area Transportation Partnership: Operations and Policy Manual

2

To manage reductions in federal funding, the Partnership has adopted a policy to delay or defer projects in the ATIP. This is initiated by the District 3 date Ald Engineer first asking sponsoring agencies with projects in the ATIP to voluntarily defer their projects. If projects cannot be identified in sufficient numbers to manage the funding decrease through this voluntary process, the Partnership shall be authorized to defer additional projects by priority order (descending) to move to the foliowing year, and would continue this process until such time that the ATIP to fiscally-contablend according to the new federal funding estimate.

### STIP Amendments and Administrative Modifications

Amendments to the STIP are needed for a variety of reasons, including but not limited to the following examples:

- A project is not listed in the current, approved STIP and must be added to the current (1<sup>st</sup>) year.
- There is an increase in the total cost of the project warranting an amendment.
- A phase of work (preliminary engineering, right of way, construction, etc.) is added to the project and increases the project cost.
- The project scope is changed (e.g., for a bridge project, changing rehab to replace; or for a highway projects, changing from resurface to reconstruct etc.).
- There is a major change in the project terminilength warranting amendment.

The Partnership has worked to clarify its amendment requirements, streamline the decision-making process, and minimize potential delays to projects that would otherwise require formal action by the Partnership. The policy provides guidance on when formal action by the Partnership is required to amend the STIP and when such action is not warrented. The policy is as follows:

### When Partnership Action is NOT REQUIRED:

- The total cost of a project increases to warrant an amendment under MnDOT Central Office guidance. The increase is not caused by a scope change. The lead agency agrees to fund the difference in project cost. Flocal constaint of the ATIP is meintained. For state projects, MnDOT District 3 may approve cost and scope changes so long as local federal projects are not adversely
- There is a minor change in the scope of a project whereby the changes to the project scope remain consistent with the original intent of the programmed project. The lead agency agrees to fund the difference in project cost. Plose constaints of the ATIP is maintained.
- The scope of a local project is changed to warrant an amendment under MnDOT Ceribal Office guidance. The proposed scope is significantly different from the original programmed project. The region (e.g., RDO or MPO) originally responsible for ranking the project agrees with the change. Fiscal constraint of the ATIP is maintained.
- 4. The scope of a project is changed that also affects the overall total cost of the project. Both of these changes meet the amendment requirements under MinDOT Central Office guidance. The region (e.g., RDC or MPO) originally responsible for ranking the project agrees with the changes. The lead agency agrees to fund the difference in project cost. Fiscal constraint of the ATIP is maintained.
- Advancements and deferrals of local projects recommended by the District 3 State Aid Engineer necessary to maintain fiscal constraint of the local federal aid program in the first year of the ATIP.

- Advancements, deferreis, and additions of the state trunk highway projects recommended by MNDOT District 3 to maintain facel constraint of the state trunk highway construction program in the first year of the ATIP.
- 7. A new project is being recommended for inclusion in the STIP, whereby the funding source(s) for this project do not involve the use of federal formula funds targeted to the Partnership. These projects may include federal high priority, appropriations, and earnask projects determined by Congress and the President; FTA Section 5309 transit capital projects; Public Lands; Forest Highways, Scenic Byways, and various state funded projects determined by the State Legislature and Governor.
- 8. A new project is being recommended for inclusion in the 8TIP, whereby the Partnership is not granted the opportunity to participate in the project solicitation and selection process. These types of projects include those listed in litera 3, but may also include any federal or state funded projects where MinDOT is chiefly responsible for project selection. Recent examples include projects funded by the American Recovery and Reinvestment Act, Minnesola Chapter 152, Certain Allocated Funds, Safe Routes to School, Highway Safety Improvement Program, etc.

### When Partnership ACTION IS REQUIRED:

- 1. The scope of a local project is changed to warrent an amendment under MinDOT Central Office guidance. The change in scope is significantly different from the original programmed project. The lead agency is not seeking additional federal funding. The region (e.g., RDC or MPO) responsible for originally ranking the project does not agree with the scope change. The lead agency is appealing the region's decision. The Partnership meets to consider the request and takes action as it deems appropriate.
- 2. The total cost of a project increases to warrant an amendment under MinDOT Central Office guidance. The change in total project cost may affect either the original programmed project or is caused by a scope change to this project. The lead agency is seeking additional federal formula funding from the Partnership to cover the difference. The Partnership meets to consider the request and, if approved is granted, ensures facal constraint of the ATT is maintained.
- 3. The Partnership experiences an increase or reduction in its federal funding target that cannot be addressed as part of its normal ATIP update process. The Partnership is asked to manage the increase or reduction in federal funding to ensure facial constaint of the ATIP is maintained. The changes required to the program are complicated and do not otherwise neatly conform to the Partnership's existing policy on managing increases and reductions in federal funding. The Partnership meets to consider these requests and takes action as it deems appropriate.
- Any unforeseen requirements necessitating an amendment that is not already covered by this solling.

### Linking Projects in the STIP

Sometimes one or more jurisdictions may have projects that are programmed in different years of the ATIP. In some cases, these projects may be closely field to each other by proximity, work type, need, etc. Sponsoring agencies may wish to link these projects together so the projects may be implemented in the same programming year. Justification for such requests might include coordination of construction activities, reducing imperiments caused by detours to the traveling public, improved coordination between jurisdictions, cost savings, etc. Local agencies may make a formal request to the Partnership to link two or more projects programmed in different years with one another in one program year. Before the Partnership

ers such requests, the local agency is required to provide sound justification to justify their requests. The Partnership will be responsible for ensuring the approval of these requests do not adversely impact other projects in the ATIP without the consent and approval of the other agencies that might be affected by

### GLOSSARY

Definitions that are germane to the understanding of this manual are listed below. The definitions are intended to establish consistency in the interpretation of the various terms used throughout this document as well as other commonly used transportation terms.

Aggess/Aggessibility - The opportunity to reach a desired location within a certain time frame, without being impeded by physical or economic barriers

Americans with Disabilities Act (ADA) – 1990 federal act provides a framework and approach for ending discrimination in employment and access to services against persons with disabilities. The goals of the ADA are to assure that persons with disabilities have equality of opportunity, a chance to fully participate in society, are able to live independently, and can be economically self-sufficient

Area Transportation Improvement Program (ATIP) - The Area Transportation Improvement Program (ATIP) covers four years and includes all state and local projects financed with federal highway or transit on the profession of significant projects; and all projects instructive with received implies of seasons assistance; other regionally significant projects; and all projects on the bunk highway system. Each Area Transportation Partnership prepares a Draft ATIP for consideration and inclusion in the State Transportation improvement Program (STIP). Once in the STIP, projects from the ATIP become eligible for federal transportation funding.

Area Transportation Partnership (ATP) - Groups that have been established in each of MnDOT's eight district areas to integrate state and local priorities and recommend area-wide transportation investment to a minimum four-year program.

Area Transportation Partnership (ATP) Managed Program – The ATP Meneged Program consists of federel funding distributed to ATPs for local agencies to fund qualifying transportation projects under the Surface Transportation Program (STP) Urban, Simal Urban, and Rurel population programs. Distribution of funds to the ATPs is accomplished based on the following factors:

- 50% Distributed by ATP population consistent with the most recent census, distributed by the definitions for rural, small urban, and urban as defined by federal transportation planning regulations.
- 50% Distributed by the average of the ATPsI county and municipal state aid needs as calculated by MnDOT's State Aid for Local Transportation process.

Bikeway - A facility intended to accommodate bicycle travel for recreational or commuting purposes. not necessarily separated facilities; they may be designed and operated to be other travel modes.

Busways - A two-lane facility (one lane per direction) on exclusive right of way dedicated for buses only. Grade separation at high volume cross streets and gate crossing arms at low volume crossings are assumed.

Central Minnesote Area Transportation Partnership: Operations and Policy Manual

32

Central Minnesota Area Transportation Partnership: Operations and Policy Manual

Carbon Monoside Nonattainment Area - The Twin Cities area is part of a nonattainment area for carbon monoside emissions from transportation sources. The designation and area affected is based on national carbon monoxide standards. A portion of this area extends into eastern Wright County

An arrangement where people share the use and cost of privately owned automobiles in traveling to and from pre-arranged destinations.

Circulator Service - A means of movement provided within a major activity center (such as a regional business concentration or community) for going from place to place within the center, such a system may be entirely pedestrian or may use transit.

Collector Streets - The streets that connect neighborhoods to regional business concentrations

Complete Streets - The planning, scoping, design, implementation, operation, and maintenance of roads in order to reasonably address the safety and accessibility needs of users of all ages and abilities. Complete sheets considers the needs of motorists, pedestrians, transit users and vehicles, bicyclists, and commercial and emergency vehicles moving along and across roads, intersections, and crossings in a manner that is sensitive to the local context and recognizes that the needs vary in urban, suburban and rurel settings.

Congestion Mitigation and Air Quality (CMAQ) - The CMAQ progrem is continued in MAP-21 to provide a flexible funding source to State and local governments for transportation projects and programs to help meet the requirements of the Clean Air Act. Funding is available to reduce congestion and improve air quality for areas that do not meet the National Ambient Air Quality Standards for ozone, carbon monoxide or particulate matter (nonattainment areas) and for former nonattainment areas that are now in compliance (maintenance areas). Currently only the Metro District/Met Council is eligible for these funds.

Context Sensitive Solutions — A collaborative, interdisciplinary approach to building transportation facilities that if their settings. It is an approach that does to preserving and enhancing scenic, sestimate, hotolock, community, and environmental resource, while improving or maintaining setty, mobility and Infrestructure conditions.

Control Section - A segment of the state highway road system that is divided into shorter, m manageable parts for record keeping within MnDOT.

Corridor Investment Management Strategy (CIMS) — CIMS is a confidor-based initiative that brings MnDOT together with its local, modal, and state partners to identify opportunities for collaborative and innovative investment, it offers a means to share information and identify opportunities to apply MnDOT's suite of lower cost, high benefit investment strategies that address safety, access and mobility

Cost-Sharing - A contractual arrangement whereby a local unit of government or other governmental body enters into an agreement to pay for part of a physical facility or a service; includes subscription transit service.

County Road (CR) - Roads locally maintained by county highway departments in Minnesota; span a wide variety of road types, varying from A-minor arterials that carry large volumes of traffic to an improved road.

County State Aid Highway (CSAH) – Specialized form of county road that is part of the state aid system. County State Aid routes are eligible for funding from the County State Aid Highway Fund.

Demand-Responsive Service - A para-transit service in which the passenger either phones or halls the vehicle and shares the vehicle with other passengers (for example, taxi, Jitney, dial-a-ride).

Developing Area - The developing area is that portion of the region that is in the path of urban growth. It includes the communities beyond the fully developed area up to the metropolitan urban service area

Dial-A-Ride - A demand-responsive service in which the vehicle is requested by telephone and vehicle routing is determined as requests are received. Origin-to-destination service with some intermediate stops is offered. Dial-A-Ride is a version of the taxicab using larger vehicles for short-to-medium-distance trips in lower-density sub-regions.

Distriot Risk Management Program (DRMP) - The District Risk Management Program is the new name for MnDOT's share of the State and Federal Target Formula funds provided to the Districts. The distribution is based on the following factors:

- 20% Non-Principal Payement Needs
- 30% Trunk Highway Lane Miles
   24% Trunk Highway Vehicle Miles Traveled (VMT)
- 6% Trunk Highway Heavy Commercial Vehicle Miles Traveled (HCVMT)

The "Needs" factors are updated each year.

Environmental Justice - 1994 executive order that requires analysis of the effects of federally funded programs, plans and actions on racial minority populations and low-income populations.

Fixed-Route Transit - A service that follows a specified route of travel with identified stops for passengers and an established schedule; regular-route transit.

Federal Highway Administration (FHWA) - Federal agency that administers federal funds and issues policy and procedure timetables for implementation of federal legislative directives; however, they do not have a direct role in the development of urban transportation plans or their development. The FHWA use Transportation Systems Management's (TSM) continuous count data, annual average daily traffic (AADT), and vehicle miles traveled (VMT) estimates in federal-level travel analysis and determination of funds.

Functional Classification - Functional classification is the grouping of streets and highways into classes or systems according to the character of service they are intended to provide. Basic to this process is the recognition that most travel involves movement through a network of roads. Functional classification defines the role that any particular road or street plays in serving the flow of trips through an entire network. Funotionally Obsolete - A bridge that was built to standards that do not meet the minimum federal clearance requirements for a new bridge. These bridges are not automatically rated as structurally deficient, nor are they inherently unsafe. Functionally obsolete bridges include those that have sub-

Grade Separation - Intersection of treffic by provision of crossing structures, underpasses or overpasses;

Greater Minnesota - The area of Minnesota that lies outside the seven-county Metro Area

Highway Performance Monitoring System (HPMS) – The national level highway information system that includes data on the extent, condition, performance, use and operating characteristics of the nation's highways. The Office of Transportation System Management submits state-level traffic data to HPMS on a

Highway Safety Improvement Program (HSIP) - HSIP is a federalaid funding program designed to reduce traffic fatalities and serious injuries on all public roads. The object of this program is to identify, implement and evaluate cost effective construction safety projects. HSIP is formerly known as Hazard Elimination Safety (HES).

Infrastructure - Fixed facilities, such as roadway or reliroad tracks:

Interregional Corridor System - The system designated by MnDOT that provides efficient connections between regional trade centers. It is comprised of 2,980 miles if highways, which represents only two percent of all roadway miles in the state. However, this small

percentage of highways accounts for one- third of all vehicle miles traveled. The goal of the ini Corridor System is to enhance the economic vitality of the state by providing safe, timely and efficient movement of goods and people.

Intermodal - A concept generally defined as a "seamless" delivery of height by more than one mode from point of origin to point of destination. The delivery is accomplished under one bill of lading, but may include truck/hall/truck, trucklain/truck, or truck/hall/tressel.

Level of Service - As related to highways, the different operating conditions that occur on a lane or roadway when accommodating various trefit volumes. It is a qualitative measure of the effect of trefit flow factors, such as speed and travel time, interruption, freedom to maneuver, driver comfort and convenience, and indirectly, safety and operating costs. It is expressed as levels of service "A" through "F."
Level "A" is a condition of free traffic flow where there is little or no restriction in speed or maneuverability caused by presence of other vehicles. Level "F" is forced-flow operation at low speed with many es, with the highway acting as a storage area.

Central Minnesota Area Transportation Partnership: Operations and Policy Manual

Legislative Route - A highway number defined by the Minnesota State Legislature. Routes 1 to 70 are constitutional routes and route numbers greater than 70 may be added or deleted by the Legislature

Life-Cycle Maintenance - Concept of keeping a facility useable at least through its design life by conducting scheduled maintenance.

Local system roads - Any road not on the Interstate or Trunk Highway system can be designated as a CSAH (County State Aid Highway), CR (County Road), MSAS (Municipal State Aid Street), township, or municipal road.

Major Construction - Roadway Improvements that Increase the operational characteristics of a highway facility, including decreasing congestion, increasing operating speed and reducing

MAP-21 Moving Ahead for Progress in the 21# Century Act MAP-21 is a two-year transportation act that establishes federal assistance to the states through September 2014. It also restructures core transportation programs and institutes a performance-based transportation program. Note: MAP-21 replaces SAFETEA-LU, the 2005 Federal Transportation Act.

Metro Area - The seven-county Twin Cities Metropolitan Area comprised of Anoka, Carver, Dakota, Henneoln, Ramsey, Scott, and Washington counties

Metropolitan Planning Organization (MPO) - Regional planning agency designated by law with the lead responsibility for the development of a metropolitan area's transportation plans and to coordinate the transportation planning process. All urban areas over 50,000 in population are required to have an MPO if the agencies spend Federal funds on bensportation improvements. There are eight Mebopolitan Planning Organizations in Minnesota. Primary functions of an IMP Include: maintain a long-range bansportation plan, develop a Transportation improvement Program (TIP), and develop a Unified Filanning Work Program

Municipal State Aid Street (MSAS) - Similar to the County State Aid system, this is a system of designated municipal streets in cities above 5,000 in population that are not already on the state highway or CSAH systems. Municipal streets on the MSAS system are eligible for funding from the Municipal State

Minnesota State Highway Investment Plan (MnSHIP) - The 20-Year Minnesota State Highway Investment Plan 2014-2033 supports the guiding principles from the Minnesota GO vision and link the policies and stetlegies laid out in the disternate Mullimodal Transportation Plan to improvements on the state highway system. The state highway system is a network of roads that includes interstates, U.S. highways, and state highways. MinOOT maintains the state's 12,000-mile highway system. MinSHIP guides future capital improvements on Minnesota's state highway system over the next thenty years; it will not affect local or county roads.

Central Minnesota Area Transportation Partnership: Operations and Policy Manual

Mixed Use - Refers to a variety of land uses and activities with a mixture of different types of development all clustered within about one-quarter mile or within 40-to-160 acre areas, in contrast to separating uses, such as job sites, retail and housing.

Mobility - The ability of a person or people to travel from one place to another.

Mode - Different forms and means of transportation for moving people and freight. Examples include highways, transit, rall, air, waterways, bicycles, and pedestrian.

Multimodal Link - The connection between two or more passenger transportation methods (such as

National Highway System (NHS) - The National Highway System (NHS) consists of roadways important to the nation's committy, defence, and mobility, and was developed by the Department of Trensportation (DOT) in cooperation with the states, local officials, and metopolitan planning organizations (MPOs). Moving Ahead for Progress in the 21st Century (MAP-21) has elevated the priority of the NNS system by increasing the share of federal aid dollars targeted to the system and by requiring regular reporting of performance for the condition and the function of this system. MAP-21 submictes funding for five formulae of which is the National Highway Performance Program (NHPP). The NHS Includes ns of roadways (a specific highway route may be on more than one subsystem):

- Interstate The Eisenhower Interstate System of highways retains its separate identity within the
- Other Principal Arterials These are highways in rural and urban areas, which provide access between an arterial and a major port, airport, public transportation facility, or other intermodal transportation facility
- Strategio Highway Network (STRAHNET) This is a network of highways, which are imp the United States' strategic defense policy and which provide defense access, continuity and emergency capabilities for defense purposes.
- Major Strategio Highway Network Connectors These are highways, which provide access between major military installations and highways which are part of the Strategic Highway Network.
   Intermodal Connectors These highways provide access between major intermodal facilities and
- the other four subsystems making up the National Highway System

Operational improvement - A capital improvement consisting of installation of treffic surveillance and control equipment, computerized signal systems, motorist information systems, integrated treffic control incident management programs, and transportation demand and system management facilities,

Para-transit Services - Trensit service that provides generally more flexible and personalized service regular-route transit, using a variety of vehicles, such as large and small buses, vans, cars and taxis. Para-transit can serve a particular population, such as people with disabilities, or can be assigned to serve the general population. Para-transit is frequently provided in less densely populated areas, and used at times and in areas where trip demands are less concentrated, such as during weekends and evenings in urban settings. Para-transit services are of several types:

- . Ridesharing Car and van pooling intended primarily to serve the work trip.
- Demand-Response This is any type of public transportation involving flexibity scheduled service
  that is deployed upon a person's request for a bip. There are three types of demand response:

   Dish-Aftide Services The best known and most common type of pare-transit, involving
  advance request pickup and drop-off at deshed or designated destinations. Dish-e-ride

   may deploy vans, small buses or shared-ride taxis.
  - Cycled Services A zonal demand-response service in which the vehicles are scheduled to arrive and leave a major activity center on a regular basis; and in between scheduled stops, passengers are picked up and dropped off at their doors.
  - Flexible Fixed-Route or Deviation Services Either point deviation or route deviation where vehicles stop at specific locations on a regular schedule but do not have to follow a set route between the stops. They can deviate from the route to pick up or drop off passengers

Park and Ride - An amangement whereby people can drive an automobile to a transit hub, transfer station or terminal, park in the designated lot, and use a transit vehicle for their ultimate destinations.

Peak Period - The time between 6:30 and 0 a.m. and between 3:30 and 6 p.m. on a weekday, when traffic is usually heavy.

Performance Measures - A quantifiable representation of an outcome or process. Performance measures can be used as a management tool to track and assess progress. They can be used address stakeholders! desire for accountability and transparency in decision making

Person Trip - A one-way journey between two points by one person in a vehicle

Preservation - Preservation activities are directed toward the elimination of deficiencies and major cost replacement of existing facilities. Preservation is not meant to include work that will increase the level of service by the addition of traffic lanes.

Regional Development Commission (RDC) - Involved in soliciting and evaluating projects, and seek to integrate regional priorities in planning and project selection; coordinates transportation with MnDOT following a work program framework. There are 12 Regional Development Commissions in Minnesota.

Regular-Route Transit Service - A transit service that operates on a predetermined, fixed route and schedule. The types of vehicle used in regular-route service are generally large buses or small buses. Regular-route service is usually classified as four types:

- Local Service Buses make frequent pickups and drop-offs, stopping at almost every street corner.
- Urban Local Buses operate primarily in central cities and include regular-route radial service (routes start or end in one or both of the two major downtowns); crosstown (often providing connecting links between radial routes); and limited stop (buses make limited stops along a route or "skip stops," achieving faster service to selected destinations).

- Suburban Locals Buses operate in suburban environments, many times as suburban circulators, and include regular-route crosstowns (often as feeder routes to radial services) and para-transit services.
- Services. Buses operate nonstop on highways or dedicated transitively for at least four miles and include peak only and all-day express. Express routes provide travel times competitive with diving in an automobile. Most express routes operate longer distances (8-25 miles) and during peak times, and are destined to and from one of the two major downtowns.

Rehabilitation - Roadway Improvements Intended to correct conditions identified as deficient without major changes to the cross section. These projects should consist of removal and replacement of base and pavement, shouldering and widening and drainage

Right of Way (ROW) - Right of way refers to a strip of land which is used as a transportation comidor. The land is acquired as an easement or in fee, either by agreement or condemnation. It may also refer to temporary rights needed to construct a transportation

Routine Maintenance - Roodway maintenance consisting of snow and ice control, mowing, sweeping, periodic applications of bituminous overleys, seel treatments, miling, creck routing and filling and be repair. These treatments are intended to help ensure the roadway can be used to the end of its design it

Smart Growth - A pro-growth approach to guiding development into more convenient patterns and into areas where infrastructure allows growth to be sustained over the long term. It emissions developments of complementary land uses, including affordable and lifecycle housing, retail and offices, on interconnected streets amenable to walking, bicycling or using transit or car to reach destinations.

Stakeholders - A person or group that may be affected or perceives that they may be affected by a decision, plan, program or proje

Statewide Performance Program (SPP) - SPP consists of federel funding provided under the National Highway Performance Program (NHPP) intended for use on the National Highway System (NHS) including the required state-local matching funds. MnDOT has established the SPP to ensure progress in meeting mance requirements for pavement, bridge, safety, and congestion on the NHS syste

State Transportation Improvement Plan (STIP) – The State Transportation Improvement Program (STIP) is Minnesote's four-year transportation improvement program. The STIP identifies the schedule and funding of transportation projects by state fiscal year (July 1 through June 30). It includes all state and local transportation projects with federal highway and/or federal bransh funding along with 100 percent state funded transportation projects. Rall, port, and aeronautic projects are included for information purposes. The 8THP is developed updated on an annual basis. substructure or culvert as four or less or if the road approaches regularly overtop due to flooding. A general condition rating of four means that the component rating is described as poor.

Surface Transportation Program (STP) - One of the five core federel highway funding program. STP provides flexible funding that may be used by states and localities for projects on any federel-wid highway, including the national highway system, bridge projects on any public road, transit capital projects, and intectly and intently bus terminate and facilities.

Telecommuting - The elimination or reduction in commuter trips by routinely working part of full-time at home or at a satellite work station closer to home.

Throughput - The amount of vehicles/persons that can pass a point on a roadway or pass through an Intersection over a specified period of time. It can be equated to capacity if considering vehicles alone

narrow lanes and traffic circles used to slow traffic in primarily residential neighborhoods.

Transportation Alternatives Program (TAP) -Under MAP-21, transportation enhancements, scenic byways, safe routes to school, and several other discretionary programs have been grouped together under the Transportation Alternatives Program.

Program – The Transportation Economic Development Program is a joint effort of the Department of Transportation and the Department of Employment and Economic Development. The program's purpose is to fund construction, reconstruction, and improvement of state and local transportation infrastructure in

- Create and preserve jobs.
- Improve the state's economic competitiveness.
- Increase the tax base.
- Accelerate transportation improvements to enhance safety and mobility.
- · Promote partnerships with the private sector.

The program provides state funding to close financing gaps for transportation infrastructure improvement construction costs. These improvements will enhance the statewide transportation network while promoting economic growth through the preservation or expansion of an existing business—or development of a new

Trunk Highway (TH) - Major roadways such as Interstates, U.S. Highways, and State Highways.

Urban Areas - As defined in Federal Aid Highway Lay (Section 101 of Title 23, U.S. Code) as follows:

Central Minnesote Area Transportation Partnership: Operations and Policy Manual

38

Central Minnesota Area Transportation Partnership: Operations and Policy Manual

39

- . Urban Area means an urbanized area, or in the case of an urbanized area encompassing more Urban Area means an urbanized area, or in the case of an urbanized area encompassing more than one State, their part of the urbanized area encot such State, or urban piace as designated by the Bureau of the Census having a population of five thousand or more and not within any urbanized area, within boundaries to be fixed by responsible State and local officials in cooperation with each other, subject to approved by the Secretary. Such boundaries shall, as a minimum, encompass the enthe urban place designated by the Bureau of Census. Small Urban areas are those urban places, as designated by the Bureau of the cases are those urban places, as designated by the Bureau of the Census having a population of first thousand (5,000) or more and not within any urbanized area. Urbanized areas are designated as such to the Bureau of the Census of the Census and excellent as such to the Bureau of the Census.
- are designated as such by the Bureau of the Census.
- Rural Areas comprise the areas outside the boundaries of small urban and urbanized areas, as

Urban/Rural Status - Delineation of geographical areas by the Census Bureau. Urban areas represent densely developed territory and encompass residential, commercial, and other non-residential land uses; redefined after each decennial census by applying specified criteria. Rural areas encompass all population using, and territory not included within an urban ar

User Cost - The total dollar cost of a trip to a user for a particular mode of transportation; includes out-of-Down - THE MAIN GOINT COST OF a 199 to a user for a particular mode of transportation; includes pocket costs, such as transit fares, gas, oil, insurance, and parking for autos plus a valuation of i cost, such as waiting and travel times.

Vehicle Miles Traveled (VMT) - Commonly used to measure the demand on our transpor computed by multiplying the annual average daily traffic (AADT) by the centerline road miles.

Volume-to-Capacity Ratio - The hourly number of vehicles expected to use a roadway in the busiest hour, divided by the number of moving vehicles the roadway can safely accommodate in an hour.

# Appendix E: Non-Project Specific Local

### Maintenance / Operation Expense Definitions

# General Maintenance/Operation Expense Definitions

- 1. Routine Maintenance Expenses
  - Includes maintaining the status quo even though deteriorated. To keep at the original condition or use.
- 2. Repairs and Replacements
  - Includes restoration to original condition.
     To make the surface as it was before, even though material used is better.
- 3. Betterments
  - Any "improvement" over the original condition or design. The first time something is done to a roadway it is a betterment.

# Specific Maintenance/Operation Expenditures

Routine Maintenance Expenses

- a. Smoothing Surface
  - o blading gravel roads
- b. Minor Surface Repair
  - o patching with bituminous
  - o repairing/crack filling concrete
  - o sealing patches
  - o cleaning/sweeping roadways
  - o crack filling with bituminous
  - blading shoulders with no extra material
- c. Cleaning Culverts and Ditches
  - o cleaning and thawing culverts
  - o minor ditch cleaning
  - o repairing title lines
  - o marking culvert ends

- picking debris off roadway
- o working on beaver dams
- o relaying culvert ends
- o maintaining driveways and approaches
- o checking driveways and utility permits
  - d. Brush and Weed Control
- o mowing grass and weed
- o spraying weeds and brush
- o minor clearing and grubbing
  - e. Snow and Ice Removal
- o maintaining snow fence
- o plowing and winging snow
- o sanding and salting roads
- o cleaning snow off bridges and rails
- o mixing sand material
- o fixing mail boxes
  - f. Traffic Services
- o maintaining posted signs
- o maintaining traffic signals
- stripping pavement
- o patrolling roads for load restriction
- o putting up barricades
- o flagging for safety
- o road inspection
  - 2. Repairs and Replacements
  - a. Reshaping
    - minor shoulder, roadbeds, ditch, or backslope reshaping
  - b. Resurfacing
    - o spot graveling of roads
    - o continuous graveling of roads
    - adding binder to the road surface

- o stabilizing the gravel surface
- o aggregate shouldering
- c. Culverts, Bridges and Guard Rails
- o replacing, lowering or raising culverts
- o repairing bridges
- o painting bridges
- o repairing guard rails
- o repairing culverts
- o drainage ditch repair assessments
  - d. Washouts
  - o repairing roadbed, shoulder, ditch, backslope and culvert washouts
  - e. Subgrade
- o prospecting for gravel
- o mud jacking pavement
- o repairing frost boils
  - 3. Betterments
    - a. New Culverts, Rails or Tiling
- o delivery of new or larger culverts
- o installing new guard rails, tile lines, rip rap, erosion control, and
  - b. approaches or drives
- o culvert extensions
  - c. drainage correction

### Cuts & Fills

- o major reshaping of shoulders, roadbeds, ditches, and backslopes
- o filling swamps
- o rumble strips
- repair of road dips
- Seeding and Sodding
  - o turf establishment
  - o tree and shrub planting
- d. Bituminous Treatment
- spot retreating bituminous
- bituminous overlays not approved as a construction project
- seal coating bituminous and county forces railroad crossing replacement
- concrete overlays not approved as a construction project

### Appendix F: Detailed Financial

The following section provides additional data related to each APO agencies' financial condition. The financial information will review:

- 1. Financial Analysis Preparation
- 2. Expansion & Maintenance Investment Category Definitions
- 3. Financial Capability Finding

More financial data used for the charts in this analysis are located in Chapter 6.

### **City of Saint Cloud**

### Financial Capability Finding

Based on historic overall local funding and maintenance investment levels, approximately \$8,202,512 will be available to match federal funds from FY 2018 to 2021 without compromising maintenance of the existing system.

This figure compares to a total local match of \$2,470,695 for City of St. Cloud projects programmed in the FY 2018-2021 TIP. Accordingly, the City of St. Cloud will be able to provide this local match without compromising maintenance and operation of their existing system.

| notoricar |               | tion Funds Invested<br>Project Related | Total         | operation and D | Total         |
|-----------|---------------|--|---------------|-----------------|---------------|
|           | Related Local | Local                                  | Local         | Local           | Local         |
| Year      | Maintenance   | Maintenance*                           | Maintenance   | Expansion**     | Investment    |
| 1990      | \$1,567,369   | \$2,296,705                            |               | \$231,867       | \$4,095,941   |
| 1991      | \$1,659,189   | \$4,288,490                            |               | \$534,578       | \$6,482,257   |
| 1992      | \$1,965,559   | \$3,709,001                            |               | \$147,130       | \$5,821,690   |
| 1993      | \$2,019,425   | \$3,194,194                            |               | \$500,252       | \$5,713,871   |
| 1994      | \$2,231,393   | \$1,973,404                            |               | \$1,675,616     | \$5,880,413   |
| 1995      | \$2,485,000   | \$2,171,986                            |               | \$1,188,014     | \$5,845,000   |
| 1996      | \$2,528,000   | \$3,488,000                            |               | \$555,000       | \$6,571,000   |
| 1997      | \$2,629,000   | \$2,637,000                            |               | \$877,000       | \$6,143,000   |
| 1998      | \$2,685,000   | \$3,618,000                            |               | \$0             | \$6,303,000   |
| 1999      | \$2,874,000   | \$2,851,000                            |               | \$1,598,000     | \$7,323,000   |
| 2000      | \$2,874,000   | \$3,131,000                            |               | \$2,472,000     | \$8,477,000   |
| 2001      | \$3,037,000   | \$3,014,000                            |               | \$3,686,000     | \$9,737,000   |
| 2002      | \$3,154,000   | \$4,730,000                            |               | \$2,818,000     | \$10,702,000  |
| 2003      | \$3,577,000   | \$1,358,000°                           | \$4,935,000   | \$4,324,000     | \$9,259,000   |
| 2004      | \$3,713,000   | \$765,000                              | \$4,478,000   | \$2,282,000     | \$6,760,000   |
| 2005      | \$3,777,000   | \$2,458,000                            | \$6,235,000   | \$3,718,000     | \$9,953,000   |
| 2006      | \$4,053,000   | \$6,132,000                            | \$10,185,000  | \$7,621,000     | \$17,806,000  |
| 2007      | \$4,281,000   | \$5,405,000                            | \$9,686,000   | \$710,000       | \$10,396,000  |
| 2008      | \$3,720,000   | \$4,303,000                            | \$8,023,000   | \$5,299,000     | \$13,322,000  |
| 2009      | \$3,642,000   | \$1,445,000                            | \$5,087,000   | \$3,147,000     | \$8,234,000   |
| 2010      | \$4,302,788   | \$3,419,911                            | \$7,722,699   | \$4,677,598     | \$12,400,297  |
| 2011      | \$4,434,139   | \$3,445,765                            |               | \$4,916,491     | \$12,796,396  |
| 2012      | \$4,565,491   | \$3,471,620                            | \$8,037,111   | \$5,155,384     | \$13,192,495  |
| 2013      | \$4,236,105   |  | \$7,181,678   | \$0             | \$7,181,678   |

<sup>\*</sup> Based on the City of St. Cloud's historic maintenance/operation investment percentage of total local transportation funds 1990 to 2015.

Financial Capability Finding: Based on historic overall local funding and maintenance investment levels, approximately \$8,202,512 will be available to match federal funds from FY 2017 to 2021 without compromising maintenance of the existing system. This figure compares to a total local match of \$2,470,695 for City of St. Cloud projects programmed in the FY 2017-2021 TIP. Accordingly, the City of St. Cloud will be able to provide this local match without compromising maintenance and operation of their existing system.

### **City of Sartell**

### Financial Capability Finding

Based on historic funding and maintenance investment levels, approximately \$5,570,705 will be available to match federal funds from FY 2018 to 2021. This figure compares to a total local match of \$962,610 for City of Sartell projects programmed in the FY 2018-2021 TIP. Accordingly, the City will be able to provide this local match without compromising maintenance and operation of their existing system.

 <sup>\*</sup> Based on the City of Sartell's historic maintenance/operation investment percentage of total local transportation funds 1990 to 2015.

### Financial Capability Finding:

Based on historic funding and maintenance investment levels, approximately \$5,570,705 will be available to match federal funds from FY 2017 to 2021. This figure compares to a total local match of \$962,610 for City of Sartell projects programmed in the FY 2017-2021 TIP. Accordingly, the City will be able to provide this local match without compromising maintenance and operation of their existing system

### **City of Saint Joseph**

### Financial Capability Finding

Based on historic funding and maintenance investment levels, approximately \$4 million will be available to match federal funds from FY 2018 to 2021. This amount is greater than the \$698,288 local match required for federal projects in the FY 2018- 2021 TIP. Accordingly, the City of St. Joseph will be able to provide this local match without compromising maintenance/operation of their existing system.

<sup>\*</sup> Based on the City of St. Joseph's historic maintenance/operation investment percentage of total local transportation funds 1990 to 2014.

Financial Capability Finding: Based on historic funding and maintenance investment levels, approximately \$4 million will be available to match federal funds from FY 2017 to 2021. This amount is greater than the \$698,288 local match required for federal projects in the FY 2017-2021 TIP. Accordingly, the City of St. Joseph will be able to provide this local match without compromising maintenance/operation of their existing system.

### **Stearns County**

### Financial Capability Finding

Based on historic funding and maintenance investment levels, approximately \$2.2 million will be available to match federal funds from FY 2018 to 2021. This amount is greater than the \$1,440,549 local match required for federal projects. Additionally, all federal projects being matched are maintenance/ operation projects that will improve overall maintenance/ operation of the existing system. Accordingly, Stearns County will be able to provide this local match without compromising maintenance/ operation of their existing system.

<sup>\*</sup> Based on the Steams County's historic maintenance/operation investment percentage of total local transportation funds 1990 to 2015.

Financial Capability Finding: Based on historic funding and maintenance investment levels, approximately \$2.2 million will be available to match federal funds from FY 2017 to 2021. This amount is greater than the \$1,440,549 local match required for federal projects. Additionally, all federal projects being matched are maintenance/operation projects that will improve overall maintenance/operation of the existing system. Accordingly, Steams County will be able to provide this local match without compromising maintenance/operation of their existing system.

### **Benton County**

### Financial Capability Finding

Based on historic funding and maintenance investment levels, approximately \$1.4 million will be available to match federal funds from FY 2018 to 2021. This amount is greater than the \$595,960 local match required for federal projects. Additionally, all federal projects being matched are maintenance/operation projects that will improve overall maintenance/operation of the existing system. Accordingly, Benton County will be able to provide this local match without compromising maintenance/operation of their existing system.

<sup>\*</sup> Based on the Benton County's historic maintenance/operation investment percentage of total local transportation funds 1990 to 2015.

Financial Capability Finding: Based on historic funding and maintenance investment levels, approximately \$1.4 million will be available to match federal funds from FY 2017 to 2021. This amount is greater than the \$595,960 local match required for federal projects. Additionally, all federal projects being matched are maintenance/operation projects that will improve overall maintenance/operation of the existing system. Accordingly, Benton County will be able to provide this local match without compromising maintenance/operation of their existing system.

### **Sherburne County**

### Financial Capability Finding

Based on historic funding and maintenance/operation investment levels, \$0 are available to match federal funds from FY 2018 to 2021. Sherburne County has no federal project programmed in the FY 2018-2021 TIP that requires a local match.

Sherburne County does not have an extensive history of expansion projects (in Haven Township), which dilutes the percentage of funds typically used on these types of projects. Due to this historical analysis, the average per year local maintenance cost amount was used to project the future local maintenance and operation cost estimates. This process is an estimate to illustrate local funding projections versus local spending on maintenance and operation expenses. Without previous expansion projects to project an historical average, the projected amount was zero.

### **MnDOT**

### Financial Capability Finding

Based on historic funding and maintenance investment levels, approximately \$2.4 million will be available to match federal funds from FY 2018 to 2021. This amount is more than the \$150,100 State match required for federal projects in the FY 2018- 2021 TIP. However, all of the federal projects being matched are maintenance, safety or operations related projects that will improve maintenance and operation of the existing system. Accordingly, MnDOT District 3 will be able to provide this local match without compromising maintenance and operation of their existing system.

**Source:** MnDOT District 3 State funds. \* Includes State funding invested in projects that fall within the defined maintenance categories in this Chapter. \*\* Includes State funding invested in projects that fall within the defined expansion category in this Chapter. Note: Figures reflect estimates of dollars invested in the APO Planning Area. General, non-project specific, maintenance is increased 10 percent per year after 1996, as requested by MnDOT District 3 staff. Starting in 2011, all non-project maintenance is roughly 6.66% of the District's total operating budget.

### **Saint Cloud APO**

### Financial Capability Finding

The APO is anticipating approximately \$2.5 million of federal planning funds from FY 2018 to 2021. These federal funds will require a total local match of \$503,289. When comparing this amount to projected local planning revenue, it is slightly under the amount required to match the maximum federal funds with local funds. However, if the maximum amount of federal funds are programmed for local planning studies, APO will require the local agency to provide a 20% match. This will increase the local income to match the federal funding. None of the 2018-2021 studies are currently programmed. In addition, APO receives \$62,815 per year in State funding assist in providing the local match.

| Year    | Local Assessments | Other Local Income | Tota       |

## Saint Cloud Metro Bus

## Financial Capability Finding

St. Cloud Metro Bus has \$10,974,000 in federal funds programmed in the FY 2018 - 2021 TIP that will require a minimum (20%) match of \$2,743,500. Metro Bus will be able to provide their required local match for federal funds programmed. Metro Bus has \$56,350,967 of local and state match programmed to match federal funds in the FY 2018-2021 TIP, Metro Bus funding projection is sufficient to provide the programmed amount. Projects without federal funds, such as Dial-A-Ride services were not included in the TIP or in this financial analysis. Additional projects receiving federal funds will be added via TIP amendments.

# G Appendix G: Common Acronyms and

# STIP Codes

# Route System, Program, and Proposed Fund Categories

3-C – Comprehensive, Cooperative & Continuing

AA – Affirmative Action

AC – Advance Construction

ADA – Americans with Disabilities Act

ADT – Average Daily Traffic

APO – Area Planning Organization

AQ – Air Quality

ATIP – Area Transportation Improvement Program

ATP – Area Transportation Partnership

BARC - Bridge & Road Construction

BF - Bond Fund

BRRP – Bridge Replacement or Rehabilitation

Program

CAA – Clean Air Act

CAAA - Clean Air Act Amendment

CBD – Central Business District

CFR – Code of Federal Regulations

CMAQ – Congestion Mitigation & Air Quality

CO – Carbon Monoxide

CR - County Road

CSAH – County State Aid Highway

DBE – Disadvantaged Business Enterprise

D3 – District 3

EB - Eastbound

EEO – Equal Employment Opportunity

EJ – Environmental Justice

EPA – Environmental Protection Agency

FAA – Federal Aviation Administration

FHWA – Federal Highway Administration

FRA – Federal Railroad Administration

FTA – Federal Transit Administration

FY – Fiscal Year

HCVMT – Heavy Commercial Vehicle Miles

Traveled

HES – Hazard Elimination Safety

HSIP – Highway Safety Improvement Program

IM – Interstate Maintenance

ITS – Intelligent Transportation System

LOS – Level of Service

MN - Minnesota

Mn/DOT – Minnesota Department of Transportation

MPCA – Minnesota Pollution Control Agency

MPO – Metropolitan Planning Organization

MSA – Metropolitan Statistical Area

MSAS – Municipal State-Aid Street

MTC – St. Cloud Metro Bus

NAAQS – National Ambient Air Quality Standards

NB - Northbound

NEPA – National Environmental Policy Act

NHS – National Highway System

OIM - Mn/DOT Office of Investment Management

SAFETEA-LU – Safe, Accountable, Flexible,

Efficient, Transportation Equity Act: A Legacy for

Users

SB - Southbound

PNR - Park and Ride

PTMS – Public Transit Management System

RDC – Regional Development Commission

SE - Southeast

SF - State Fund

SIP – State Implementation Plan (for Air Quality)

SOV – Single Occupancy Vehicle

SRTS - Safe Routes to School

STIP – State Transportation Improvement Program

STBG – Surface Transportation Block Grant

TH – Trunk Highway

TAC – St. Cloud APO Technical Advisory Committee

TEA – Transportation Enhancement Activities or

Transportation Equity Act for the 21st Century

TIP – Transportation Improvement Program

TCM – Transportation Control Measures

TCP – Transportation Control Plan

TCSP – Transportation, Community & System

Preservation

TDM – Transportation Demand Management

TMA – Transportation Management Area

TP – Transportation Plan

TRLF - Transportation Revolving Loan Fund

TSM – Transportation System Management

UPWP – Unified Planning Work Program

U.S.C. – United States Code

U.S. DOT – United States Department of

Transportation

V/C – Volume to Capacity Ratio

VMT – Vehicle Miles Traveled

WB – Westbound

## Programming Codes from MnDOT STIP Document

#### III. PROGRAM LISTING

The following section contains the FY 2012-2015 STIP project listing sorted by District/ATP.

The first page of each District/ATP shows the District/ATP location within the state and the counties included within each District/ATP. The name of the District Transportation Engineer, phone number, and address are shown as well as a general information telephone number.

The second page begins the listing of projects in that District/ATP sorted by Fiscal Year. Within each Fiscal Year, projects are sorted by Route System with transit projects first followed by rail, local roadway, and then state projects.

The following information is provided for each project

 Seq # - The sequence number is a unique number assigned to each project in this project listing.

Route - The route name and number on which System the project is located. See Figure 5.

| Figure 5<br>Route System Categories |  |  |  |
|-------------------------------------|--|--|--|
| Route System                        | Description .  |  |  |

| TWN                                 | Township Road  |  |  |

Project

Number -

Project identifier. Most trunk highway projects start with the control section numbers. Local projects start with either the county number or the city number.

Agency

- The jurisdiction responsible for implementing projects or for opening bids.

Description - The location and/or type of project.

- The length of the project.

Programs - The program category. See Figure 6.

Type of Work

- The intent of the project.

Proposed - Preliminary fund assignment with exact determination of funding determined upon authorization. See Figure 7.

Total

- The total estimated cost of the project relative to federal funding to be used in year of letting. This includes advance construction (AC) conversion funding. It does not include the original advance construction funding.

- The total estimated federal aid highway funding to be used for the project. This includes advance construction conversion funding.

#### ST. CLOUD AREA PLANNING ORGANIZATION **SELF-CERTIFICATION RESOLUTION 2017-07**

Approving the St. Cloud Metropolitan Area 2018-2021 Transportation Improvement Program (TIP)

WHEREAS; in accordance with 23 CFR 450.334(a) the St. Cloud Area Planning Organization hereby certifies that the metropolitan transportation planning process is addressing major issues facing the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

- 23 U.S.C. 134 and 49 U.S.C. 5303, and this subpart;
- 2. In non-attainment and maintenance areas, Sections 174 and 176 (c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
- 3. Title VI of the Civil Rights Act of 1964, as amended (42 USC 2000d-1) and 49 CFR part 21;
- 4. 49 USC 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- 5. Sections 1201 of the MAP-21 (Pub. L. 112-141) and 49 CFR Part 26 regarding the involvement of disadvantaged business enterprises in the US DOT funded projects;
- 6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- 7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR Parts
- 8. The Older Americans Act, as amended (42 U.S.C 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- 9. Section 324 of title 23, U.S.C regarding the prohibition of discrimination based on gender; and
- Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR 27 regarding discrimination against individuals with disabilities.

NOW, THEREFORE, BE IT RESOLVED, the APO hereby certifies that the 2016-2019 TIP has been developed in conformance with all mentioned applicable state and federal MPO requirements.

# Organization Lobbving - Certification

ST. CLOUD AREA PLANNING ORGANIZATION

Affirming Certification Regarding Lobbying Under 49 Code of Federal Regulation (CFR), Section 20.110

LOBBYING-CERTIFICATION RESOLUTION 2017

WHEREAS; 49 CFR, 20.110 states that a certification and disclosure form shall be filed, if required, with each submission that initiates agency consideration for award of a Federal contract, grant, or cooperative agreement exceeding \$100,000; or an award of a Federal loan or a commitment providing for the United States to insure or guarantee a loan exceeding \$150,000.

WHEREAS; the APO assures completion and submittal of Standard Form-LLL, "Disclosure of Lobbying Activities," as required by 49 CFR 20.110 and pursuant to 31 U.S.C. 1352, if any funds other than federal funds have been or will be paid to any person to influence or attempt to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with any application for federal assistance.

NOW, THEREFORE, BE IT RESOLVED; the St. Cloud APO hereby certifies that no federally funds have been or will be paid by or on behalf of the APO to any person to influence or attempt to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress regarding the award of Federal assistance, or the extension, continuation, renewal, amendment, or modification of any Federal assistance agreement.

ATTEST:

Member Jeff Goerger

St. Cloud APO Executive Director

# Appendix J: Public Comments Received &

# **APO Response**

Below is the comment sheet included with each copy of the Draft TIP during both Public Comment Periods. No public comments were received during comment period.

NOTIFICATION OF AVAILABILITY & PUBLIC INFORMATION MEETING: ST. CLOUD AREA PLANNING ORGANIZATION (APO)
TRANSPORTATION IMPROVEMENT PROGRAM (TIP) FY 2015-2019

The APO in coordination with the Federal Highway Administration, Minnesota Department of Transportation, Minnesota Pollution Control Agency, St. Cloud Metro Bus, and local jurisdictions has prepared a draft TIP for FY 2016-2019. The primary purpose of the TIP document is to program transportation projects including roadway, bridge, bicycle, pedestrian, safety, and transit projects receiving state and/or federal funds in the St. Cloud Metropolitan Planning Area in the upcoming fiscal years.

The full draft TIP will be available for review between Wednesday, June 17, 2015 and Friday, July 17, 2015 at the following locations: APO Office: 1040 County Rd. 4, St. Cloud; APO website: <a href="www.stcioudapo.org">www.stcioudapo.org</a>; Great River Regional Library: 1300 W. St. Germain St., St. Cloud. Submit comments on the draft TIP by Friday, July 17, 2015 to Jarrett Hubbard at St. Cloud APO, 1040 County Rd. 4, St. Cloud, MN 36303, FAX: 320-252-6557, EMAIL: <a href="https://doi.org/10.1007/jbr/hubbard@stcioudapo.org">https://doi.org//hubbard@stcioudapo.org</a>

# Appendix K: Transportation Alternative

# Program (TAP)

The following document is the Transportation Alternative Program (TAP) Guidebook and Application for the Central Minnesota Area Transportation Partnership (ATP 3). The ATP is public programing board for federal transportation funds in the 12 counties of Central Minnesota or correspond with MnDOT District 3. The Transportation Alternative Program was created as part of FAST Act and includes the Transportation Enhancement (TE), Scenic Byway, and Safe Routes to School Programs that were created under SAFETEA-LU Federal Transportation Bill. Despite the inclusion of additional eligible projects, TAP continues to support bicycle and pedestrian infrastructure development across Minnesota. The central Minnesota ATP 3 incorporates a competitive process in selecting eligible projects. The ATP integrates recommendations from the four regions within it, including Region 5 Development Commission, East Central Regional Development Commission, Region 7W Joint Powers, and St. Cloud Area Planning Organization. The ATP also utilizes a Subcommittee that reviews and suggests TAP projects

to the ATP. www.mndot.gov/d3/atp/

#### Transportation Alternatives Program Information

#### Federal Program Requirements

Following is a partial fisting of the regulations that apply to any project receiving follows transportation thanks. These requirements must be taken in to consideration during the project dove-opment and project implementation stages.

<u>Davis-Bacon and Copeland Acts</u>: Payment of pre-determined wage is applicable to all federal-old construction contracts exceeding \$2,000 and to all related subcontracts.

ADA Requirements: All Transportation Alternatives projects must comply with the federal and state hundropped accretifility mandatos.

Anti-Discrimination Lare: Each sponsoring participant must comply with applicable federal and state Anti-discrimination loss and be able to demonstrate compliance.

Project Supervision: All projects must be under the direct supervision of a Minnesota Licerosch Professional Impireso:

Additional Requirements and Specifications: Successful applicants will be provided with additional information as needed by MaDOT.

#### Qualifying Activities

Federal law defines the following activities as eligible for Transportation Alternatives Program (TAP)

- Transportation Alternatives as defined in 23 U.S.C. 101(a)(29) (MAP-21 §1.03):

   Construction, planning, and design of on-road and off-road rail facilities for pedestrians, bicycloss, and other non-motorized forms of transportation, including sidewalks, hicycle

   recycles, and other professional entries in managements in catalogy accounts in recommittee the safety-related infrastructure, and transportation projects to achieve compliance with the Americans with Dutaffiline Act of 1990 (ag. U.S.C. 1200) et seq.).

  b. Construction, placering, and design of infrastructure-related projects and systems that will provide sofe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs.

  c. Convenient and use of abandoned militoral corridors for trails for pedestrians, bicyclinis,

  - Conversion and use of abandonal milroud certifions for trails for pedestrians, bicyclinis, or other neo-monitowid transportation, users.

    Construction of tenenous, everfoods, and viewing areas.

    Construction of tenenous, everfoods, and viewing areas.

    Construction and activities, including—

    Inventory, control, or removal of condour advertising.

    In historic preservation and rehabilitation of bistoric transportation hastities.

    Very regulation transportation fractices in transportation rights-of-way to improve monthly applied to the present against inventor species, and provide errorism control; and very relative or preservation and provide errorism control; and transportation project clightle under this title.

    Any correlatoration project clightle under this title.

- i. address storm water management, control, and water pollution preven adultees storm water management, control, and water polation precurion or abstractors related to highway construction or due to highway mustoff, including activities described in sections 130 (h811): 328 (a), and 529; or it. relates vehicle-caused witelifier morally or to reason and maintain connectivity arreng terminal or aquation habitus.

  The recrustional trails program under section 206 of title 23. [NOTE: This program is abstracted through converse, moreone.]
- The aux routes to school program eligible projects and activities listed at scation 3404(f) of the
  - SAFETEA-LU:
- Infrastructure-related projects
   Noninfrastructure-schied addition
   Safe Routes to School coordinator.

  Hanning, designing, or constructing boulevoords and other roadways largely in the right-of-way. of former Intentate System routes or other divided highways

TAP projects are not required to be located along Federal-aid highways.

#### Non-Qualifying Activities

Exikal law identifies the following activities as incligible for Transportation Alternatives Program (TAP) funding:

- State or Metropolitan Planning Organization (MPO) administrative purposes, except for SRTS administratives, and administrative costs of the State permitted for RTP set-uside funds.
- · Promotional activities, except as permitted under the SRTS.
- General recreation and park facilities, playground equipment, sports fields, cumpgrounds, picnic areas and pavisions, etc.

Careful consideration should be given to whether an activity fulls within the eligibilities created under TAP. Section 1163 of MAP-21 climinated the definition of Transportation Enhancement activities in section 101 of title 23 and inserted in its place a definition of Transportation Alternatives. The Transportation Alternatives definition continued in 23 U.S.C. 191(a):29 created different categories of activities than those included under the previous transportation enhancement definition. As a result, sacromes than more increase unear personal reapportants intranscriber cultures. As a result, some activities that were previously eligible as independent Transportation litahancement pojects are to longer cligible, some collegomes of eligible for more and to a different range of activities. In some cases, activities that are no longer eligible for funding as independent TAP projects may be eligible for FIFWA participation under other title 23 provisions, such as project miligation measures when determined secessary to miligate project impacts (including the impacts of a TAP project). Transportation Enhancement categories that are no longer expressly described as eligible activities under the definition of Transportation Alternatives our:

Safety and educational activities for pedestrians and bicyclists. Exception: Activities targeting
children in Kindogasten through Sik grade one eligible nodes SETS (an eligible activity under
the TAP finding). Note: Some of these activities may be eligible under HSIP. Non-construction
projects for bicycle safety remain boudly eligible for STP finds.

- Acquisition of scenic cusements and scenic or historic sites (including historic battlefields), and scenic or historic highway programs (including sourist and welcome center facilities). Exceptions A few specific activities under this coregory one eligible for funding on TAP projects, including construction of namous, overlooks, and viewing areas; historic measurestion and rehabilitation of historic transportation facilities; and bicycle and podestrian facilities.
- Landscaping and other scene beautification. However, under the "continuarly improvement activities" category, projects such as streeticaging and consider landscaping may be eligible under TAB of selected through the required correportion prosess. States may use TAB Funds to meet junkyand screening and removal requirements under 23 U.S.C. 136 if selected through the amagenitive presums. Landscaping and sensie adherenment features, including jundyand conversal and screening, may be eligible as part of the construction of any Federal-aid highway project under [23 U.S.C. 319, including TAP-Guaded projects.
- Historic procureation, and reliabilitation and operation of historic buildings, structures, or facilities (including historic rulinead facilities and canals). Historic preservation activities now are limited to historic procuration and enhaltitation activities relating to a historic transportation facility. See section 101(x)(29)(E). Operation of historic transportation facilities is not eligible utter? LND.
- Archaeological planning and research. Under TAP, archaeological activities must relate to impacts from implementation of a transportation project eligible under title 23.
- · Establishment of transportation trustcurps. There is no eligibility for this activity under TAP.

#### Elegible projects must not be part of the orthgation of a transportation project.

Federal law, requires that observative funds run be award to implantance entitipation of advance impacts associated with implementation of transportation projects. Environ mental measures conducted as routine or continuous elements of transportation projects or those provided to mitigate project impacts in compliance with the requirements of environmental, historic preservation or other laws are not digitally often absentance funding. With his interpotation, the congreys "mitigation of water pollution due to highway month" is Lunked to facilities and programs that are in addition to current.

Alternative activities are over and above normal mitigation of transportation projects. Typically, a normal transportation project involves mitigation, including landscaping, other permit requirements and provisions negotiated as a condition of obtaining a permit for the transportation project. Permitting agencies might include federal agencies such as the US Porest Service, Bureau of Land Messagement or US Copps of Engineers. State permitting agencies might include the Minnesota Department of Natural Resources, Minnesota Pollution Control Agency or the Minnesota Bistorical Society. Regional agencies might include waterstead instantance and head might include waterstead instantance and head might include waterstead instantance.

The Minnesota Department of Transportation (MaDOT) has elected that the following activities are also considered ineligible for TAP funding, even if not prohibited federally.

- · Engineering activities
- Furchase of Alghrod Way

TAP Application Guidebook - Last Update: September 2014

Page !

#### Eligible Project Sponsors

Federal law identified the following entities as eligible to receive Transportation Alternatives Program (TAP) fanding:

- · Local governments;
- · Regional transportation authorities:
- · Transit agrosius,
- · Natural resource or public land agencies;
- · School districts, local adacation agencies, or schools;
- · Tribal governments; and
- Any other local or regional governmental entity with responsibility for oversight of transportation or recreational toils (other than a metropolitan planning organization or a State agency) that the State determines to be eligible, consistent with the goals of subsection (c) of section 213 of 200-23.

State DOTs and MPOs are not eligible entiries and inerefore are not eligible project spensors for TAP linds. However, State DOTs and MPOs may partner with an eligible entity project spensor to carry out a project.

Neoprofit organizations are not eligible as direct grant recipients for TAP funds unless they qualify through one of the eligible cettry categories (e.g., where a comprofit organization is a designated transit agreey or a school). Neoprofits are eligible to partner with any eligible entity on a 1.6 Pyroject, if State or local requirements parents.

- Local government entities include any unit of local government below a State government agency, except firs a Mempolishen Planning Organization. Examples include city, town, novembly, village, borough, parish, or county agencies.
- Regional transportation authorities are considered the same as the Regional Transportation Planning Organizations defined in the statewide planning section (23 U.S.C. 135(n)).
- Transit agencies include any agency respons ble for public transportation that is eligible for funds under the Federal Transit Administration.
- Natural resource or public land agencies include any Federal, Tribal, State, or local agency responsible for natural resources or public land administration. Examples indicate:
  - ... State or local park or finest agencies
  - 8 State or local fish and game or wildlife agencies
  - Department of the Interior Land Management Agencies
  - = 118 Forest Service
- School districts, local education agencies, or schools may include any public or comprelli private school. Projects should benefit the general public, and not only a private entire-

Page 6

#### Local Match and Cost Sharing Requirements

For all Transportation Alternatives Program (TAP) projects, including Safe Rostes to School (SRTS) projects funded with TAP Junit, the Federal share is the same as for the general Federal shift highway program: 80 percent Federal 20 percent State or local match subject to the sliding scale adjustment, COI U.S.C. 120.

As provided in 49 CFR 18.24 "Matching or cost sharing", the following requirements are emphasized:

- 18 24(b) (budgleations and exceptions (f) Cours have by other Federal grow agreements.
   Except as provided by Federal statute, a cost sharing or matching requirement may not be not by cours forms by another Federal grant. The probletion who may apply to income surroad by a grantee or subgrantee from a contract oranifed under another Federal grant.
- (3) Cost or contributions counted towards other Federal costs-sharing requirements. Nothbor costs not the values of fixed purp in-shood contributions may count invaries satisfying a cost sharing ormatching requirement of a growth agreement of they have been or will be considered covards untifying a cost sharing or matching requirement of another Federal grant agreement, a Federal procurement contract, or any other around of Federal funds.

Page 14

#### Section 1: General Information

NOTES: If your overall project contains non-eligible or non-transportation related elements, please mention the entire project in the brief project description, but concentrate the application, budget, etc. on the elements that are eligible and transportation related.

Secretaring Agencies, if transcring for another project applicant, are advised to have dialog with the project applicant to ascertain the level of commitment by the applicant to follow through on delivery of the project – including the potential use of Eminent Domain.

#### Section 2: Preject Budget

Please identify what costs will be incurred to carry our the proposed project, using the following budget categories as a guideline. Where appropriate, break down your costs by units purchased. For example: number of acres, cable yords of fill, etc. (Attach additional sheet(s) if necessary.)

#### Section 3: Sponsoring Agency Resolution

A Resolution of Spansonhip from the Sponsoring Agency is required for each project. The resolution must be approved by an eligible sponsoring agency (see the Transportation Alternatives Program Information section of this document for more information on appropriate sponsoring agencies). Please attach an original signed copy of the resolution. An example of sample language which can be used by a stochastic agency is shown.

#### Section 4: Resolution Agreeing to Maintain Facility

A Resolution agreeing to maintain the facility for its useful life is also required for each project. The resolution must be approved by an oligible sponsoring agency see the Transportation Alternatives Program Information section of this document for more information on appropriate sponsoring agencies.) Please stack as original signed copy of the resolution. An example of sample language which can be used by a sponsoring agency is shown.

#### Section 5: ATP Project Evaluation

Each ATP is responsible for developing this section of the TAP application. This section includes the additional information and quastions required in order to implement the specific project selection records and criteria developed by each ATP. The information requested in this section is above and beyond what is already asked for in the TAP Application Guidelook and Letter of Intert.

#### Section 6: Application Checklist

Each ATP uses a checklist as a tool for the applicant to ensure all the required information and its insentation has been included prior to submitted. The checklist softers both the structured application components within the TAP Application Gashibook as well as the information requested in the ATP specific application.

#### Section 2: Project Budget

Identify what costs will be incurred to carry out the proposed project, using the following budget categories as a guideline. Where appropriate, boats down your costs by entire parchased. For example number of acress, cable yords of fill, etc. (Attach additional sheets) if necessary.) Non-eligible items include right-of-way or hard acquisition (opposited fice, legal fice, ct.), administrat us costs prediminary and conservation originaring and contingencies) and others. (Refer to Qualifying Activities sections in the ZAP Application Gasidebook.)

Cast estimates are to be submitted in year of construction dollars. Year of construction dollars are used to better estimate the actual dollars required to deliver the project in the proposed construction year. Amounts, including local match, are estimates and may change as the project is delivered.

|----|---|--|--|--|--|
| П  | Eligibility   |  |  |  |  |
|    | MAP-21 requires that the project be an "eligible activity." The project must fall within one of the eligible activities listed below. (Please check the appropriate category.)  |  |  |  |  |
|    | On-must and off-road trail facilities for pedestrians, bicyclists and other non-metarized forms of transportation.  Transportation projects to achieve Americans with Disabilities Act of 1990 compliance.  Safe roates for non-drivers, including children, older adults and individuals with disabilities to access daily needs.  Convention and use of abundance railroad comblers.  Construction of termouts, overlooks and viewing areas.  Inventory, control or removal of extatoor advertising.  Elistoric preservation and rehabilitation of historic transportation facilities.  Vegetation management to improve roadway safety, prevent against invasive species and to provide consion control. |  |  |  |  |
|    | Archaeological activities.  Environmental mitigation to address storm water management.   |  |  |  |  |
| 님  | Roduce vehicle-caused wild life mortality or rectore/revirtain habitat connectivity.  Safe Routes to School (SRTS) project.   |  |  |  |  |
|    | Project Information   |  |  |  |  |
| 1. | Describe why this project is important to your community and how it will improve existing conditions.   |  |  |  |  |
| 2  | Describe the main users by type or classification and the approximate number of users to be served by the proposed project.   |  |  |  |  |

#### Section 4: Resolution Agreeing to Maintain Facility

A Resolution agreeing to maintain the facility for its useful life is also required for each project. The resolution must be approved by an eligible sponsoring agency (see the Transportation Alternatives Program Information section of this discusses for more information on appropriate sponsoring agencies). Home starch on original signed copy of the resolution. An example of sample language, which can be used by a sponsoring agency, is listed below.

#### [SAMPLE LANGUAGE]

4. Explain current and future ownership of the property.

Explain from your agency will provide the meansary local match to beverage the federal Transportation Alternatives Program funds requested and cover any additional (or ineligible) costs required for the completion of your project.

Explain the 20-year maintenance plan and any maintenance agreements that will be required with other agencies for your proposed project.

| Evaluation Criteria (100 Total Possible Points)  | M                      |
|--|------------------------|
| Criterion 1: Possible Points:  | 30.                    |
| Describe the level of identification of your project in one or more statewisk, regional, or loc<br>plan, which has been adapted by federal, state, regional or local agencies.   | 4                      |
| Shite, regional, and local agencies have developed numerous system plans addressing one or mo<br>Transportation Alternative Program (TAP) activities. In many cases, these plans provide details,<br>documentation on the exciting conditions and planted improvements or word in surveys of public to<br>and attitudes. They also can provide insight on the process for setting priorities and recommends<br>investments. The facilities identified in these plans are filedy to provide the greatest benefits to all of<br>residents of Manacsata and the regions within which they are located. Proposers should identify to<br>relationship of the project to any statewiste, regional or local plans/objectives. They should also expla<br>how the project is consistent with these plans and objectives, and refer to specific sections of the plan<br>Please provide a list to the plan or cite plan document reference. | 2 2 2 2 2 2            |
|  |                        |
| Criterion 2: Possible Pointe: 1  Possible bow your project connects or implements a larger project, concept, and stote, regional focal plan including a Safe Routes to School or Societ Byways Carridor Management Plan.   | 100                    |
| There may be a number of larger projects that are missing a key or final element. Funding these missis elements with TAP funds could provide a son of synargistic benefit extending beyond the immedia benefit provided by the compount for which funding to being sought. Examples include hile predestrian role segments that full gaps in existing trails or historic preservation that completes the restoration of a historic transportation facility that has already been partially unbandually restore. These are only generic covamples. Applicants are encouraged to look at their projects in light of the general concept in identified here and describe how their project fits into a larger project concept or plu which has been or seen will be implemented using another funding source.   | tie<br>or<br>ie<br>ii. |
